About Data Folder

Use Data Folder to manage data on handset. New data created by handset functions or obtained via the Internet or mail are saved to different folders according to the file format.
● Some folders contain links. Use the links to access download sites in Yahoo! Keitai.

Save files to memory cards. Still images and videos shot with handset camera can be saved directly to memory card. Data can be copied and moved between handset and memory card. Data on memory card can also be accessed from Data Folder.

● Handset supports memory cards of up to 8 GB.
● Do not insert or remove memory cards when handset power is on.
● Insert memory cards properly. Otherwise, they cannot be used on handset.
● Do not affix stickers or labels to memory cards. As memory cards are very thin and precise mechanisms, even a thin sticker or label on a memory card may cause contact failure or destruction of data.
● Keep memory cards out of reach of infants who may accidentally swallow them or be injured.
● Do not remove a memory card or power off handset while writing and reading data with that memory card. It may cause data loss or malfunction.
● Access to memory cards may be unavailable when the battery level is low.

Inserting & Removing a Memory Card

Turn handset power off before inserting or removing a memory card.

Insertion

1 **Open Slot Cover**

2 **Insert memory card into Memory Card Slot until it locks**
Insert gently with the printed logo facing up.

3 **Close Slot Cover**

Tip
• If 📓 appears in Display, there may be a contact failure. Remove and reinsert memory card.

Removal

1 **Press and release**
Gently pull out memory card.

Note
• Memory card may spring out.
• Memory card may break if inserted or removed with force.

Formatting a Memory Card

● Format memory cards on handset only. Memory cards formatted on another device or PC may not work.

● Formatting a memory card deletes all the data on it.
