Introduction

Thank you for purchasing SoftBank 102SH/102SHII.

Before You Begin

For proper handset use, read "Quick Tips" (in お願いとご注意) and this guide beforehand.

- \cdot Accessible SoftBank Mobile services may vary by subscription, etc.
- · SoftBank 102SH and 102SH lare compatible with 3G and GSM network technologies.

SoftBank 102SH & 102SHII

This guide is for SoftBank 102SH and 102SHII. Operation descriptions are for both models unless specified by model name.

Guide Usage Notes

- · Most operation descriptions are based on default settings.
- · Unless noted otherwise, descriptions are for Home Screen.
- · Some operation descriptions may be omitted.
- · In this guide and on handset, "abroad" means "outside Japan" with regard to handset/service usage.
- · In this guide, microSDHC/microSD Card is referred to as "SD Card."

Screenshots & Key Labels

Actual handset windows, menus, etc. may differ in appearance. Key labels are simplified for reference convenience. Sample screenshots are mostly based on SoftBank 102SH.

Accessing Guide on Handset

Access this Guide on handset via Guide icon in Home Screen or via Guide indicator on Status Bar. Guide indicator appears on Status Bar by default. Follow these steps to hide Guide indicator:

 \cdot Guide usage information and confirmation for automatic updates appear at initial startup.

About USIM Card

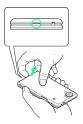

USIM Card is an IC card containing customer and authentication information, including handset number.

Inserting USIM Card

Power off first.

Remove Battery Cover

 \cdot Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Remove battery

 \cdot Use tab (()) to lift battery.

Pull out Tray

- · Use tab to gently pull out Tray until it is about halfway exposed as shown above.
- \cdot Tray is not removable; applying excessive force may damage Tray.

Place USIM Card in Tray with IC chip up

 \cdot Slide in Tray.

Secure Tray

Insert battery

· With recycling symbol up, align battery terminals with

Replace Battery Cover

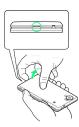

- · Align Battery Cover with handset, then firmly press down along shaded areas.
- \cdot Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/dust.

Removing USIM Card

Power off first.

Remove Battery Cover

· Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Remove battery

· Use tab (\bigcirc) to lift battery.

Pull out Tray

- \cdot Use tab to gently pull out Tray until it is about halfway exposed as shown above.
- \cdot Tray is not removable; applying excessive force may damage Tray.

Remove USIM Card

· Slide out USIM Card.

Secure Tray

Insert battery

· With recycling symbol up, align battery terminals with

Replace Battery Cover

- \cdot Align Battery Cover with handset, then firmly press down along shaded areas.
- · Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/ dust.

SD Card

Handset supports SD Card up to 32 GB. However, some SD Cards may not operate properly.

Unmounting SD Card

Always perform Unmount microSD before removing SD Card. (Complimentary SD Card preinstalled.)

In Home Screen, MENU 🗦 Settings

2

microSD & phone storage

3

SD Card is unmounted.

Removing SD Card

Before removing SD Card, always perform Unmount microSD, then power off.

Remove Battery Cover

· Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Remove battery

· Use tab (\bigcirc) to lift battery.

Remove SD Card

· Gently push in card and release it; card pops out. Carefully remove card without bending it.

Insert battery

· With recycling symbol up, align battery terminals with contacts.

Replace Battery Cover

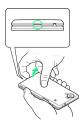

- \cdot Align Battery Cover with handset, then firmly press down along shaded areas.
- Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/ dust.

Inserting SD Card

Power off first.

Remove Battery Cover

· Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Remove battery

· Use tab (\bigcirc) to lift battery.

Insert SD Card

- \cdot With terminals down, insert SD Card until it stops.
- · Do not insert other objects.

Insert battery

 \cdot With recycling symbol up, align battery terminals with contacts.

Replace Battery Cover

- \cdot Align Battery Cover with handset, then firmly press down along shaded areas.
- Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/ dust.

Formatting SD Card

When using a new SD Card for the first time, format it on handset before trying to save files, etc.

- \cdot Formatting deletes all SD Card files.
- \cdot Charge battery or install a charged battery beforehand.

In Home Screen, MENU 🔵 Settings

microSD & phone storage

Unmount microSD changes to (Mount microSD).

4

[Erase microSD]

Erase microSD

Enter Handset Code 🔵 OK

· If Handset Code is unset, follow onscreen instructions.

Erase everything

- Formatting starts.
- · When finished, SD Card is mounted.
- Complimentary Sample microSDHC Card

Complimentary SD Card is preinstalled.

· Warranty does not cover complimentary sample microSDHC Card.

Important SD Card Usage Note

SD Card files may be lost/altered accidentally. Keep a copy of contacts, etc. in a separate place. SoftBank Mobile is not liable for any damages resulting from accidental loss/ alteration of information.

 $\boldsymbol{\cdot}$ Never power off or remove battery while files are being accessed.

General Use

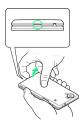

Keep SD Card out of infants' reach; may cause suffocation if swallowed.

Battery Installation

Inserting Battery

Remove Battery Cover

 \cdot Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Insert battery

 \cdot With recycling symbol up, align battery terminals with contacts.

Replace Battery Cover

- \cdot Align Battery Cover with handset, then firmly press down along shaded areas.
- \cdot Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/dust.

Removing Battery

Power off first.

Remove Battery Cover

· Hold handset in one hand; with your other hand, use notch below Display to gently remove Battery Cover.

Remove battery

· Use tab (\bigcirc) to lift battery.

Replace Battery Cover

- \cdot Align Battery Cover with handset, then firmly press down along shaded areas.
- Close Battery Cover firmly. Debris trapped between Cover and battery housing gasket may expose handset to liquid/ dust.

Ġ

Lithium-ion Battery

This product requires a lithium-ion battery. Lithium-ion batteries are recyclable. To recycle a used lithium-ion battery, take it to any shop displaying the symbol below.

• To avoid fire or electric shock, do not short-circuit or disassemble battery.

Battery Usage Notes

General

Charge battery at least once every six months; uncharged battery may die or affect files/settings.

Replacement

Replace battery if operating time shortens noticeably.

Bulges

Depending on usage, bulges may appear near end of battery life; this does not affect safety.

Cleaning

Clean device charging terminals with dry cotton swabs.

Battery Cover

To maintain water/dust resistance, close Battery Cover properly. Do not apply excessive force to Battery Cover; damage may result.

· If Battery Cover is damaged, replace it with a new one. Use of damaged Cover may cause electric shock, battery corrosion, etc. due to water seepage. (Battery is not water or dustproofed.)

Charging Battery

Battery must be inserted in handset to charge it.

Desktop Holder

Use Desktop Holder with AC Charger ZTDAA1 (sold separately).

- AC Charger and Desktop Holder are not water or dustproofed. Do not charge battery while handset is wet.
- · Handset/AC Charger may warm while charging.

1

Insert Charger Connector into Desktop Holder

- · Insert connector in the correct orientation until it clicks.
- 2

Extend blades and plug AC Charger into AC outlet

3

Align handset with guides, then push down until it clicks into place

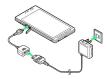

Notification Lamp illuminates while charging.

- Do not let straps, etc. get caught between handset and Desktop Holder.
- \cdot Notification Lamp goes out when battery is full. Remove handset then Charger Connector from Desktop Holder, then unplug AC Charger and retract blades.

AC Charger

Use Micro USB Charging Adapter with AC Charger ZTDAA1 (sold separately).

· AC Charger and Micro USB Charging Adapter are not water or dustproofed. Do not charge battery while handset is wet.

1

Insert Charger Connector into Micro USB Charging Adapter

 \cdot Confirm connector orientation, then insert connector until it clicks.

2

Open Port Cover and insert Micro USB Charging Adapter into External Connector Port

· Use notch above Port Cover to open it. Placing a finger inside Port Cover, gently fold it back using the rubber hinge. Pulling/Twisting open Port Cover may damage hinge.

Extend blades and plug AC Charger into AC outlet

- Notification Lamp illuminates while charging.
- Notification Lamp goes out when battery is full. Unplug AC Charger and retract blades. Remove Micro USB Charging Adapter and close Port Cover.

USB Charge

Connect handset to a PC via Micro USB Cable.

- · Power on handset and PC first.
- \cdot To use Fast transfer mode, install USB Cable driver on the PC beforehand.
- \cdot Battery may not charge or charge slowly depending on PC status/environment. Battery may not charge if SD Card is not inserted.

Open Port Cover and insert Micro USB Cable into External Connector Port

· Use notch above Port Cover to open it. Placing a finger inside Port Cover, gently fold it back using the rubber hinge. Pulling/Twisting open Port Cover may damage hinge.

Insert Micro USB Cable into PC USB port

- Notification Lamp illuminates while charging.
- Notification Lamp goes out when battery is full. Remove Micro USB Cable and close Port Cover.

Charging Precautions

Handling Cords

Do not pull, bend, or twist cord.

Handling External Connector Port Cover

Remember these points:

- \cdot Close Port Cover firmly. Debris trapped between gasket and base may expose handset to liquid/dust.
- Do not try to close Port Cover with hinge extended; may deform Cover and affect water/dust resistance.

Important USB Charge Usage Note

Handset may power on automatically when connected to a PC via Micro USB Cable; avoid connection aboard aircraft or in hospitals, etc. where handset use is prohibited.

Handset Power On/Off

Power On

Long Press 😈 until SoftBank logo appears

- After Power On Graphics, Unlock window appears.
- When powering on for the first time, waterproofing/ dustproofing guidance appears. (Unlock window does not appear first.)

Drag 🌡 to 🖺

- Waterproofing/dustproofing guidance appears.
- 3

- Initial setup menu opens.
- · If handset is set to skip setup menu at Power on, Home Screen appears.

Power Off

也 (Long)

2

Power off

3

 $[\mathsf{OK}]$

🔀 Handset shuts down.

Using Touch Panel

Touch Display to navigate menus, open functions, scroll pages,

Tap

Tap item or key to open or execute corresponding function/ operation.

Long Touch

Touch item for 1+ seconds (handset vibrates) to move icon, open menu, etc.

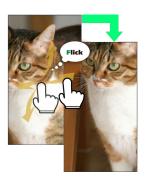

Drag

Drag item to move it.

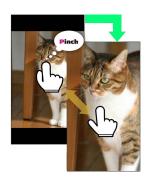

Swipe/Flick

Swipe or flick to toggle sheets, pages, etc.

Spread & Pinch

Spread or pinch to enlarge or reduce images, etc.

Calibrating Touch Panel

Calibrate Touch Panel to improve response. Hold handset normally during calibration.

- Download (update) starts.
- · If confirmation appears, follow onscreen instructions.

Purchased Applications

Payment

No additional payment required for re-downloads of uninstalled purchased applications.

Use on Other Android Devices

Install purchased applications on other Android devices free of charge by using the same Google Account used for the purchase.

Additional Operations

Refund Requests

Request refunds within designated period. Returned applications are deleted from handset; no payment is required. (One refund request per application.)

Enabling Automatic Updates

· Automatic update is not available for some applications.

Google Play Cautions

Application Installation Disclaimer

Download and install applications on this handset via Google Play (Developed by Google Inc.) at your own risk. SoftBank Mobile is not responsible for user installed application content (quality, reliability, legality, appropriateness, accuracy, etc.) or malfunctions installed applications may cause (due to viruses, etc.).

Application Purchase Disclaimer

SoftBank Mobile cannot be held liable for any damages to self or others that arise from purchase of applications.

Security Codes

Handset Code & Center Access Code

Center Access Code (Network Password; 4-digit code in contract) is required to use Optional Services via landlines or subscribe to fee-based information.

- Write down Handset Code and Center Access Code (Network Password). If you forget these codes, contact us for recovery. For details, contact SoftBank Customer Support, General Information.
- Do not reveal Handset Code or Center Access Code (Network Password). SoftBank Mobile is not liable for misuse or damages.
- Incoming/outgoing call restriction settings will be locked if incorrect Center Access Code (Network Password) is entered three times consecutively during the setting. To resolve, the code must be changed. For details, contact SoftBank Customer Support, General Information.
- · If you have previously changed Network Password on a SoftBank handset, enter the latest code to set incoming/outgoing call restrictions.

Saving Handset Code

Write down Handset Code.

1

In Home Screen, MENU → Settings → Location & security

2

3

Re-enter Handset Code → OK → OK

Handset Code is saved.

USIM PIN

 $9999\ \mbox{by default;}$ activate USIM card lock to restrict handset use.

Locking USIM Card

1

2

USIM card lock activates.

Changing PIN

Activate USIM card lock first.

2

PIN is changed.

Important

Entering incorrect PIN three consecutive times activates PIN Lock. To cancel, Personal Unblocking Key (PUK Code) is required; contact SoftBank Customer Support, General Information. Entering incorrect PUK Code ten consecutive times activates PUK Lock, disabling handset. For recovery, USIM Card must be reissued at a SoftBank Shop (fees apply).

Sleep Mode

Activating Sleep Mode

Display goes completely dark and Sleep mode activates after a period of inactivity.

Sleep mode prevents accidental Touch Panel operation.

· Press 😈 to activate Sleep mode anytime.

Canceling Sleep Mode

- Unlock window appears.
- · Alternatively, press 🚹 .

Drag 🌡 up

- Sleep mode is canceled.
- \cdot When Security Lock is active, unlock it as well.

Missed Calls & New Messages

Call/message icon appears in Unlock window. Drag icon up to cancel Sleep mode; corresponding menu/window opens.

Software Update

Updating Software

At specified time, handset automatically checks for/downloads firmware updates as required. Follow these steps to update firmware manually:

In Home Screen, MENU > Settings > About phone

Software update

instructions

Software update starts.

Before Software Update

Always back up important information. SoftBank Mobile cannot be held liable for damages from lost information,

Precautions

During Update

Handset is disabled until update is complete. Update may take some time.

Signal Conditions

To reduce failure risk, be sure signal is strong and stable, and charge battery adequately beforehand. Update failure may disable handset.

Placing/Answerin	g Calls42
Optional Services	543
Using Address Bo	ook48

Placing/Answering Calls

See below to dial directly or answer calls. (Handset does not support Video Call.)

Placing a Call

1

In Home Screen or Launcher, 📞 (Phone)

Call Window opens.

· When incoming/outgoing call history opens, tap Phone . If missed call window appears, press to return to Home Screen or Launcher and start over.

Use onscreen dialpad to enter number

· Include area code for landline numbers.

Call

Handset dials the number.

· Wait for other party to accept the call.

4

To end the call, End call

Call ends.

 After calls to/from unsaved numbers, Save to Address Book confirmation appears. Follow onscreen instructions.

Answering a Call

1

When a call arrives,

Call connects.

· Alternatively, in Sleep mode, drag right; out of Sleep mode, tap Answer .

To end the call, End call

Call ends.

 After calls to/from unsaved numbers, Save to Address Book confirmation appears. Follow onscreen instructions.

Emergency Location Report

Your location is automatically reported to the corresponding agency (police, etc.) when you place emergency calls (110, 119 or 118) with SoftBank 3G handsets.

- \cdot Registration/transmission fees do not apply.
- \cdot Positioning accuracy is affected by location/signal conditions. Always provide your location and purpose on the phone.
- · Location Information is not reported when emergency calls are placed without Caller ID (such as when the number is prefixed with 184). However, the corresponding agency may obtain your Location Information in a life threatening situation.
- · Location Information is not reported during Global Roaming.

Emergency Call Restriction

Emergency calls are restricted when Offline mode and USIM card lock are active. Long Press $\boxed{\textbf{0}}$ and cancel Offline mode, then restart handset.

Optional Services

Use these SoftBank Optional Services:

Optional Services

Service	Description
Call Forwarding	Divert all/all unanswered calls to a preset number
Voicemail	Divert all/unanswered calls to Voicemail Center; access messages via handset/ touchtone phones
Call Waiting ¹	Answer calls during a call
Group Calling ¹	Switch between open lines/connect multiple lines
Caller ID	Show or hide your number when placing calls
Call Barring	Restrict incoming/outgoing calls by conditions

1 A separate contract is required.

Initiating Call Forwarding

1

In Home Screen, MENU
Settings Call settings

Call settings opens.

2

Voicemail/divert

Voicemail/divert menu opens.

3

Settings/stop

Divert menu opens.

4

Always or No answer > Enter number

- · For No answer , tap Wait time and select ring time as needed.
- To cancel Call Forwarding, tap $Stop call forward \rightarrow Yes$.

5

OK

Call Forwarding activates.

Initiating Voicemail

1

In Home Screen, MENU → Settings → Call settings

Call settings opens.

2

Voicemail/divert

₩ Voicemail/divert menu opens.

3

[Settings/stop]

Divert menu opens.

4

- · For No answer , tap Wait time and select ring time as
- To cancel Voicemail, tap $[Stop\ call\ forward]
 ightarrow Yes$.

5

OK

Voicemail activates.

• When a new message is recorded, appears on Status Bar.

To play messages, tap Play voicemail in Voicemail/divert menu, then follow voice guidance.

Activating Call Waiting

A separate contract is required.

1

Call settings opens.

2

Other service settings

Other service settings opens.

- Call waiting activates.
- · During a call, a tone sounds for incoming calls; drag 💟 right.
- · To cancel Call Waiting, tap Call waiting .

Using Group Calling

A separate contract is required.

During a call, MENU

Add Call

Enter number 🔵 Call

3

When call connects, MENU → More → Merge calls

🏁 All lines connect to each other.

Using Caller ID

1

In Home Screen, MENU • Settings • Call settings

Call settings opens.

2

Other service settings

Other service settings opens.

3

Caller ID activates.

Using Call Barring

Restrict outgoing/incoming calls and SMS messages.

Restriction	Description
All outgoing calls	Restrict all non-emergency calls
Bar int'l call	Restrict all international calls
Local & home only	Restrict all international calls except calls to Japan
Restrict all incomings	Reject all calls
Bar if abroad	Reject calls while outside Japan

- \cdot Center Access Code (Network Password) is required to set incoming/outgoing call restrictions.
- Incoming/outgoing call restriction settings will be locked if incorrect Center Access Code (Network Password) is entered three times consecutively during the setting. To resolve, the code must be changed. For details, contact SoftBank Customer Support, General Information.
- If you have previously changed Network Password on a SoftBank handset, enter the latest code to set incoming/outgoing call restrictions.
- \cdot Failure message appears when attempting to place/send calls/SMS with corresponding restriction active. It may take longer to appear in some areas.

In Home Screen, MENU
Settings
Call settings

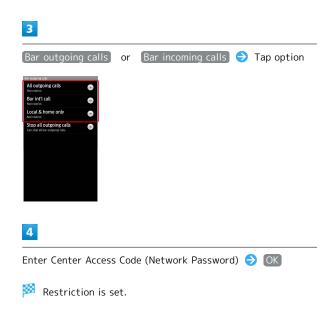

Call settings opens.

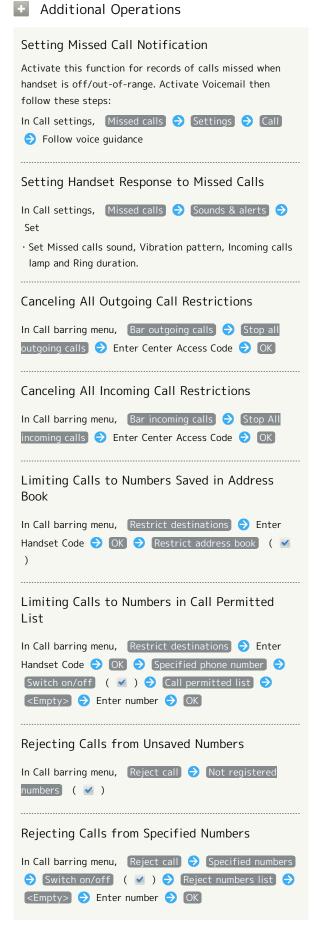

2

Call barring

Call barring menu opens.

Using Address Book

Save contacts including names, phone numbers, mail addresses, etc.

Adding Contacts

In Home Screen, ∰ → In Launcher (Basic functions), ■ (Address Book)

Address Book opens.

MENU

Add new entry

 \cdot If confirmation appears, follow onscreen instructions.

- Add contact window opens.
- \cdot If account selection window opens, tap an account.

Tap item 🔵 Complete entry

 Tap Next to move to other items. (Tap Done after mail address entry.)

Contact is saved.

Dialing via Address Book

In Home Screen, $ext{##} ext{ } ext$ (Address Book)

- 🟁 Address Book opens.
- \cdot If confirmation appears, follow onscreen instructions.

Tap tab 🔵 Tap contact

- Contact opens.
- \cdot Contacts are sorted by the first character in "Read last."

- Handset dials the number.
- Important Address Book Usage Note

If handset is left with no battery or an exhausted one, contacts may be altered/lost; handset damage may also affect information recovery. SoftBank Mobile is not liable for any resulting damages. Keep separate copies of contacts, etc.

Messaging & Browser

Maii Types	. 52

Handling S! Mail/SMS	56
Creating/Sending Gmail	.56
Opening Received Gmail	. 57
Using Email	.58
Browsing the Internet	.60

Mail Types

S! Mail

Exchange messages with S! Mail-compatible SoftBank handsets and e-mail compatible devices (other mobiles, PCs, etc.) beyond SMS character entry limit; attach media files, etc.

SMS

Exchange short messages with mobiles.

Gmail

Google webmail service; synchronize Gmail between handset and Google server automatically.

Email

Exchange Email (POP3/IMAP4) messages on handset.

- \cdot Set up an account to use Email.
- Upon Email message retrieval, accounts are synchronized between handset and source mail server; messages are also accessible from PCs.

Sending S! Mail/SMS

Sending S! Mail

Follow these steps to send S! Mail to a number/address saved in Address Book:

In Home Screen or Launcher, [a] (Mail)

- Folder list appears.
- 2

(Create

- S! Mail Composition window opens.
- 3

- Address Book opens.
- 4

Tap tab 🔵 Tap contact

- Contact opens.
- \cdot Contacts are sorted by the first character in "Read last."

5

Tap mail address (or number)

6

Enter subject \Rightarrow Next \Rightarrow Enter message

7

[Send]

S! Mail is sent.

· Handset saves failed S! Mail messages to Unsent Folder; automatically attempts redelivery up to two times.

Sending SMS

Follow these steps to send SMS via sent/received mail records:

In Home Screen or Launcher, 🗐 (Mail)

Folder list appears.

SMS Composition window opens.

Enter message
Send

· Handset saves failed SMS messages to Unsent Folder; automatically attempts redelivery up to two times.

Saving without Sending

Important S! Mail/SMS Transmission Note

If Outbox is full, handset automatically deletes sent messages, unprotected ones first.

Receiving & Replying S! Mail/SMS

Handset receives S! Mail/SMS messages automatically; set message retrieval to manual or retrieve Server Mail as needed.

Opening New Messages

When message arrives, ringtone sounds and 🚇 appears on Status Bar

- appears in Unlock window. Drag to cancel Sleep mode; message list (Inbox) or message window opens. In message list (Inbox), select a message.
- · Unread message count (①) appears above application icon.

Tap Status Bar 🔵 Tap message notification

- Message window opens.
- · For multiple new messages, message list (Inbox) appears; select one.

Replying to Messages

To reply from message window, skip ahead to 3 .

In Home Screen or Launcher, 🚊 (Mail)

Folder list appears.

2

Tap folder in Inbox 🔵 Tap message

Message window opens.

3

 Reply to all appears for messages addressed to multiple recipients.

4

Enter message 🗦 Send

Message is sent.

Retrieving Complete Messages

In message window, Receive

· Tap 🖦 to select item to retrieve.

Important Message Retrieval Notes

Retrieval System

By default, complete message including attachments is retrieved; transmission fees may apply depending on subscribed price plan.

Automatic Message Deletion

If Inbox is full, handset automatically deletes oldest received messages, opened/unprotected ones first. If all messages are unopened, handset automatically deletes oldest unprotected ones first.

Retrieval Outside Japan

Message retrieval outside Japan may incur high charges.

Handling S! Mail/SMS

Opening Messages

Follow these steps to open received messages:

In Home Screen or Launcher, 🗐 (Mail)

Folder list appears.

2

Tap folder in Inbox

Message list appears.

· Flick left/right to switch message lists.

Tap message

Message window opens.

· Tap \ll or \gg to open other messages.

Creating/Sending Gmail

Use Google webmail service. Sign in to a Google Account beforehand.

Creating/Sending Messages

Specifications

Handset

Item	Description	
Weight	106 g (137 g with battery)¹	
Continuous	3G: 450 minutes¹	
Talk Time ²	GSM: 380 minutes ¹	
Continuous Standby	3G: 420 hours ¹	
Time ³	GSM: 390 hours ¹	
Continuous		
One Seg	4.5 hours ¹	
Reception		
Time ⁴		
Charging	240 minutes¹	
Time ⁵		
Size	65 x 128 x 9.8 mm (without protruding	
	parts) ¹	
Maximum	3G: 0.25 W	
Output	GSM: 2.0 W	

- 1 Approximate value.
- 2 Continuous Talk Time is an average measured with a new, fully charged battery, in strong signal conditions without moving handset.
- 3 Continuous Standby Time is an average measured with a new, fully charged battery, without calls or operations, in strong signal conditions without moving handset. The value is calculated with Data transmission and Urgent News disabled. Standby Time may vary with environment (e.g., battery strength, ambient temperature), settings, etc.
- 4 Continuous One Seg Reception Time is measured with a new, fully charged battery, with AV mode set to OFF, Eco Backlight Control enabled, Sound setting set to OFF and Smooth mode set to ON, using Headphones with Microphone (sold separately), until battery runs low (10% of capacity).
- 5 Charging Time is measured with Power off using AC Charger.
- · Talk Time, Standby Time and One Seg Reception Time when Eco Backlight Control is enabled and Brightness (Display settings) is set to approximately half of maximum (11 of 21).
- Talk Time/Standby Time/One Seg Reception Time may vary with location, status, settings, etc.
- \cdot Display employs precision technology, however, some pixels may remain on/off.

Battery

Item	Description		
Voltage	3.7V		
Battery Type	Lithium-ion		
Capacity	1,520 mAh		
Size (W x H x D)	$45.0 \times 57.0 \times 5.4 \text{ mm}$ (without protruding parts) ¹		
Materials/ Finishing	PC and PA resin/Gold plating		

1 Approximate value.

Desktop Holder

Item	Description
Input Voltage/ Current	DC 5.4V/700 mA
Output Voltage/ Current	DC 5.4V/700 mA
Charging Temperature	5°C to 35°C
Size (W x H x D)	145 x 38 x 50 mm ¹
Materials/ Finishing	ABS resin/Gold plating

1 Approximate value.

Customer Service

For information about SoftBank handsets or services, contact us at the following numbers.

SoftBank Customer Support

From a SoftBank handset, dial toll free at 157
From a landline/IP phone, dial toll free at 0800-919-0157

Customer Assistance (Repairs/Lost Handsets)

From a SoftBank handset, dial toll free at 113
From a landline/IP phone, dial toll free at 0800-919-0113
If you cannot reach a toll free number, use the number
(charges apply) below for your service area:

Safety Precautions

Read Safety Precautions before using handset.

Observe precautions to avoid injury to self or others, or damage to property.

SoftBank Mobile is not liable for any damages resulting from use of this product.

Safety Precautions

These labels show degree of risk from improper use; learn them before reading on:

Label	Description
<u></u> ∆ DANGER	Great risk of death or serious injury
⚠ WARNING	Risk of death or serious injury
 ∴ CAUTION	Risk of minor injury or damage to property

These symbols signify prohibited/compulsory actions; learn them before reading on:

Symbol	Description
Prohibited	Prohibited actions
Do Not Disassemble	Disassembly prohibited
Avoid Liquids Or Moisture	Exposure to liquids prohibited
Do Not Use Wet Hands	Use with wet hands prohibited
Compulsory	Compulsory actions
Disconnect Power Source	Unplug from outlet

Handset, Battery, USIM Card, Desktop Holder, Micro USB Cable, Micro USB Charging Adapter, AC Charger (Sold Separately) & SD Card

Use specified battery, Desktop Holder, Micro USB Cable, Micro USB Charging Adapter and Charger only.

Non-specified equipment use may cause battery to leak, overheat, burst or ignite, and may cause Charger to overheat, ignite, malfunction, etc.

Do not disassemble, modify or solder handset or related hardware.

May cause fire, injury, electric shock or malfunction. Battery may leak, overheat, burst or ignite. Modifying handsets is prohibited by the Radio Law and subject to a penalty.

Do not expose internal handset parts, battery, Desktop Holder or Charger to liquids.

Do not let exposed internal parts remain wet; do not charge wet battery. May cause overheating, electric shock, fire, injury or malfunction. Use only as directed.

Do not charge battery in or expose handset or related hardware to extreme heat (fire, heat sources, direct sunlight, inside vehicles, etc.). Do not charge, leave, use, or be carrying handset or related hardware in a warm place or where heat collects, such as under a kotatsu (blanketed warming table) or electric blanket, next to a kairo (worn warming patch), etc.

May cause warping/malfunction; battery may leak, overheat, ignite or burst. Handset or related hardware may become hot to the touch, leading to burn injuries, etc.

Do not force battery/Charger into handset. Confirm terminal/connector orientation; retry.

Battery may leak, overheat, burst, ignite, etc.

MARNING

Do not place handset, battery, Desktop Holder or Charger in/on ovens, microwave ovens, pressure cookers, induction stoves or other cooking appliances.

Battery may leak, overheat, burst or ignite. Handset/ Charger may overheat, emit smoke, ignite, malfunction, etc.

Keep handset off and Charger disconnected near gas stations or places with fire/explosion risk.

Handset use near petrochemicals or other flammables may cause fire/explosion; power off before using Osaifu-Keitai® at gas stations (cancel Osaifu-Keitai Lock beforehand).

Do not drop/throw or apply strong impacts.

Battery may leak, overheat, burst or ignite, resulting in fire, electric shock, malfunction, etc.

For unusual sound/odor, smoke or other abnormality:

Continued use may cause fire, electric shock, etc.; grasp plug to disconnect Charger, power off, then remove battery, being careful not to burn or injure yourself.

Keep liquid (water, pet urine, etc.) or conductive material (pencil lead, metal strip/ jewelry, etc.) away from charging terminals or External Connector Port.

May cause short circuit, resulting in fire, malfunction, etc.

Do not charge battery while handset is wet.

May cause electric shock or short circuit, resulting in fire, malfunction, etc.

Do not expose handset or related hardware to hot air from dryers, etc. to dry them or for other purposes. Avoid saunas or hot water.

Battery may leak, overheat, burst or ignite. Handset, Desktop Holder or Charger may overheat, emit smoke, ignite, malfunction, etc.

A CAUTION

Do not place handset or related hardware on unstable surfaces.

Handset or related hardware may fall, resulting in injury, malfunction, etc.; take added care when Vibration is set or while charging.

Keep handset and related hardware out of infants' reach.

Infants may choke from swallowing handset or related hardware or be injured, etc.

For use of handset/related hardware by child, explain instructions and supervise use.

Misuse may cause injury, etc.

Battery

⚠ DANGER

Read battery label to confirm battery type; use/dispose of battery accordingly.

Symbol on Label

Battery Type

Li-ion00

Lithium-ion

Do not dispose of battery in fire.

Battery may leak, burst, ignite, etc.

Do not damage (nail, hammer, stomp, etc.) battery or subject it to strong impacts.

Battery may leak, overheat, burst, ignite, etc.

Keep wire or other metal objects away from battery terminals. Do not carry/store battery with conductive material (pencil lead, metal strip/jewelry, etc.).

Battery may leak, overheat, burst, ignite, etc.

If battery fluid gets in eyes, do not rub; rinse with water and consult a doctor immediately.

Eyes may be severely damaged.

MARNING

If battery fluid contacts skin or clothes, discontinue handset use and rinse with clean water immediately.

May cause skin damage.

If battery does not charge properly, stop trying.

Battery may leak, overheat, burst, ignite, etc.

For abnormal odor, excessive heat, discoloration or distortion, remove battery, being careful not to burn or injure yourself. Avoid fire sources.

Continued use may cause battery to leak, overheat, burst, ignite, etc.

Keep battery away from pets.

Pet bites may cause battery to leak, burst, overheat, ignite, etc.

⚠ CAUTION

Do not dispose of an exhausted battery with ordinary refuse.

Tape over battery terminals before disposal. Take battery to a SoftBank Shop, or follow the local disposal regulations.

Handset

⚠ WARNING

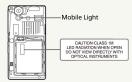

Do not shine Mobile Light in eyes.

May temporarily affect eyesight or startle, leading to accidents.

CAUTION:

Use of controls, adjustments or performance of procedure other than those specified herein may result in hazardous radiation exposure. As the emission level from Mobile Light LED used in this product is harmful to the eyes, do not attempt to disassemble the cabinet. Service is limited to authorized service centers only.

- ■Mobile Light LED Properties
- a) Emission Duration: Continuous
- b) Wavelength

White: 400 - 700 nm

Red: 600 - 670 nm (center wavelength: 631 nm)

c) Maximum Emission Output

White: 400 µW (1.2 mW inside handset) Red: 190 µW (890 µW inside handset)

Do not use handset while driving or cycling.

Accidents may result. Phone use while driving or cycling is prohibited by law and subject to a penalty; park legally beforehand.

Power off near electronic devices that employ high precision control systems or weak signals.

May cause electronic malfunctions, etc. Take added care near these devices: Hearing aids, implanted pacemakers/ defibrillators and other electronic medical equipment; fire alarms, automatic doors and other automatic control devices.

Power off before boarding aircraft to avoid possible radio wave interference with aircraft operations.

If mobile phone use is allowed on board, follow airline or cabin crew instructions regarding handset use.

Users with a heart condition should adjust ringtone Vibration and Volume as needed.

May cause heart damage.

If thunder is audible while outdoors, power off; find cover.

There is a risk of lightning strike or electric shock.

Do not look into Infrared Port during infrared transmissions.

Eyesight may be affected.

A CAUTION

Do not use handset when it may affect a vehicle's electronic equipment.

Handset use inside vehicles may cause electronic equipment to malfunction, resulting in accidents.

For any skin irritation associated with use, discontinue use and consult a doctor.

Metal and other materials may cause skin irritation, rashes, or itchiness depending on your physical condition.

Keep handset away from magnetic cards, etc.

Data on bank cards, credit cards, telephone cards, floppy disks, etc. may be lost.

Do not swing handset by strap or TV Antenna.

May harm self or others; strap may break, resulting in injury or handset malfunction/breakage.

Handset may become hot while in use, especially at high temperature.

Prolonged contact with skin may cause burn injuries.

Always maintain some distance from Speaker while ringtones, music or other handset sounds play.

Excessive volume may damage ears or hearing.

Watch One Seg from a distance in good light.

Watching in poor light or too close may affect eyesight.

Moderate handset volume when using Headphones.

Excessive volume may damage ears or hearing.

Desktop Holder & AC Charger (Sold Separately)

M WARNING

Do not cover/wrap Charger/Desktop Holder while charging.

Charger/Desktop Holder may overheat, resulting in fire, malfunction, etc.

Use only the specified voltage.

Non-specified voltages may cause fire, malfunction, etc.

- · AC Charger: AC 100V-240V Input
- \cdot In-Car Charger (use in negative earth vehicles only): DC 12V/24V Input

Do not use power adapters. Transformer use may cause fire, electric shock or malfunction.

Unplug Charger for periods of disuse; grasp plug to disconnect.

May cause electric shock, fire or malfunction.

If liquid (water, pet urine, etc.) gets inside, grasp plug to disconnect it immediately.

May cause electric shock, smoke or fire.

To remove debris, grasp plug to disconnect Charger, then clean with dry cloth.

Fire may result.

Plug Charger firmly into the outlet, keeping plug and Charger/Desktop Holder charging terminals away from conductive material (pencil lead, metal strip/jewelry, etc.).

May cause electric shock, short circuit, fire, etc.

Do not touch plug with wet hands.

May cause electric shock, malfunction, etc.

Do not touch Charger if thunder is audible.

May cause electric shock, etc.

Do not use Desktop Holder inside vehicles.

Extreme temperature or vibration may cause fire or damage handset, etc.

Do not expose Desktop Holder or Charger to moisture (precipitation, bath/shower, etc.).

May cause fire, electric shock or malfunction.

Do not use In-Car Charger in positive earth vehicles.

May cause fire, etc. Use in negative earth vehicles only.

Use only the specified fuse for In-Car Charger.

Non-specified fuse may cause fire or malfunction. See In-Car Charger manual for details.

⚠ CAUTION

Grasp plug to disconnect Charger before cleaning.

May cause electric shock, etc.

Always grasp plug (not cord) to disconnect Charger.

Pulling plug by cord may damage cord; cause electric shock, fire, etc.

Do not subject Charger to strong impacts while it is plugged in.

May cause malfunction or injury.

Do not touch charging terminals of Desktop Holder while it is connected to the outlet.

May cause burn injuries.

Micro USB Cable & Micro USB Charging Adapter

⚠ CAUTION

For any skin irritation associated with use, discontinue use and consult a doctor.

Metal and other materials may cause skin irritation, rashes, or itchiness depending on your physical condition.

Handset Use & Electronic Medical Equipment

This section is based on "Guidelines on the Use of Radio Communications Equipment such as Cellular Telephones and Safeguards for Electronic Medical Equipment" (Electromagnetic Compatibility Conference, April 1997) and "Report of Investigation of the Effects of Radio Waves on Medical Equipment, etc." (Association of Radio Industries and Businesses, March 2001).

♠ WARNING

Persons with implanted pacemaker/defibrillator should keep handset more than 22 cm away.

Radio waves may interfere with implanted pacemakers or defibrillators.

If you intend to use electronic medical equipment other than implanted pacemaker/ defibrillator outside medical facilities, consult the vendor on radio wave effects.

Radio waves may interfere with electronic medical equipment.

Power off in crowds or trains where persons with implanted pacemaker/defibrillator may be near.

Radio waves may interfere with implanted pacemakers or defibrillators causing such devices to malfunction.

Observe these rules inside medical facilities to avoid effects of radio waves on electronic medical equipment:

- Do not enter an operating room or an Intensive or Coronary Care Unit while carrying a handset.
- · Keep handset off in hospitals.
- Even in lobbies or other places where handset use is permitted, keep handset off near electronic medical equipment.
- · Obey medical facility rules on mobile phone use.

3D Images

♠ CAUTION

Users with a history of photosensitivity, a heart condition or sleep loss/fatigue, under the influence of alcohol, or in poor physical condition for other reasons, should avoid viewing 3D images.

May worsen the condition.

Stop viewing 3D images if they appear blurry or three-dimensional space is hard to perceive.

Continued use may cause eye strain.

Stop viewing 3D images if you experience fatigue or discomfort (motion sickness or other similar symptoms).

May affect physical condition; rest as needed. Take added care aboard trains or in vehicles where Display tends to shake.

3D image viewing is suitable for ages seven or over.

Children may not show clear signs of fatigue or discomfort; may suddenly become sick while viewing 3D images. Supervise use and watch for signs of eye strain.

Rest your eyes after approximately 30 minutes of 3D image viewing.

Prolonged viewing may cause eye strain.

Look straight into Display when viewing 3D images.

Viewing from an angle may cause eye strain. Hold handset in front and keep it approximately 27 cm away from face; images appear with an illusion of depth.

Important Product Information

General Use

- If your USIM Card or handset (with USIM Card inserted) is lost or stolen, suspend your service immediately. For details, contact SoftBank Customer Support, General Information.
- · SoftBank Mobile is not liable for any damages resulting from accidental loss/alteration of handset/SD Card files or settings. Keep separate copies of contacts, etc.
- · Handset transmissions/One Seg reception may be disrupted inside buildings, tunnels or underground, or when moving into/out of such places.
- · Use handset without disturbing others.
- Handsets are radios as stipulated by the Radio Law. Under the Radio Law, handsets must be submitted for inspection upon request.
- Handset use near landlines, TVs or radios may cause interference.
- · Beware of eavesdropping.
- Because this service is completely digital, the possibility of signal interception is greatly reduced. However, some transmissions may be overheard.

Eavesdropping

- Deliberate/accidental interception of communications constitutes eavesdropping.
- · Beware of harmful/malicious websites. Take added care when posting personal information, etc.
- An export license may be required to carry handset into other countries if it is to be used by or transferred to another person. However, no such license is required when you take handset abroad for personal use on a vacation or business trip and then bring it back. Export control regulations in the United States provide that an export license granted by the US government is required to carry handset into Cuba, Iran, North Korea, Sudan or Syria.

Heat from Handset Use

- · Handset internal temperature may increase depending on usage or environment; cause housing to heat up. (Handset may stop charging or adjust Display brightness for safety.) After a period of handset use under such condition, warning appears and handset shuts down after approximately three minutes. To lower internal temperature and prevent automatic shutdown, close all applications and activate Sleep mode.
- After a period of Camera use at high internal temperature, warning appears and handset automatically shuts down after approximately one minute. (Captured photo/recorded video is saved.)

Camera

- · Mind your manners when using Camera.
- · Test Camera before capturing/recording special moments.
- Do not use Camera in places where photography or videography is prohibited.
- · Captured images may not be used/transferred without copyright holder (photographer, etc.) permission, except for personal use.

3D Conversion

Images (shot with Camera or obtained from other sources) whose copyright belongs to others are limited to private use only even after converting to 3D on handset. Use of such images beyond this limit may constitute copyright infringement.

3D Image Viewing

- · Perception of 3D effects varies from person to person.
- · Keep Display parallel to your eyes while viewing 3D images.

In-Call/Transmission Cautions

- During calls/transmissions, calling/transmission charges/ fees apply even if other functions or operations are simultaneously in use.
- \cdot Transmissions involving JavaScript or Flash® may incur high charges.

Urgent News (Application)

- · By default, handset receives earthquake alerts (Urgent News Incoming Setting is active).
- · Alert tones sound even in Manner mode.
- \cdot Alerts are not received during calls/transmissions or in poor signal conditions.
- Depending on usage/situation, handset may receive alerts for other areas or no alerts.
- Standby Time may decrease when Urgent News Incoming Setting is active.
- SoftBank Mobile cannot be held liable for any damages associated with this service, including accidents resulting from received information, reception timing or reception failure.

Wi-Fi (Wireless LAN)

Wireless LAN (hereafter "Wi-Fi") uses radio waves to enable communication between compatible devices, thus allowing connection to a local area network from anywhere within the range. However, there is a risk of data interception unless security is established. It is advisable for the user to configure security settings on their own responsibility before using Wi-Fi.

- Do not use Wi-Fi near electrical appliances, audiovisual equipment or office automation equipment; may affect Wi-Fi transmission speed, availability, clarity, etc. (There is a possibility of interference especially when a microwave oven is in use.)
- The target access point may not be detected correctly if there are multiple access points nearby.

■ Precautions

The frequency band utilized by handset Wi-Fi is shared with industrial, scientific or medical equipment, including household microwave ovens, etc., and used by radio stations, amateur radio stations, etc. (hereafter "other radio stations").

- 1 Before using Wi-Fi, visually confirm that no other radio stations sharing the same frequency band are in use nearby.
- 2 Should interference occur between handset and other radio stations, move or disable Wi-Fi immediately.
- 3 For additional information and support, contact SoftBank Customer Support, General Information: From a SoftBank handset, call toll free at 157. To call toll free from a landline/IP phone, see "Customer Service."

Frequency Band

This radio station utilizes 2.4 GHz band with DSSS-OFDM modulation. Maximum transmission radius is 40 meters (131 feet).

■Simultaneous Use with Bluetooth®

Wi-Fi (IEEE 802.11b/g/n) and Bluetooth® transmit on the 2.4 GHz band. Enabling handset Bluetooth® or using Bluetooth® devices near handset may affect Wi-Fi transmission speed, availability and clarity. Should interference occur, cancel handset Bluetooth® or discontinue Bluetooth® device use.

- · Handset supports Wi-Fi channels 1 13. Handset will not connect to access points set to other channels.
- · Available channels vary by country.
- For use of Wi-Fi aboard aircraft, check with airline heforehand.
- In some countries/regions, such as France, there are restrictions on the use of Wi-Fi. If you intend to use Wi-Fi on handset abroad, confirm the local laws and regulations beforehand.

Bluetooth® Function

SoftBank Mobile is not liable for any damages resulting from data/information leakage due to use of handset Bluetooth® function.

■Precautions

The frequency band utilized by handset Bluetooth® function is shared with industrial, scientific or medical equipment, including household microwave ovens, etc., and used by radio stations, amateur radio stations, etc. (hereafter "other radio stations").

- 1 Before using Bluetooth®, visually confirm that no other radio stations sharing the same frequency band are in use nearby.
- 2 Should interference occur between handset and other radio stations, move or cancel Bluetooth® function immediately.
 3 For additional information and support, contact SoftBank Customer Support, General Information: From a SoftBank handset, call toll free at 157. To call toll free from a landline/IP phone, see "Customer Service."

Frequency Band

This radio station utilizes 2.4 GHz band with FHSS modulation. Maximum transmission radius is 10 meters (32 feet). It is not possible for the radio station to avoid using the frequency band of the mobile unit identification apparatus.

Handset & Hardware Care

Handset & Hardware Care

- · If handset is left with no battery or an exhausted one, data may be altered/lost. SoftBank Mobile is not liable for any resulting damages.
- · Use handset within 5°C 35°C (up to 40°C for brief periods in bath/shower rooms, etc.) and 35% - 90% humidity.
- · Avoid extreme temperature or direct sunlight.
- · Handset/battery may warm during operation or while charging. This is normal.
- · Warranty does not cover malfunctions resulting from misuse.
- · Exposing lens to direct sunlight may damage color filter and affect image color.
- · Battery may not charge properly if port/terminals are obstructed by dust, etc. Clean with dry cloth, cotton swab,
- · Clean handset with soft dry cloth. Alcohol/solvent use may fade color/label.
- · Avoid scratching Display.
- · Avoid heavy objects or excessive pressure. May cause malfunction or injury.
 - \cdot Do not sit on handset in back pants pocket.
- · Do not place heavy objects on handset inside handbags, packs, etc.
- · Connect only specified products to Port. Other devices may malfunction or cause damage.
- · Always power off before removing battery. If battery is removed while saving data or sending mail, data may be lost, changed or destroyed.
- · Do not power off while using SD Card; may result in data loss or malfunction.
- · When walking outside, moderate handset volume to avoid
- · Avoid covering Speaker while using handset.

Touch Panel

- · Touch Panel may not respond in these situations:
 - · Use with gloves/long fingernails
 - · Use of pens, pencils or sharp objects
 - · Use with objects on/against Display
- · To prevent malfunctions, do not:
 - · Touch Display with wet fingers
- · Use if Display is wet
- · Subject Display to force/pressure
- · Place labels or stickers over Display
- · If Display is wet, wipe it with soft cloth.
- · To improve response, calibrate Touch Panel as follows:

- · Press 🛈 to activate Sleep mode, then press 🛈 again to cancel it when:
 - · Handset operates automatically without touch input
 - · Handset does not respond to touch input

Headphones

Headphones with Microphone (SHLDL1) is available for separate purchase. Other headphone mics may not function properly on handset.

· Do not subject Headphone Jack to strong impacts while using Headphones with Microphone; water/dust resistance may be affected.

TV Antenna (Retractable)

Pull Antenna by top part fully. After use, gently retract Antenna aligning top and bottom parts. Do not carry handset with Antenna extended; damage may result.

USIM Tray

Do not apply excessive force to USIM Tray; may result in breakage.

- · Remember these points when inserting/removing USIM Card:
 - · Pull out USIM Tray slowly and gently
 - · Insert USIM Card with IC Chip up
- · After inserting USIM Card, push in USIM Tray until it stops
- \cdot When removing USIM Card, slide it out of USIM Tray

Attaching Straps

Removing Battery Cover may make it easier to attach straps.

When Handset Freezes

If handset has stopped processing or won't respond to touch/ key press, restart it as follows:

Remove battery 🔷 Wait a few seconds 会 Install battery **♦ ७** (Long)

Resetting Handset

Reset all deletes all handset files irreversibly. (Some preinstalled applications are also deleted.) To delete all SD tapping [Reset phone].

Handset Code → OK → Reset phone → Erase

everything

Picasa™ Web Albums Synchronization

Save a Google™ Account associated with Picasa Web Albums to handset. If you save a Google Account to handset then create a Picasa Web Albums account with that Google Account, corresponding Picasa Web Albums is unsynchronizable on handset.

Extending Battery Time

- · If confirmation appears, follow onscreen instructions.
- · Use three modes (Normal , Waza-ari and Emergency) as needed.
- · For Waza-ari and Emergency , some functions/settings are limited or disabled. Emergency minimizes Brightness and disables Wi-Fi, GPS and some other transmissions.
- Tap Edit or Check to change/check settings of each mode. To apply changes, return to Energy save menu and tap corresponding mode.
- Energy save stndby disables some applications that run in the background when Sleep mode is active. (Some applications may not run properly when Sleep mode is active.) Follow these steps to specify applications to disable/enable:
- ② (next to Energy save stndby) → Advanced
 → w or ✓ (applications with ✓ remain active)
- · Some applications that establish periodic network connections do not start communication after switching back to Normal from Waza-ari or Emergency . In this case, Long Press (), then restart handset.

General Notes

Portrait Rights

Portrait rights protect individuals' right to refuse to be photographed or to refuse unauthorized publication/use of their photographs. Portrait rights consist of the right to privacy, which is applicable to all persons, and the right to publicity, which protects the interests of celebrities. Therefore, photographing others including celebrities and publicizing/distributing their photographs without permission is illegal; use Camera responsively.

Copyrights

Copyright laws protect sounds, images, computer programs, databases, other materials and copyright holders. Duplicated material is limited to private use only. Use of materials beyond this limit or without copyright holder permission may constitute copyright infringement, and be subject to criminal punishment. Comply with copyright laws when using images captured with Camera.

Some applications are not installed on SoftBank 102SH/102SHII.

The software contained in handset is copyrighted material; copyright, moral right and other related rights are protected by copyright laws. Do not copy, modify, alter, disassemble, decompile or reverse-engineer the software; do not separate it from hardware in whole or part.

Open Source Software

 Handset contains software based on GNU General Public License (GPL), GNU Lesser General Public License (LGPL), and other licenses.

To confirm details of relevant software licenses:

 The source code of software based on GPL, LGPL, and Mozilla Public License (MPL) is provided on the following website free of charge.

https://sh-dev.sharp.co.jp/android/modules/oss/ (Japanese)

Electromagnetic Waves

For body-worn operation, this phone has been tested and meets RF exposure guidelines when used with accessories containing no metal, that position handset a minimum of 15 mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

CE Declaration of Conformity

In some countries/regions, such as France, there are restrictions on the use of Wi-Fi. If you intend to use Wi-Fi on the handset abroad, confirm the local laws and regulations beforehand.

Hereby, Sharp Telecommunications of Europe Ltd, declares that 102SH/102SHII is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

A copy of the original declaration of conformity for each model can be found at the following Internet address: http://www.sharp.co.jp/k-tai/

C € 0168①

Battery Cautions

Use specified battery or Charger only.

Non-specified equipment use may cause malfunctions, electric shock or fire due to battery leakage, overheating or bursting. Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take battery to a SoftBank Shop, or follow the local disposal regulations.

Charge battery in ambient temperature $5 \circ C - 35 \circ C$; battery may leak/overheat and performance may deteriorate outside this range.

European RF Exposure Information

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health. The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for 102SH and 102SHII when tested at the ear was 0.486 W/kg*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this use guide**. In this case, the highest tested SAR value is 0.467 W/kg. As SAR is measured utilizing the device's highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the Network. The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a handsfree device to keep the mobile phone away from the head and body. *The tests are carried out in accordance with international

guidelines for testing.

**Please see "Electromagnetic Waves" for important notes regarding body-worn operation.

Headphone Signal Level

The maximum output voltage for the music player function, measured in accordance with EN 50332-2, is 17.0 mV.

FCC Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

FCC Information to User

This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient/relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio/TV technician for help.

FCC RF Exposure Information

Your handset is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg.

The tests are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC for each model.

The highest SAR value for 102SH and 102SHII as reported to the FCC when tested for use at the ear is 0.315 W/kg, and when worn on the body in a holder or carry case, is 0.576 W/kg.

This device was tested for typical body-worn operations with the back of the handset kept 1.0 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.0 cm separation distance between the user's body and the back of the handset. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

The FCC has granted an Equipment Authorization for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file with the FCC and can be found at http://www.fcc.gov/oet/fccid under the Display Grant section after searching the corresponding FCC ID (APYHRO00157).

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Website at http://www.ctia.org.

Specific Absorption Rate (SAR)

Specific Absorption Rate (SAR)

SoftBank 102SH and 102SHI meet the government's requirements for exposure to radio waves.

These requirements are based on scientific basis to assure that radio waves emitted from mobile phones and other handheld wireless devices do not affect human health. They require that the Specific Absorption Rate (SAR), which is the unit of measurement for the amount of radiofrequency absorbed by the body, shall not exceed 2 W/kg*. This limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age or health, and meets the international standard set by International Commission on Non-Ionizing Radiation Protection (ICNIRP) in cooperation with World Health Organization (WHO).

The highest SAR value is 0.449 W/kg for SoftBank 102SH, and 0.456 W/kg for SoftBank 102SHI. SAR tests were conducted with handset transmitting at its highest certified power level in accordance with testing methods set by the government. While there may be differences between the SAR levels for various handsets, they all meet the governmental requirements for safe exposure. The actual SAR level of the handset while operating can be well below the highest value.

This is because the handset is designed to operate at multiple power levels so as to use only the power required to reach the Network.

Additional information on SAR can be obtained on the following Websites.

Ministry of Internal Affairs and Communications (MIC) http://www.tele.soumu.go.jp/e/sys/ele/index.htm Association of Radio Industries and Businesses (ARIB) http://www.arib-emf.org/ (Japanese)

*Requirements are stipulated in Radio Law (Ordinance Regulating Radio Equipment, Article 14-2).

Water & Dust Resistance

Water & Dust Resistance

Handset complies with IPX5 (former JIS protection level 5)¹ and IPX7 (former JIS protection level 7)² water protection standards as well as IP5X (JIS protection level 5)³ dust protection standard, with Port Cover and Battery Cover closed firmly.

¹IPX5 compliant means that a handset continues to function as a phone after being subjected to a water jet (approximately 12.5 liters/min.) discharged from a nozzle (inner diameter: 6.3 mm), from all directions (approximately 3 m from handset) for at least 3 minutes.

 2 IPX7 compliant means that a handset continues to function as a phone after being gently submerged to the depth of 1 m in still tap water at room temperature, left there for approximately 30 minutes, then removed from it. 3 IP5X compliant means that a handset continues to function as a phone and its safety is maintained after being agitated in a device containing dust of 75 μm or smaller in diameter for 8

 Water/dust resistance may be affected under some circumstances. Warranty does not cover malfunctions resulting from misuse.

hours, then removed from the device.

· Handset is compliant with IPX5, IPX7 and IP5X water/dust protection standards. However, ingress of dirt, sand, mud, metal powder, food, beverage, etc. may cause malfunction.

■Important Notes

- · Close Battery Cover and Port Cover firmly. Debris (hair, sand, fibers, etc.) trapped between gasket and base may expose handset to liquid/dust.
- · If Battery/Port Cover is left open liquid exposure may cause handset malfunction/electric shock. Power off, then remove battery.
- · If handset is wet, wipe it with dry cloth.
- Do not open/close Battery/Port Cover with wet hands or while handset is wet.
- Do not use Headphones while Headphone Jack is wet or obstructed by sand/dirt; water/dust resistance may be affected causing malfunction.
- Handset is only water resistant against fresh/tap water between 5°C - 35°C.

■Dust Resistance

- · Handset complies with IP5X dust protection standard. However, dust resistance may not be guaranteed under some circumstances (placing handset directly on sand, etc.).
- \cdot Remove dust from handset completely before use by rinsing off with water, etc.
- · Any residue may damage Display; cause serious malfunction.

Precautions

- Do not subject handset to soap, detergent, bath powder/oil, sea/pool/spa water, hot water, etc.
- · Rinse off sea/pool water, beverage, dirt, sand, mud, etc. immediately; residue may cause malfunction if allowed to dry.
- \cdot Rinse off sand, dirt, etc. completely before use; any residue may damage handset causing malfunction.
- Do not soak handset in bath or pool; never use it in water (including opening/closing of handset and pressing keys).
- Handset is not resistant to water pressure. Avoid highpressure water/shower (over 6 liters/min.) or water immersion.
- Do not expose handset to extreme humidity for long periods; avoid prolonged use in bath/shower rooms.
- · Do not use in saunas. Avoid hot air from dryers, etc.
- · Use handset within $5 \, ^{\circ}\text{C}$ $35 \, ^{\circ}\text{C}$ (up to $40 \, ^{\circ}\text{C}$ for brief periods in bath/shower rooms, etc.) and 35% 90% humidity.
- · Avoid extreme temperature (near stoves, inside refrigerators, etc.).
- · Volume may be low when Microphone/Earpiece/Speaker is wet; dry handset before use (see "Drying Handset").
- Battery, Desktop Holder and optional accessories are not water or dustproofed.
- Do not subject handset to strong impacts; do not poke Microphone, Earpiece, Speaker, Camera Ornament, etc. with a cotton swab or sharp object; water/dust resistance may be affected.
- Avoid placing handset directly on sand. Sand may penetrate Earpiece, Speaker, etc., resulting in low volume.
- \cdot Touch Panel may not respond properly if wet or touched with wet fingers.
- Do not move handset directly from a cold place to a warm humid place; condensation may occur. Should this happen, dry handset naturally at room temperature.
- \cdot Handset does not float on water.
- · Keep handset out of heavy rain.
- Do not let liquid-exposed handset remain wet; exposure to cold may freeze liquid causing malfunction.
- Damaged Battery/Port Cover affects water/dust resistance; contact a SoftBank Shop.

Charging Precautions

- · Battery, Desktop Holder and optional accessories are not water or dustproofed. Avoid moisture (precipitation, bath/shower, etc.); may cause fire, electric shock or damage.
- Never charge battery while handset is wet; may cause fire or damage due to electric shock or short-circuit.
- · Close Port Cover firmly after charging without using Desktop Holder.
- Do not touch Desktop Holder or Charger with wet hands. Electric shock may occur.
- Do not use Desktop Holder or Charger in rooms in which water is regularly in use (kitchens, bath/shower rooms, etc.); may cause fire or electric shock.
- Should External Connector Port be exposed to liquid, never charge battery; follow these steps first:
- 1 Holding handset firmly by its sides, shake it about 20 times
- 2 Pat against dry cloth to remove moisture from External Connector Port
- 3 Leave handset on dry cloth for approximately 2 3 hours at room temperature

Care & Maintenance

- Proper care of Port Cover/battery housing gasket is crucial for continued handset water/dust resistance. Observe the following:
 - $\boldsymbol{\cdot}$ Do not remove or damage gaskets. Keep them clean.
- · Do not insert sharp objects through Port/Battery Cover gaps or Headphone Jack; may damage gasket and affect water/dust resistance.
- · If Port Cover/battery housing gasket is damaged or deformed, contact a SoftBank Shop.
- To maintain water/dust resistance, replace related parts every two years regardless of their condition. Customerrequested parts replacement incurs fees and requires handset submission. For details, contact a SoftBank Shop or SoftBank Customer Support, General Information.

Washing Handset

Wipe off dirt, sand, beverage, etc., gently with cloth. Then with Battery Cover closed, hold handset approximately 10 cm below faucet or shower head and wash with low-pressure tap water (6 liters/min. or lower) at normal temperature (5°C - 35°C). Wash with your hands, taking care not to open Covers; do not use a brush or sponge. Dry handset before use.

- Before washing handset, make sure that Battery Cover and Port Cover are closed firmly.
- · Do not use a washing machine or ultrasonic cleaner.
- · Headphone Jack tends to accumulate dust, sand, etc.; rinse it off and dry Headphone Jack completely before use. Any residue may cause malfunction.
- Do not put a cotton swab, cloth, etc. into Headphone Jack; water/dust resistance may be affected causing malfunction.
- Do not place handset in a microwave oven to dry it.
 Battery/handset may leak, burst, overheat or ignite; may cause malfunction, accident or injury.
- Do not dry handset by exposing it to extreme heat (hot air from dryers, etc.); may cause warping, discoloration or damage.

Drying Handset

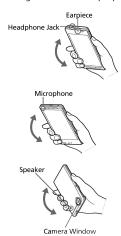

Dry Headphone Jack, Earpiece, Microphone, Speaker and Camera window when exposed to water.

Wipe handset surface with dry cloth

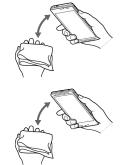

Holding handset firmly by its sides, shake it about 20 times

Pat against dry cloth to remove moisture from grooves

 \cdot Do not put a cotton swab, cloth, etc. into the opening.

Leave handset on dry cloth for approximately 2 - 3 hours at room temperature

Important

Do not use wet handset.

- · Voice quality may be affected, or moisture may transfer to clothes, bag, etc.
- \cdot Moisture may short-circuit Headphone Jack, etc.
- · Exposure to cold may freeze moisture; cause malfunction.
