Precautions for using this application

See the "Instruction Manual" to handle the application correctly.
The available services are limited depending on the contents of the contract.

About the contents of this document

Basically this document describes the default operating instructions.
The descriptions of the procedures are based on the Windows 8.1 Pro Update.

About the displays

The descriptions of the displays in this document are based on the Windows 8.1 Pro Update.
They may be different from the actual ones due to OS differences.

About other terms

In this document, this application (SoftBank Settings) is called "this application."
In this document, the mobile network provided by SoftBank is called the "SoftBank network."

System requirements

The system requirements of this application are as follows. In any other environments, this application may not operate.

Even if the following requirements are met, it may not operate normally depending on your environment, including the main unit of the target model, connected peripheral devices, and applications in use.

- For inquiries on services such as support for the target model, upgrade of the OS, etc., read the manual of each target model, etc. and follow the procedure provisioned by each manufacturer.
- The system requirements (target model and target OS) described here is the information as of July 2015.

項目	説明
Target model	ThinkPad 10 for SoftBank
OS	Windows® 8.1 Pro Update 64bit Windows® 8.1 Pro Update 32bit
Language environment	Japanese OS: Displayed in Japanese Other OS: Displayed in English
USIM card	Prescribed special USIM card provided by SoftBank

Precautions for use

1. To use the SoftBank network in the target model, this application is required. This application is installed in the target model in advance. Without this application (including the case that this application is not installed in the target model), connection to and setting of the SoftBank network and use and setting of tethering cannot be performed in the target model in principle.
2. To use the SoftBank network in the target model, a separate communication contract with SoftBank is required.
3. This application is available for free. However, the communication charge associated with the use of this application is your responsibility.
4. To use this application, initial setting of Windows® 8.1 is required. It requires a Microsoft account to use the Windows® Store.
5. If the USIM card inserted into the target model is replaced by another USIM card, this application is initialized automatically. The contents set until that point are not saved.
6. This application sends the information prescribed in the following items, when you turn on tethering in this application (including when the tethering password, etc. is set) and on a regular basis while tethering is on.
 - a) Contract unique ID (including the contract phone number) recorded in the target model or target USIM card that you use
 - b) Prescribed contract personal identification number that you entered

Every transmission of information incurs the prescribed communication charge of the communication service used for it (Even if the SoftBank network is used for the communication, a communication charge is incurred. But the communication is subject to a fixed charge if you subscribe the prescribed fixed-price charge plan and the communication connects to the fixed-price target access point prescribed separately. However, the communication charge is added to the monthly used communication charge.)

7. If the transmission of information mentioned in the preceding paragraph passes through any other communication services than the SoftBank network provided by SoftBank or another carrier (including Internet communication via Wi-Fi, wireless/wired network, etc.) and collation with your subscription status cannot be completed, disconnect the communication service and then switch to the connection to the SoftBank network to complete collation.
8. The SoftBank network connection using this application is set to automatically enable the "Connect automatically" function, which connects to the SoftBank network automatically, by default and the "Roam automatically" function, which executes international roaming automatically, when using this application overseas. Note that the corresponding connection settings may incur a high communication charge depending on the usage situation. The corresponding connection function can be stopped by the function settings of the target model.
9. To install this application in the target model, it is necessary to insert the prescribed special USIM card provided by SoftBank to the target model and then download and install this application from Windows® Store and the prescribed download server.
10. This application needs to be updated according to the contents of the update from the Windows® Store or the prescribed download server (If update from the Windows® Store is required, the update cannot be executed with the usage restriction of the Windows® Store set).

The update of this application may include the addition of new functions or improvements in the quality including repair, so it is recommended to update this application and use the latest status constantly.

11. The installation and update of this application incur the prescribed communication charge of the communication service used for it (Even if the SoftBank network is used for the communication, a communication charge is incurred. But the communication is subject to the fixed charge if you subscribe to the prescribed fixed-price charge plan and the communication connects to the fixed-price target access point prescribed separately. However, the communication charge is added to the monthly used communication charge.)
12. This application shall be used upon agreement to the "Software End User License Agreement (Terms and Conditions of Software Usage)" of this application.

Using SoftBank Settings

About This Application.....	7
Preparation for Using This Application....	8
Starting This Application.....	11
About This Application Screen.....	16

About This Application

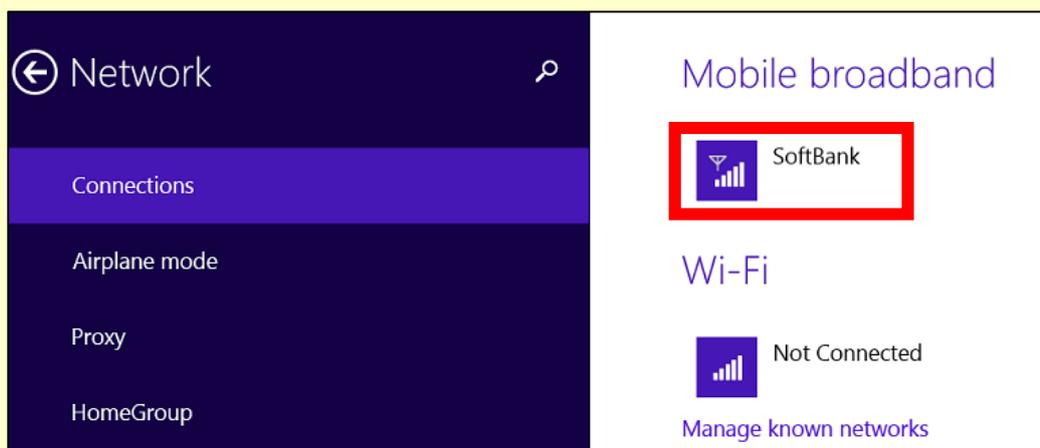

This application allows you to set network connection options on the device such as an access point name (APN) to get connected with the SoftBank network, connection/disconnection, and tethering settings.

! Precautions for using this application

If you connect to the SoftBank network from this application, you cannot confirm the following setting of **[SoftBank]**.

Confirm it after disconnecting the SoftBank network connection or connecting to the SoftBank network from the charm.

- **[PC settings] -> [Network] -> [Mobile broadband] -> [SoftBank]**

If any USIM cards other than the one already set up are installed, the following screen is displayed and the application settings are initialized when this application starts. The contents set until that point are not saved.

Detection of the New USIM card

Detected the USIM card different from the card already set up. The application will be initialized.

Close

Preparation for Using This Application

About USIM cards

This application operates only in the target models. It is also necessary to insert the prescribed USIM card to which the price plan specified by SoftBank is registered to each target model. We do not provide any support for the operations of this application associated with use in any other models than the compatible ones.

For the method how to insert/remove the USIM card, see the manual of each target model, etc.

! Precautions for handling of the USIM card

- Note that if the USIM card is broken due to insertion into an IC card reader of other companies, etc., it is not our responsibility, but your responsibility.
- Keep the IC portion clean while using the card.
- Wipe it with a dry soft cloth, etc. for maintenance.
- Do not attach any labels, etc. to the USIM card. It may cause a failure.
- For the handling of the USIM card, see the instruction manual attached to the USIM card.
- The ownership of the USIM card attributes to us.
- Re-issuance of the USIM card due to loss or damage is charged.
- Return the USIM card to us when canceling the contract.
- The USIM card returned from you is recycled for environmental preservation.
- The specifications and performance of the USIM card may be changed without notice, so please note this.
- It is recommended to take note of the contents of the information which you register to the USIM card by yourself.

Download and installation of this application

This application is installed in the target model in advance.

Confirm whether this application is installed in the application list of Windows.

If this application is not installed, or to reinstall it, download and install this application according to the following procedure.

! Use the Windows® Store for the download and installation of this application.

Perform this procedure with a Microsoft account set for the target model.

Since an Internet connection is required, connect to the SoftBank network or Wi-Fi while performing this procedure.

1

Swipe upward on the start screen.

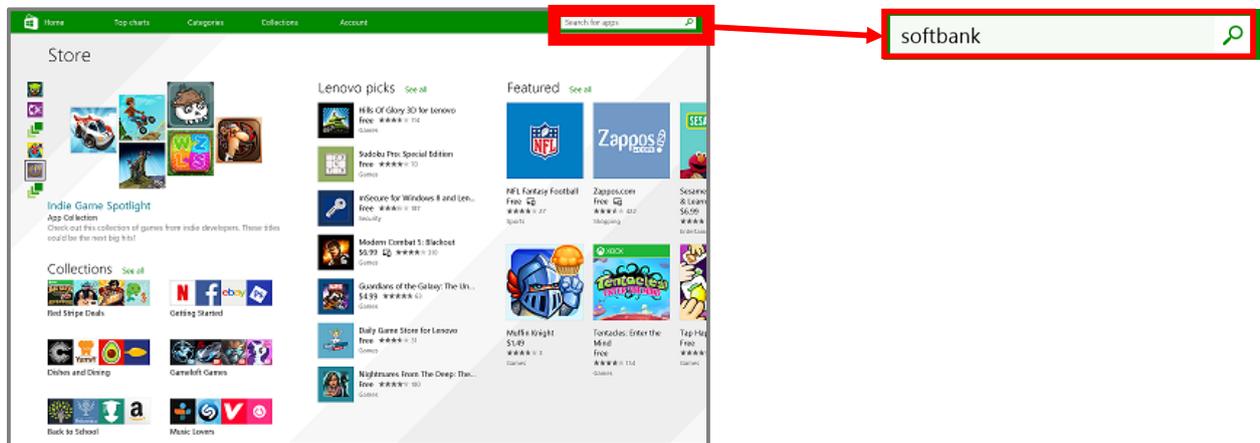

2

Tap [Store] in the list of applications.

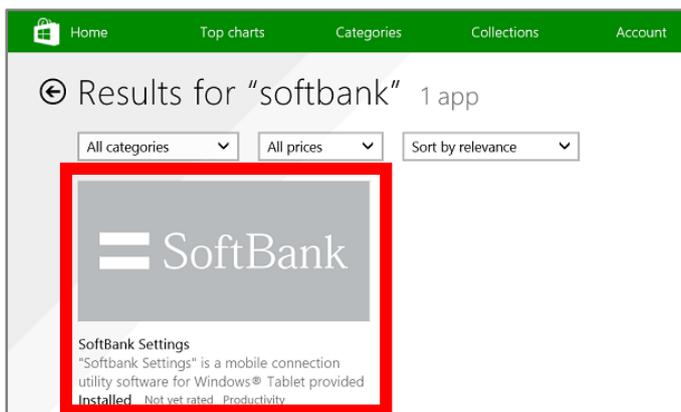

3

Enter "softbank" in the application search column in the store and do a search.

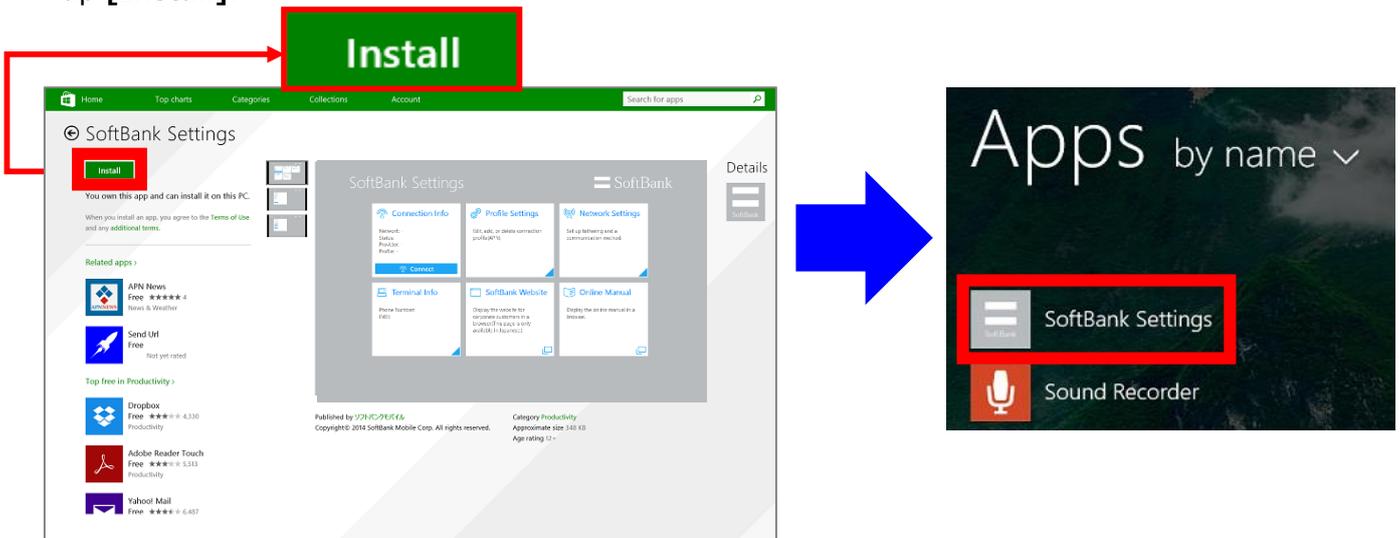

4

Tap [SoftBank Settings] on the search result screen.

Tap **[Install]**.

 This application will be installed in the target model and displayed in the list of applications.

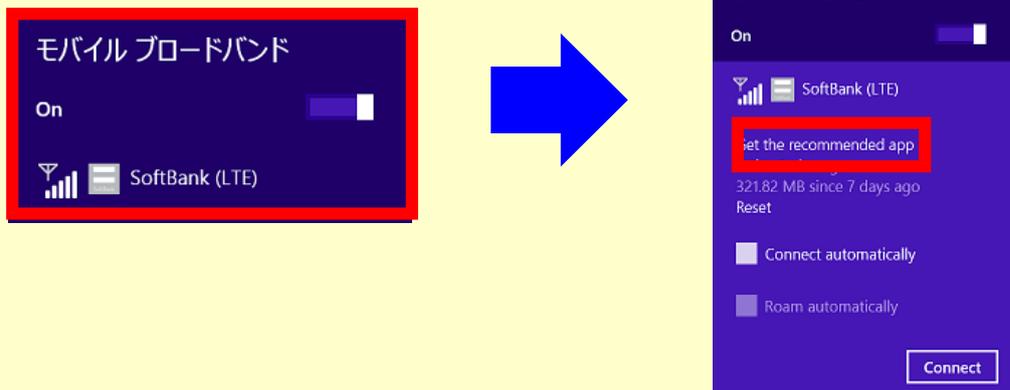

If this application is not installed

If this application is not installed in the target model, **[Get Recommended Applications]** is displayed in **[SoftBank]** of mobile broadband.

In this case, you can download and install this application according to the following procedure.

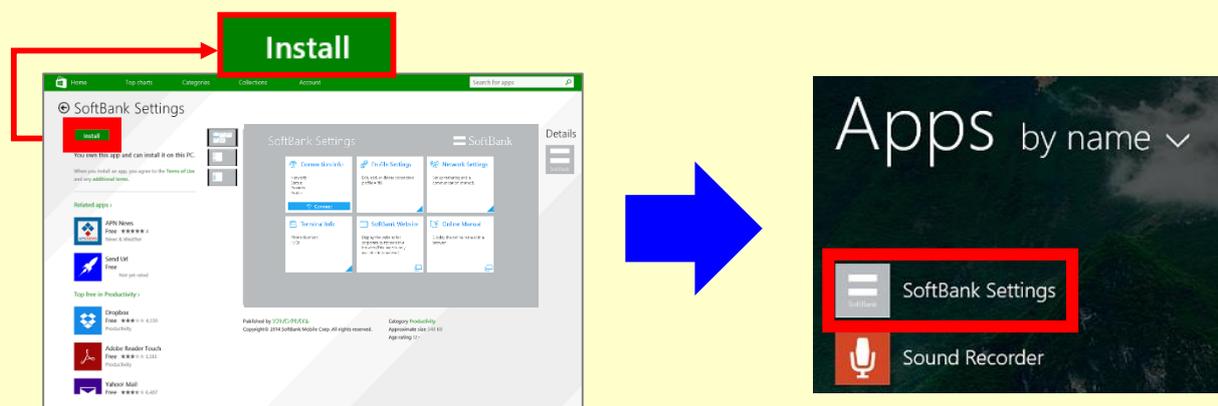

- (1) Open the charm and tap **[Settings]** -> **[Network icon]**.
- (2) Tap **[SoftBank]** -> **[Get the recommended app]** of broadband.

*If **[SoftBank]** is not displayed in mobile broadband, confirm troubleshooting.

- (3) This application will be displayed in the Store. Then, tap **[Install]**.

This application will be installed in the target model and displayed in the list of applications.

Starting This Application

If this application is started, the APN (connection destination) necessary to connect to the SoftBank network is set as the default in the target model.

! Precautions for the first startup

When this application is started for the first time, the Software End User License Agreement is displayed. Confirm the contents and perform the following procedure.

● If you agree

(1) Tap the checkbox to the left of **[Confirmed the license]** to check it.

(2) Tap **[Agree]**.

*Within the SoftBank network area, the connection may be established on tapping **[Agree]**.

=> **This application will start.**

A screenshot of a license agreement screen. At the top, there is a checkbox with a checkmark inside, followed by the text "Confirmed the license.". Below this, there are two buttons: "Agree" (highlighted with a red border) and "Disagree".

● If you disagree

(1) Tap **[Disagree]**.

=> **Move to the start screen.**

A screenshot of a license agreement screen. At the top, there is an unchecked checkbox followed by the text "Confirmed the license.". Below this, there are two buttons: "Agree" (disabled, greyed out) and "Disagree" (highlighted with a red border).

! Starting the application when the USIM is protected with a PIN

In starting the application when the USIM is protected with a PIN, the Unlock PIN screen appears. To unlock a PIN and start the application, enter a PIN. Tap **[OK]**.

A screenshot of the "Unlock PIN" screen. The title "Unlock PIN" is at the top. Below it, the text "Unlock the USIM card" is displayed. Underneath, it says "Enter the PIN code" and "The number of attempts left: 3/3 times". There is a PIN input field with four dots, highlighted with a red border. Below the input field are two buttons: "OK" (highlighted with a red border) and "Cancel".

Starting this application from the charm

1

Open the charm and tap **[Settings]** -> **[Network icon]**

2

Tap **[SoftBank]** of mobile broadband.

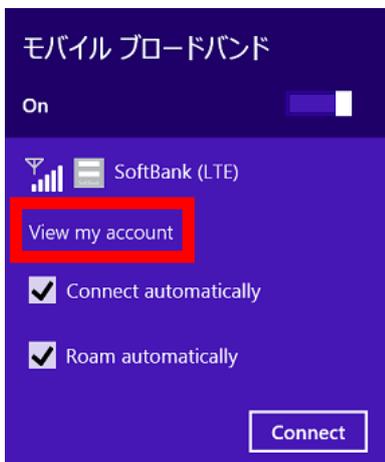

!

If **[SoftBank]** is not displayed in mobile broadband, confirm troubleshooting.

3

Tap **[View my account]**

This application will start.

Starting this application from the application list

1

Swipe upward on the start screen.

Swipe upward

2

Tap [**SoftBank Settings**] in the list of applications.

 This application will start.

Starting this application from the pin on the start screen

1

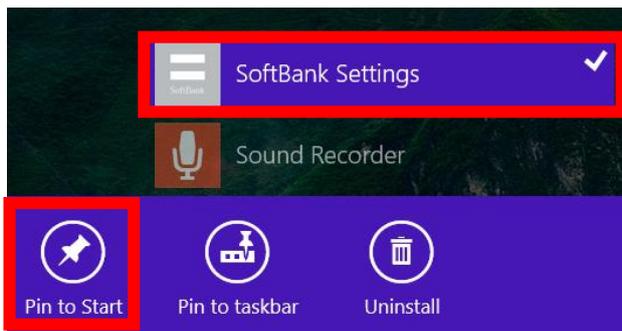

Swipe upward on the start screen

Swipe upward

2

Long-tap **[SoftBank Settings]** in the application list and tap **[Pin to Start]** in the application bar displayed at the bottom of the screen.

3

Tap the tile of this application added to the start screen.

 This application will start.

 The size of the tile can be changed from **[Resize]** of the application bar displayed when long-tapping the tile.

Starting this application from the pin on the taskbar

1

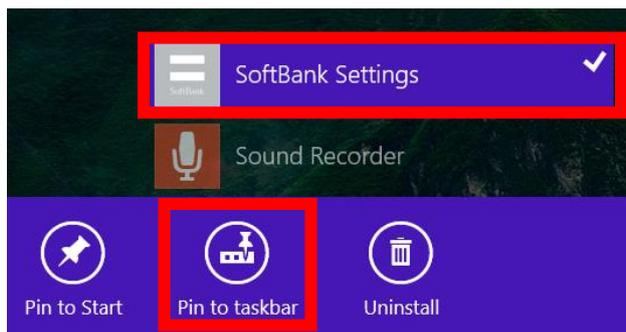

Swipe upward on the start screen.

Swipe upward

2

Long-tap [**SoftBank Settings**] in the application list and tap [**Pin to taskbar**] in the application bar displayed at the bottom of the screen.

3

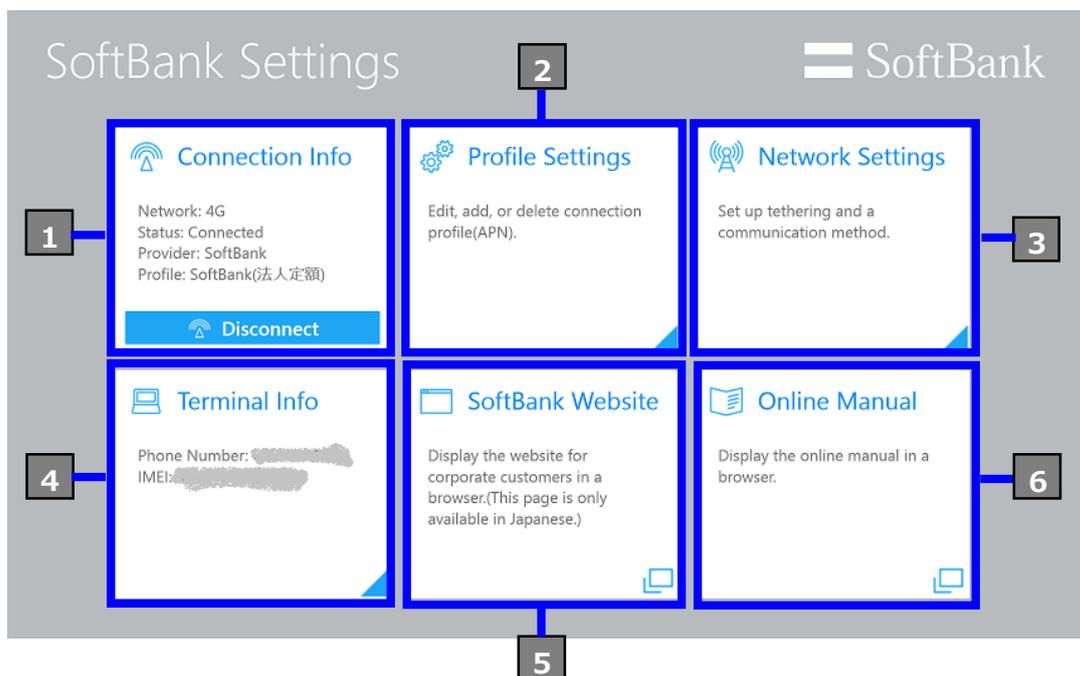

Tap the icon of this application added to the taskbar.

🚩 This application will start.

About This Application Screen

How to see this application home screen

Item	Description
1 Connection Info	You can connect to/disconnect from the SoftBank network. The information of the connected network is also displayed.
2 Profile Settings	Allows modification, addition, and deletion of APNs.
3 Network Settings	Allows tethering, network, and PIN settings.
4 Terminal Info	Displays the terminal information.
5 SoftBank Website	Displays the site of SoftBank for corporate customers on the browser. *Network connection is required.
6 Online Manual	Displays the online manual on the browser. *Network connection is required.

Using the SoftBank Network

Connecting/Disconnecting the SoftBank Network..18

Confirming the SoftBank Connection Information..23

Connecting/Disconnecting the SoftBank Network

! The APN that is made a default APN in **[Profile Settings]** is used.
For details of **[Profile Settings]**, see "Using Profile Settings".

Connecting from this application

1

Tap **[Connect]** in **[Connect Info]** on the SoftBank settings home screen.

 A connection to the SoftBank network will be established.

! If **[Connect]** cannot be selected

Open the charm and confirm the status of the following setting.

- Mobile broadband

=> If this is off, change it to on.

=> If "No service" is displayed, confirm troubleshooting.

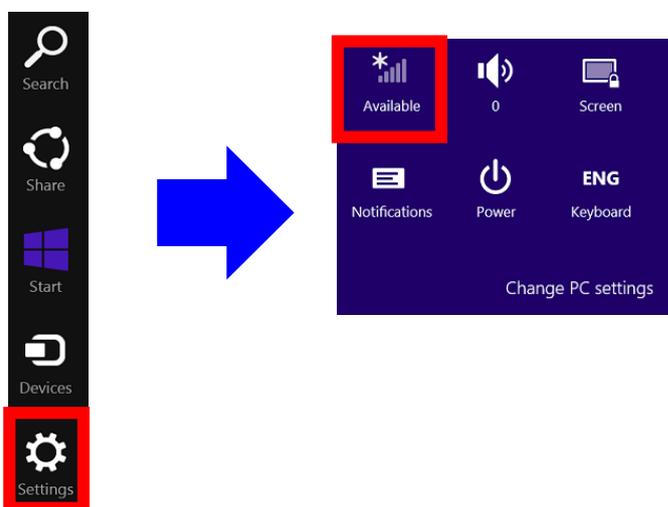

- Airplane mode

=> If this is on, change it to off.

Connecting from the charm

1

Open the charm and tap **[Settings]** -> **[Network icon]**.

2

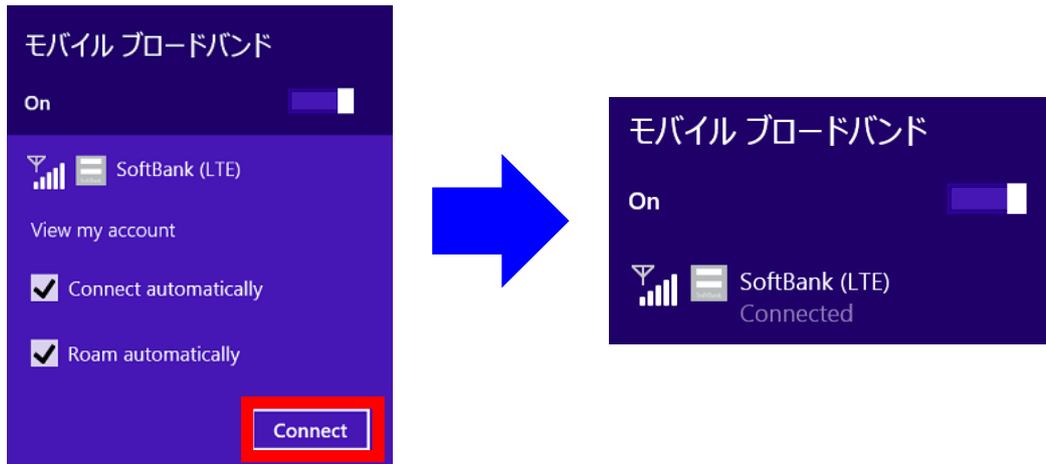

Tap [**SoftBank**] in mobile broadband.

! If [**SoftBank**] is not displayed in mobile broadband, confirm troubleshooting.

3

Tap [**Connect**].

🚩 A connection to the SoftBank network will be established.

! Precautions for connection to the SoftBank network using this application (1)

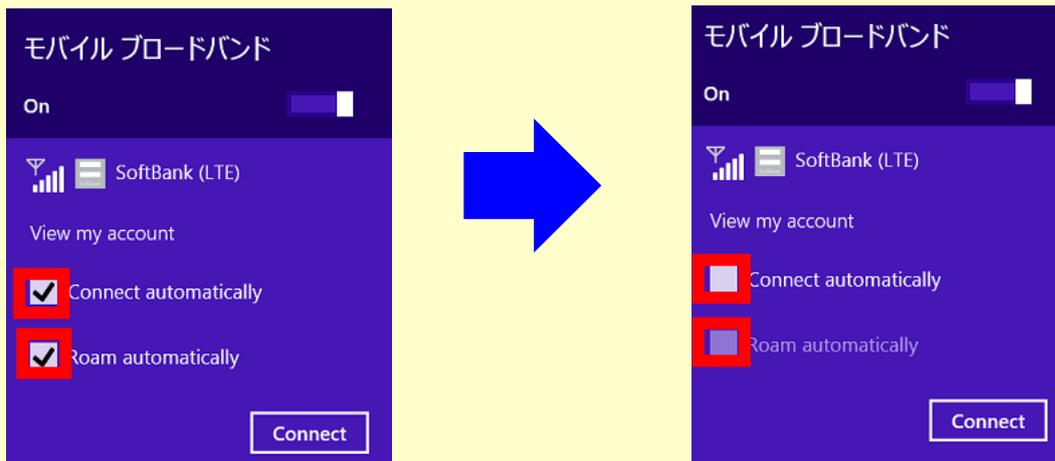

The SoftBank network connection using this application is set to automatically enable the “Connect automatically” function, which connects to the SoftBank network automatically, by default, and the “Roam automatically” function, which executes international roaming automatically, when using this application overseas. Note that the corresponding connection settings may incur a high communication charge depending on the usage situation.

To stop the “Connect automatically” function and “Roam automatically” function, perform the following procedure.

[Procedure]

Tap the checkbox to the left of [**Connect automatically**] and [**Connect automatically**] in mobile broadband [**SoftBank**] in the charm to uncheck it.

Default status

! Precautions for connection to the SoftBank network using this application (2)

The SoftBank network connection using this application is set to automatically enable the "Set as a metered connection" function by default. Note that the download of the application may be restricted due to this connection setting.

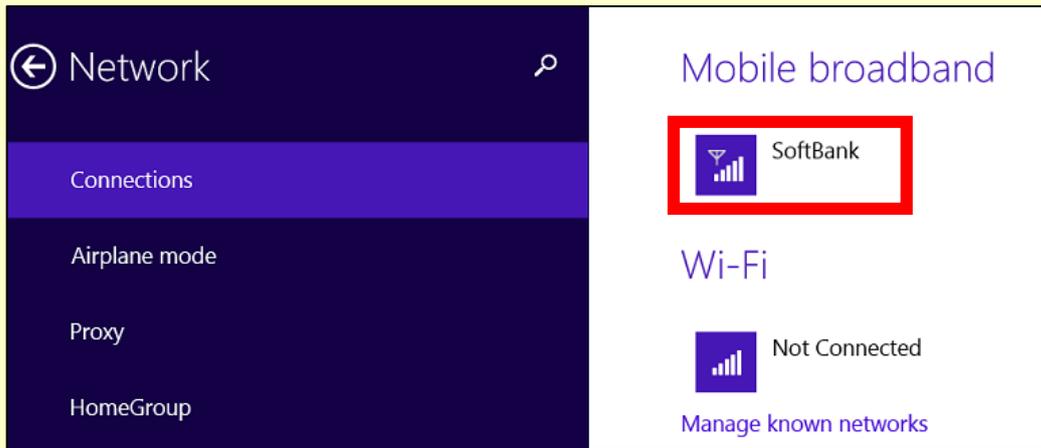

To stop the "Set as a metered connection" function, perform the following procedure.

[Procedure]

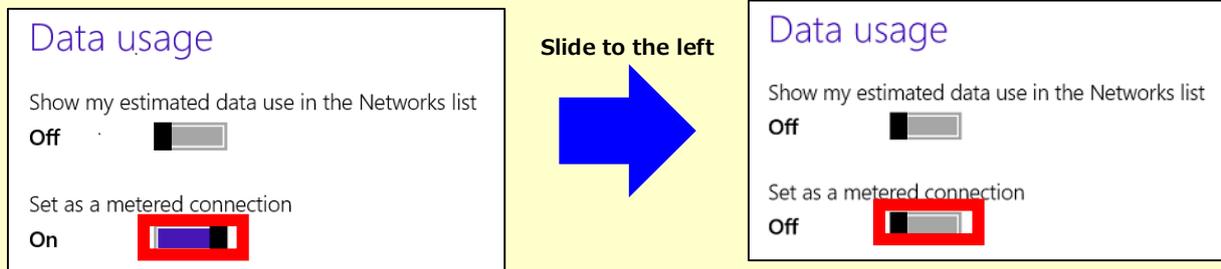

(1) [PC settings] -> [Network] -> [Mobile broadband] -> [SoftBank]

*If you connect to the SoftBank network from this application, you cannot transition to the above-mentioned setting of [SoftBank].

Perform this after disconnecting the SoftBank network connection or connecting to the SoftBank network from the charm.

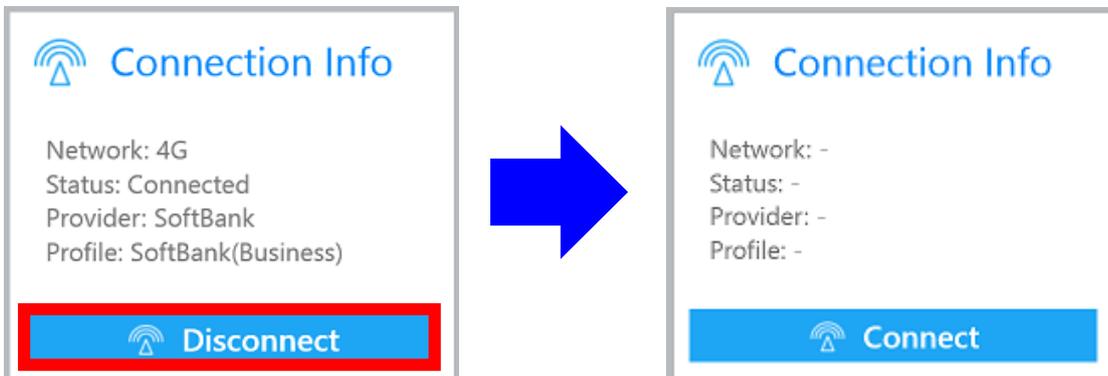

(2) Turn off [Data usage] -> [Set as a metered connection].

Disconnecting from this application

1

Tap [**Disconnect**] in [**Connection Info**] on the SoftBank settings home screen.

 A connection to the SoftBank network will be disconnected.

If you cannot disconnect from this application

If you connect to the SoftBank network from the charm, the following error screen will be displayed and this application cannot disconnect from the network.

Disconnect from the charm. (For the procedure to disconnect from the charm, see the next section.)

Connection / Disconnection Error

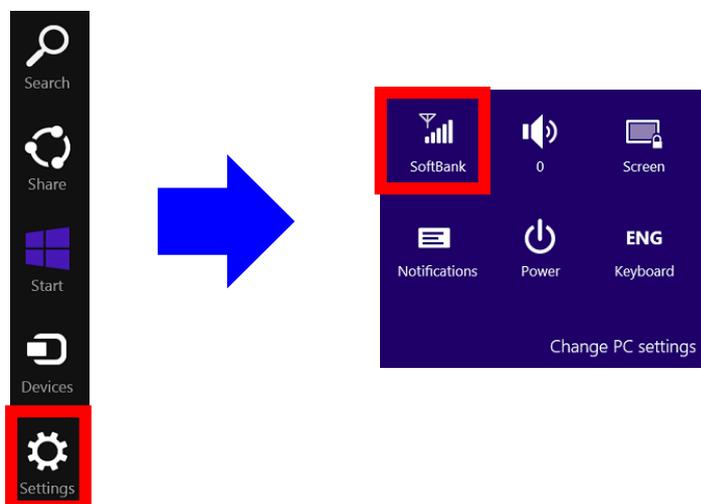

Unable to disconnect the current connection from the application. Display charms of the connection list.

Close

Disconnecting from the charm

1

Open the charm and tap [**Settings**] -> [**Network icon**].

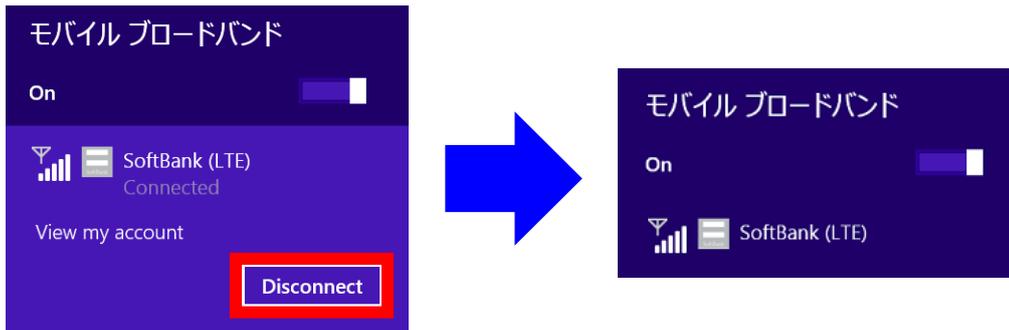

2

Tap [**SoftBank**] of mobile broadband.

3

Tap [**Disconnect**].

A connection to the SoftBank network will be disconnected.

Confirming the SoftBank Connection Information

Confirming the SoftBank network connection information from this application

1

Confirm [**Connection Info**] on this application home screen while connecting to the SoftBank network.

The SoftBank network connection information will be displayed.

The connection information will not be displayed while no connection to the SoftBank network is established.

Confirming the SoftBank network connection information in the live tile

1

Pin this application on the start screen.

For how to pin this application on the start screen, see “Starting this application from the pin on the start screen.”

2

Long-tap the tile of this application and then tap [**Turn live tile on**] in the application bar displayed at the bottom of the screen.

The SoftBank network connection information will be displayed on the tile.

The connection information is displayed only when the size of the tile is set to wide.

If it is not set to wide, change it by [**Resize**] in the application bar.

The connection information will not be displayed while no connection to the SoftBank network is established.

The connection information display of the live tile is retained for up to 1 hour if the connection information is not updated. The display is cleared after that.

In the event of an OS restart, etc. while the connection is established, the display of the live tile after restart may be different from the actual connection status.

In this case, the display is cleared in up to 1 hour.

3

Enter **[Name]**, **[APN]**, **[User ID]**, **[Password]**, and **[Authentication Protocol]**.

A screenshot of a mobile device's APN configuration screen. The form contains the following fields: Name (with 'New Profile' entered), APN, User ID, Password, and Authentication Protocol (set to 'CHAP'). Below these fields is a toggle switch for 'Set the connection profile of default', which is currently turned 'Off'. A blue 'Save' button is located at the bottom of the form. A red rectangular border highlights the entire form area.

 To make it a default APN, turn on **[Set the connection profile of default]**.

4

Tap **[Save]**.

A screenshot of the same APN configuration form as in step 3. The 'Save' button at the bottom is highlighted with a red rectangular border. A blue arrow points from this 'Save' button towards the right, indicating the next step in the process.

A screenshot of the APN list screen. At the top, there is a checked item 'SoftBank(法人定額)'. Below it, the newly added profile 'New Profile' is listed and highlighted with a red rectangular border. At the bottom of the screen, there are two buttons: 'Add' (blue) and 'Delete' (grey).

 The APN was added.

 Before leaving this screen, tap **[Save]**. Otherwise, the change will be lost.

Editing APNs

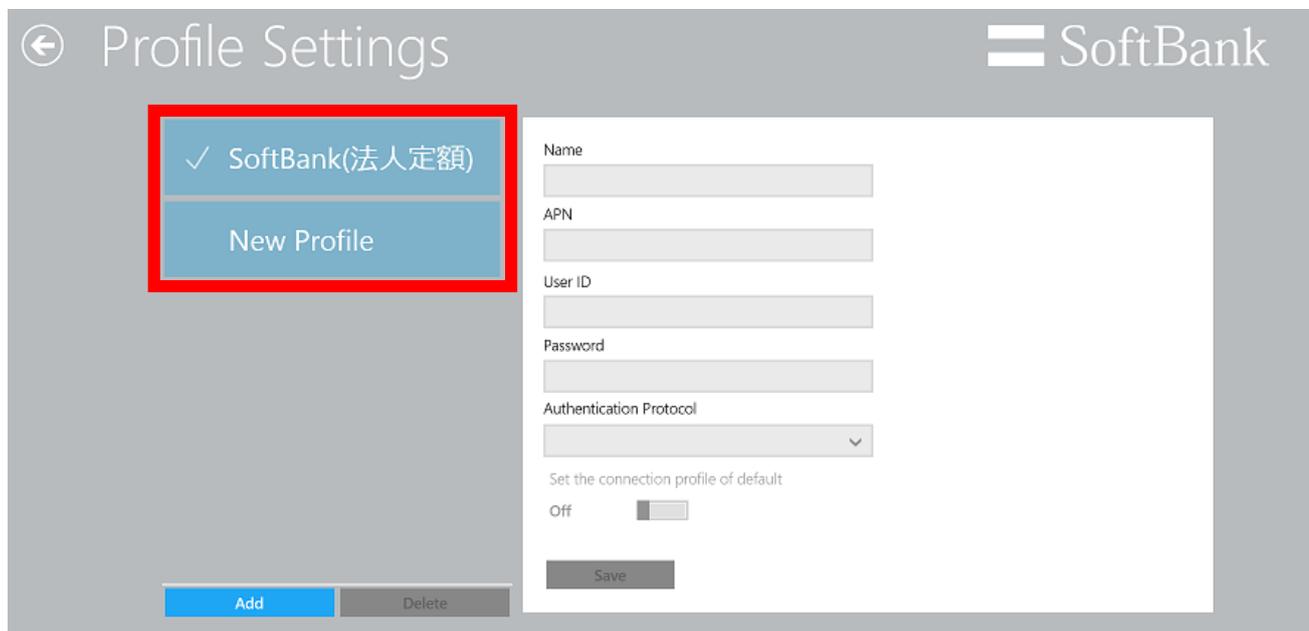

- ! When the application is connected to the SoftBank network, the following steps can't be used. Before you start, disconnect the network.
- ! When the custom APN settings, ones that are unmodifiable, are set, the following steps can't be used. Before you start, remove the custom APN settings.
- ! The following steps can't turn off the **[Set the connection profile of default]** option that is on for an APN to work as a default APN. To set or choose another APN as a default APN, see "Setting a default APN."

1

Tap **[Profile Settings]** on this application home screen.

**2**

In **[Profile Settings]**, tap an APN that you edit.

3

Enter **[Name]**, **[APN]**, **[User ID]**, **[Password]**, and **[Authentication Protocol]**.

🚩 The edited APN was saved.

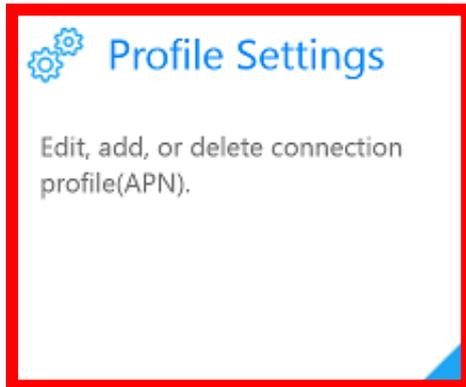

- ! Before leaving this screen, tap **[Save]**. Otherwise, the change will be lost.

Deleting APNs

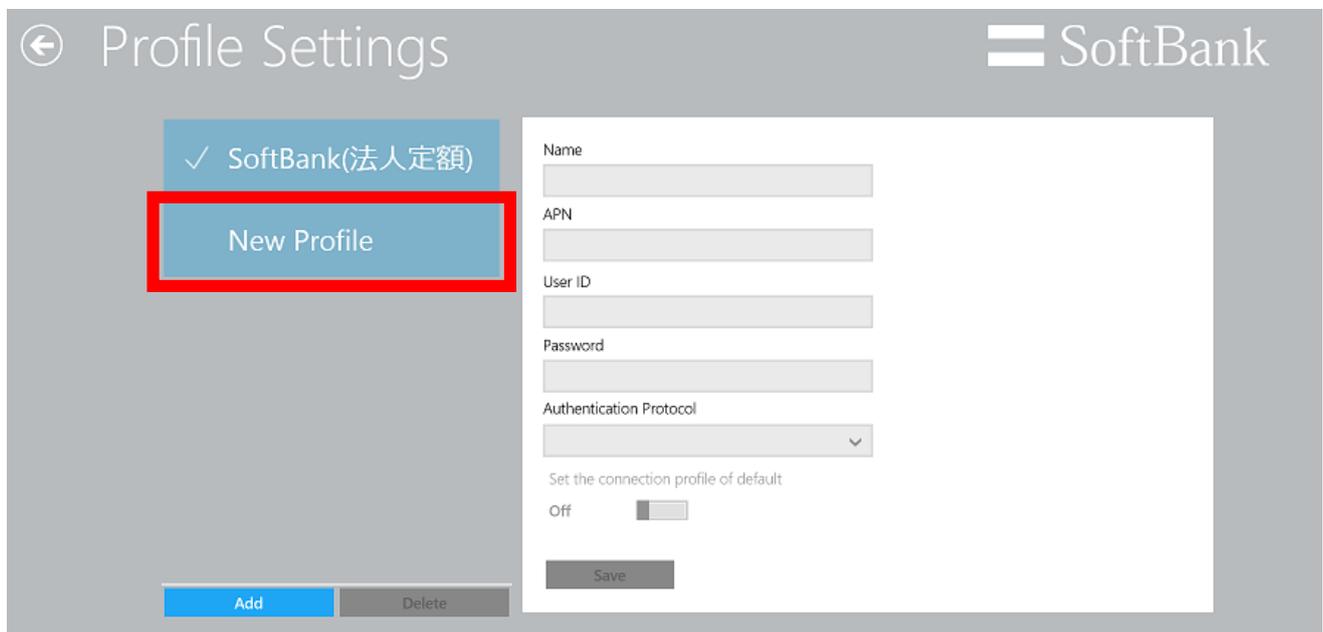

-  When the application is connected to the SoftBank network, the following steps can't be used.
Before you start, disconnect the network.
-  When the custom APN settings, ones that are unmodifiable, are set, the following steps can't be used.
Before you start, remove the custom APN settings.
-  An APN made a default APN and the **[SoftBank (法人定額)]** APN, the one preset in the application, are undeletable.

1

Tap **[Profile Settings]** on this application home screen.

**2**

In **[Profile Settings]**, tap an APN you want to delete.

Tap [Delete].

The screenshot shows the 'Profile Settings' screen in the SoftBank application. At the top left is a back arrow and the title 'Profile Settings'. At the top right is the SoftBank logo. On the left side, there is a list of profiles: '✓ SoftBank(法人定額)' and 'New Profile'. Below the list are two buttons: 'Add' and 'Delete'. The 'Delete' button is highlighted with a red box. On the right side, there is a configuration form for a profile. The form includes fields for 'Name' (containing 'New Profile'), 'APN', 'User ID', and 'Password'. Below these fields is a dropdown menu for 'Authentication Protocol' set to 'CHAP'. At the bottom of the form is a toggle switch for 'Set the connection profile of default', which is currently 'Off'. A 'Save' button is located at the bottom right of the form.

 The APN was deleted.

 An APN made a default APN and the [SoftBank (法人定額)] APN, the one preset in the application, are undeletable.

Setting a Default APN

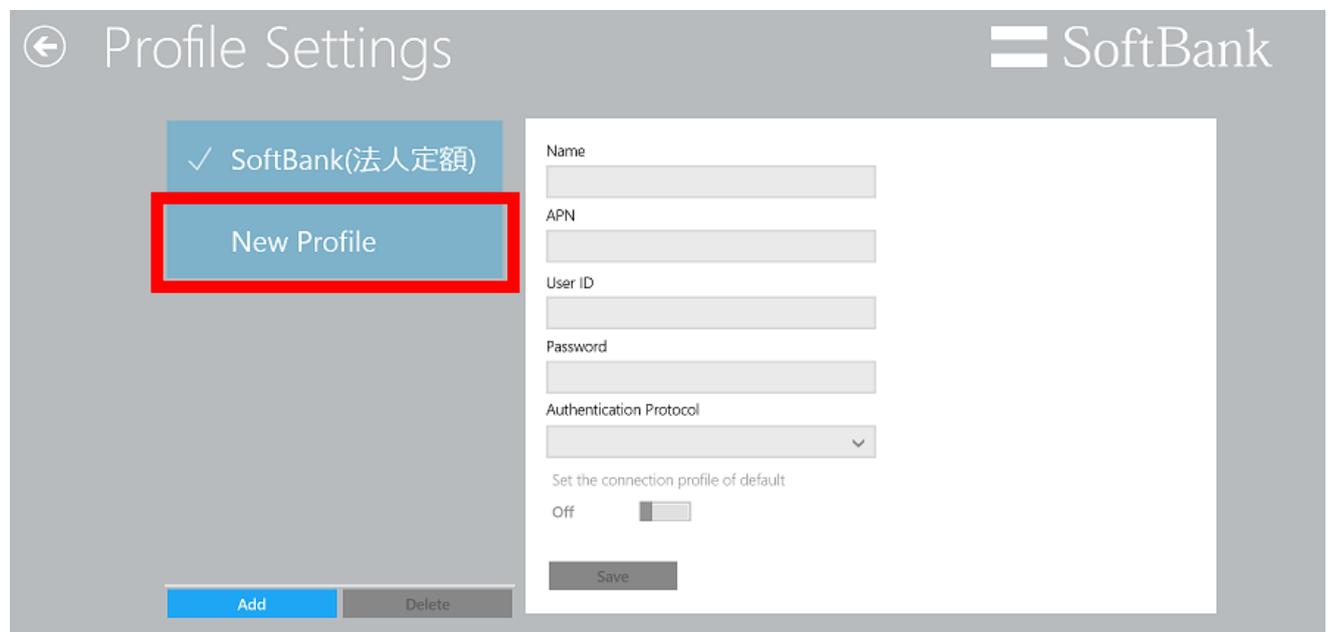

- ! When the application is connected to the SoftBank network, the following steps can't be used. Before you start, disconnect the network.
- ! When the custom APN settings, ones that are unmodifiable, are set, the following steps can't be used. Before you start, remove the custom APN settings.

1

Tap [**Profile Settings**] on this application home screen.

**2**

In [**Profile Settings**], tap an APN that you make a default APN.

 By completing the steps above, the **[Set the connection profile of default]** option that was on in the default APN before these steps is automatically tuned off.

Setting the Tethering Password

“Tethering” is the function to realize an Internet connection with information equipment connected by Wi-Fi, etc. (slave unit) using the SoftBank network of the target model.

-  To use tethering, it is necessary to apply for the tethering service and set the tethering password for this application. The tethering password is a 4-digit personal identification number registered at the time of application.
-  To set the tethering password, an Internet connection is required for password authentication. Set the tethering password setting while connection to the SoftBank network or Wi-Fi is established.

1

Tap **[Network Settings]** on this application home screen.

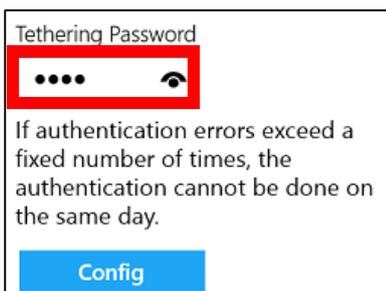

2

Tap **[Tethering]** -> **[Tethering Password]** -> **[Config]**.

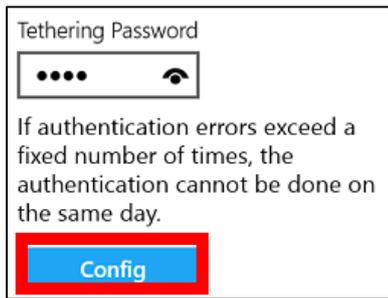

3

Enter the tethering password in the entry field.

Tap **[Connect]**.

 The tethering password will be set.

 If an error screen is displayed and the tethering password cannot be set, confirm troubleshooting.

Enabling Tethering

- ! To use tethering, it is necessary to perform the following procedure in advance.
- Set the tethering password.
 - Connect to the SoftBank network.
 - Turn on the Wi-Fi setting of the target model.

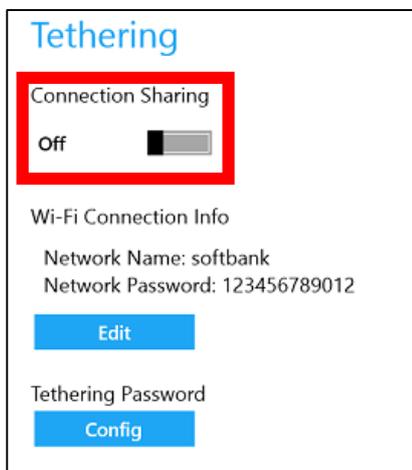

Enabling tethering from this application

1

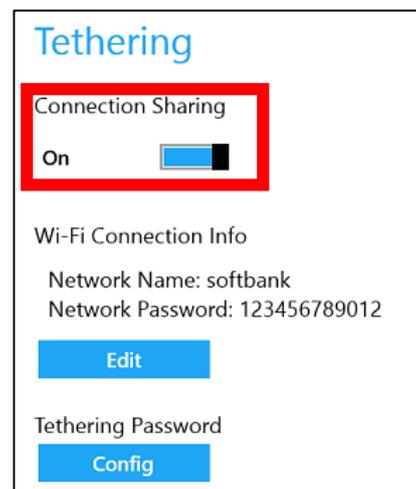

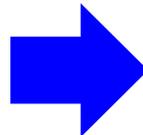

Tap [**Network Settings**] on this application home screen.

**2**

Turn on [**Tethering**] -> [**Connection Sharing**].

Slide to the right

 Tethering is enabled.

Enabling tethering from the PC settings

! If you connect to the SoftBank network from this application, you cannot perform this procedure. Disconnect from the SoftBank network connection and connect from the charm, and then perform this procedure.

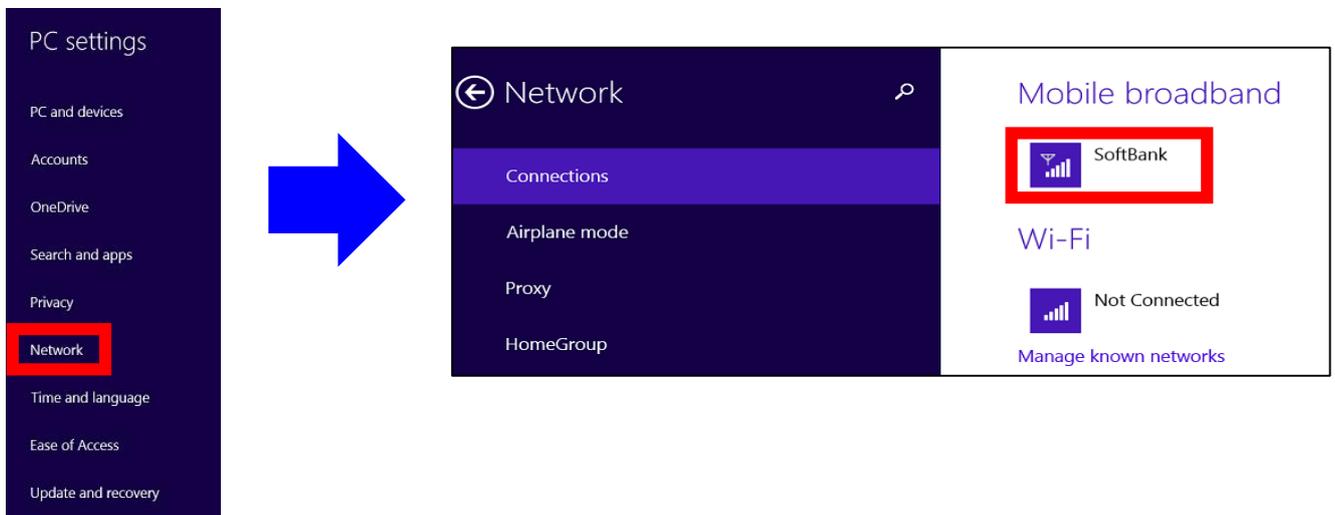

1

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

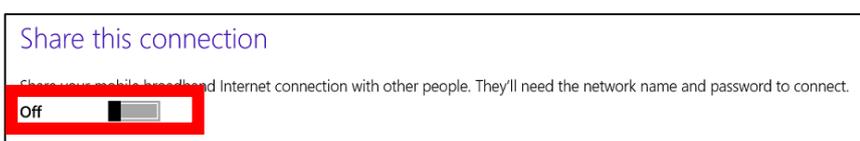

2

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

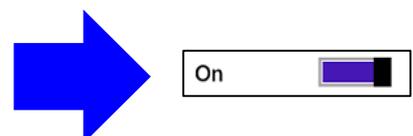

3

Turn on **[Share this connection]**.

Slide to the right

 Tethering is enabled.

Editing the Wi-Fi Connection Information

! The Wi-Fi connection information is required for tethering connection with a slave unit.

Editing the Wi-Fi connection information from this application

1

Tap **[Network Settings]** on this application home screen.

2

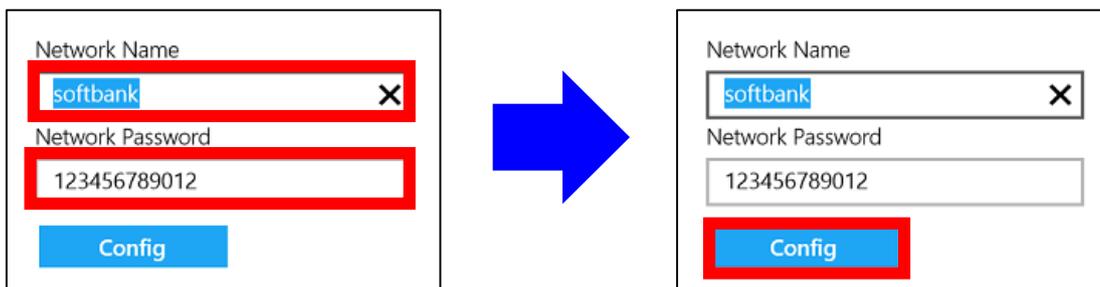

Tap **[Tethering]** -> **[Wi-Fi Connection Info]** -> **[Edit]**.

3

Enter any value in **[Network Name]** and **[Network Password]** and tap **[Config]**.

! The network password shall be set within 8 to 63 characters.

 The Wi-Fi connection information is set.

Editing the Wi-Fi connection information from the PC settings

! While connecting to the SoftBank network from this application, this procedure cannot be performed. Disconnect from the SoftBank network connection and connect from the charm, and then perform this procedure.

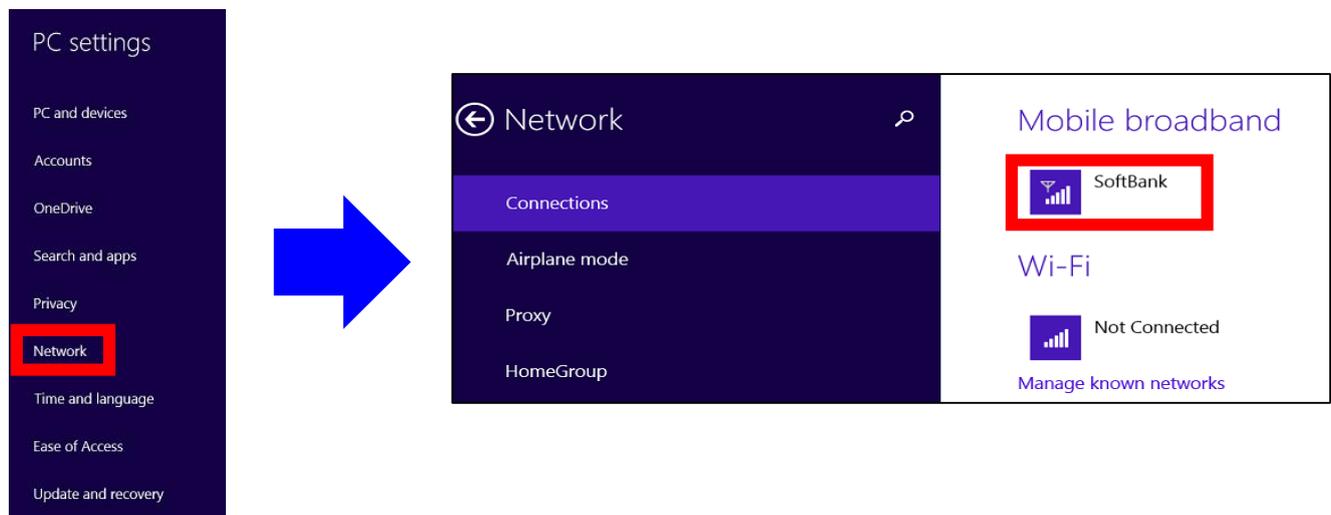

1

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

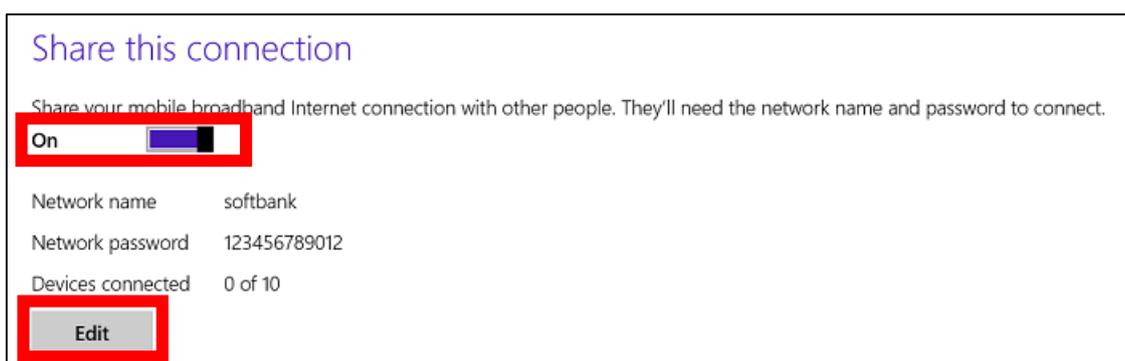

2

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

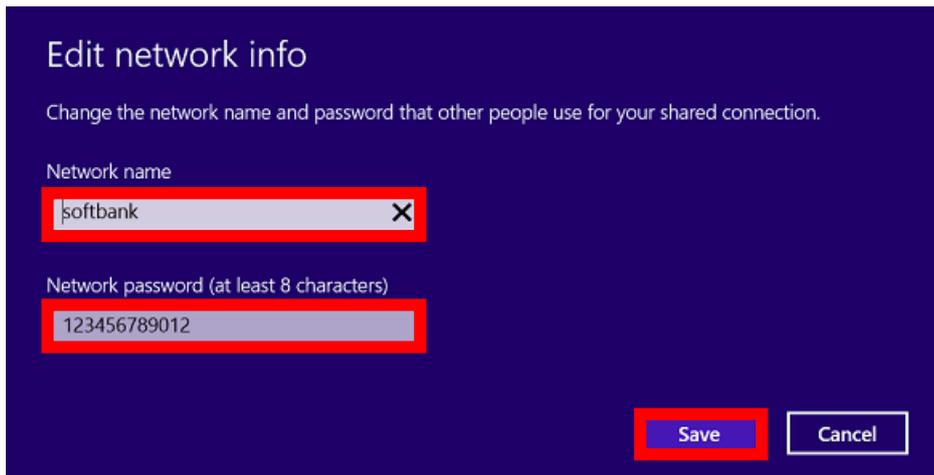

3

Turn on **[Share this connection]** and tap **[Edit]**.

Enter any value in **[Network name]** and **[Network password]** and tap **[Save]**.

Edit network info

Change the network name and password that other people use for your shared connection.

Network name

Save Cancel

🚩 The Wi-Fi connection information is set.

Connecting to Slave Units by Tethering

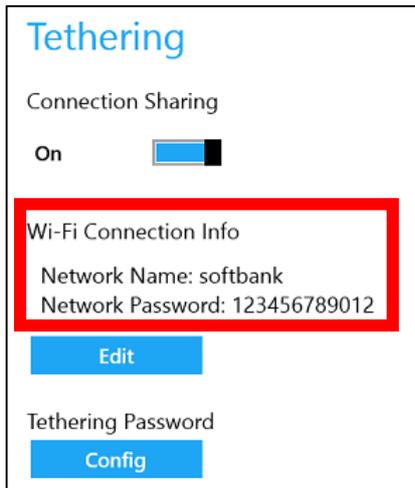

-  Perform this procedure with tethering enabled.
For how to enable tethering, see “Enabling tethering.”
-  Up to 10 slave units can be connected simultaneously.

1

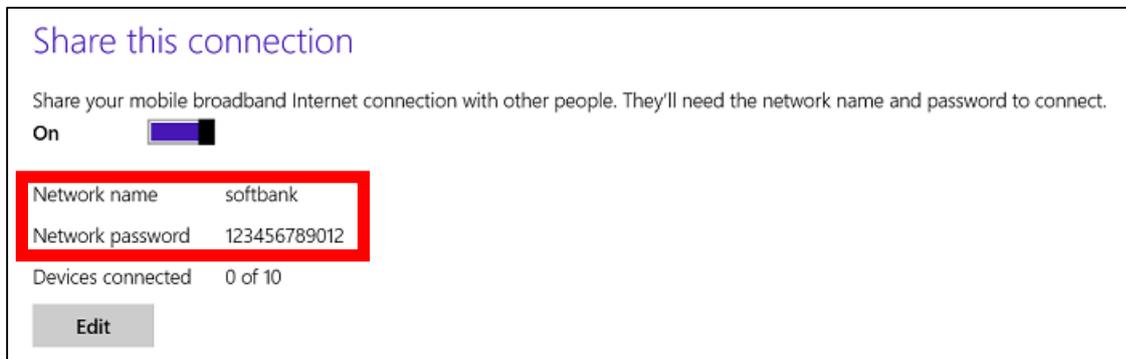

Turn on Wi-Fi and enter **[Network name]** and **[Network password]** set below in the slave units.

-  For how to transition to the following screen, see “Editing the Wi-Fi connection information.”

● SoftBank Settings

● PC settings

Setting a PIN

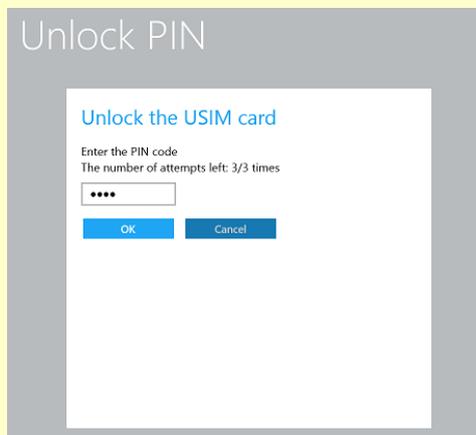

Activating a PIN.....	43
Changing PINs.....	47
Disabling a PIN.....	50

Activating a PIN

! A PIN protected USIM card

If the USIM card is protected with a PIN, the following screen appears and モバイル ブロードバンド in the charm shows “Unnamed Locked” every time you turn on the device or insert the USIM card, prompting you to enter a PIN.

- If you start the application, the Unlock PIN screen appears.

*To unlock a PIN, see “Starting This Application.”

- If you turn on the device, モバイル ブロードバンド in the charm shows “Unnamed Locked.”

*To unlock a PIN, see Trouble Shooting.

! Incorrect PIN entries and PIN lock activation

After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code.

After ten consecutive incorrect PUK code entries, the USIM card is blocked. Then, you need to take a specific process for restoring access to the card. Contact SoftBank Business Call Center. (For contact information of SoftBank Business Call Center, see Support Center List.)

Setting a PIN using the application

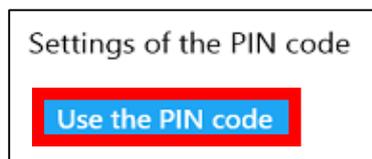

1

Tap **[Network Settings]** on this application home screen.

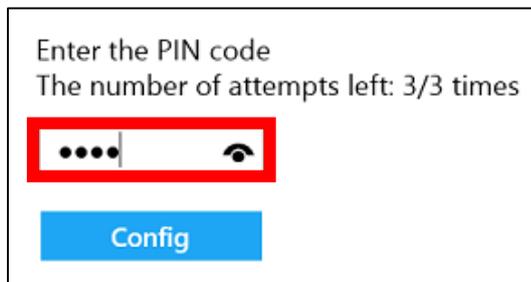

2

Tap **[Network Settings]** -> **[Terminal]** -> **[Settings of the PIN code]** -> **[Use the PIN code]**.

3

In the box, enter a PIN.

A common default PIN for the USIM card is "9999" at its purchase.

After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

4

Tap **[Config]**.

The PIN was set.

Setting a PIN using PC Settings

! When the application is connected to the SoftBank network, the following steps can't be used. Before you start, disconnect it from the network. Then, from the charm, get connected with the network.

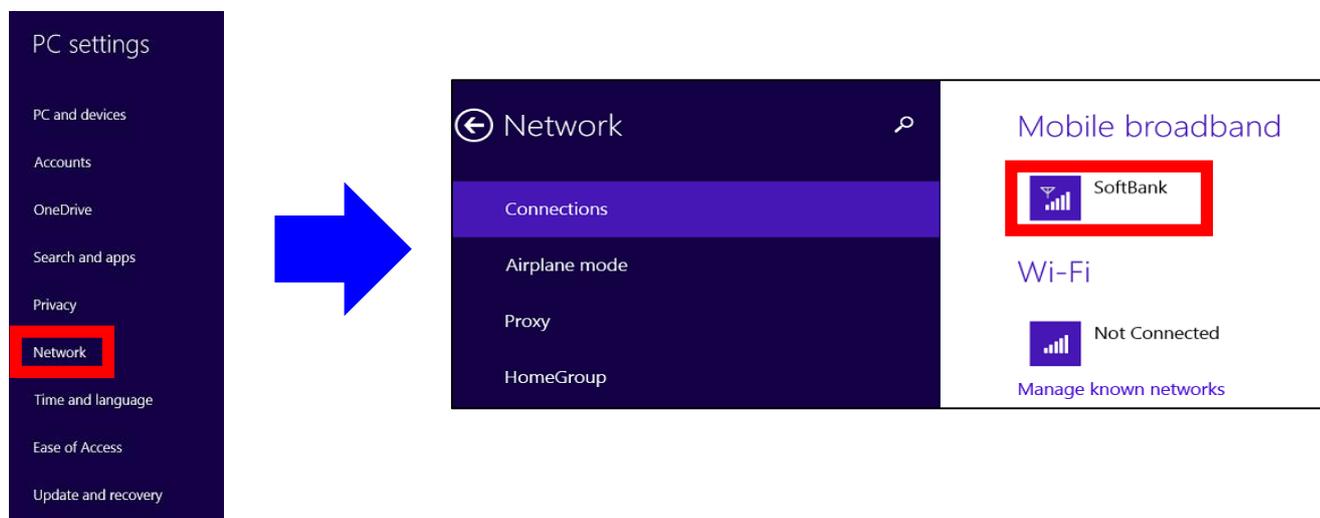

1

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

2

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

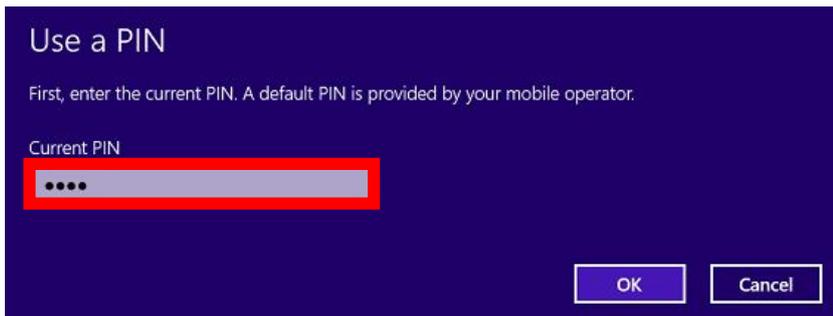

3

Tap **[Security]** -> **[Use a PIN]**.

4

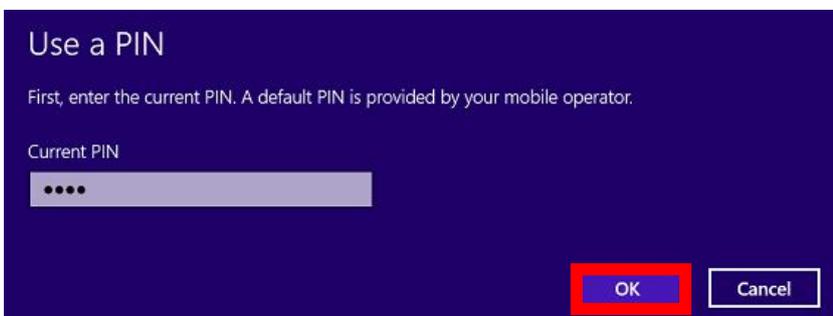

In the box, enter a PIN.

- ! A common default PIN for the USIM card is “9999” at its purchase.
- ! After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

5

Tap [OK].

🚩 The PIN was set.

Changing PINs

Changing PINs using the application

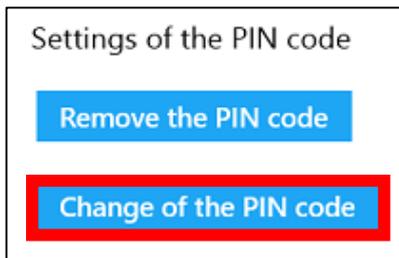

1

Tap **[Network Settings]** on this application home screen.

2

Tap **[Network Settings]** -> **[Terminal]** -> **[Settings of the PIN code]** -> **[Change of the PIN code]**.

3

In the boxes, enter the current PIN and a new PIN.

Enter the current PIN code
The number of attempts left: 3/3 times

Enter the new PIN code

Confirm and enter the new PIN code

Config

! After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

Tap **[Config]**.

Enter the current PIN code
The number of attempts left: 3/3 times

Enter the new PIN code

Confirm and enter the new PIN code

Config

 The PIN was changed.

Changing PINs using PC Settings

 When the application is connected to the SoftBank network, the following steps can't be used. Before you start, disconnect it from the network. Then, from the charm, get connected with the network.

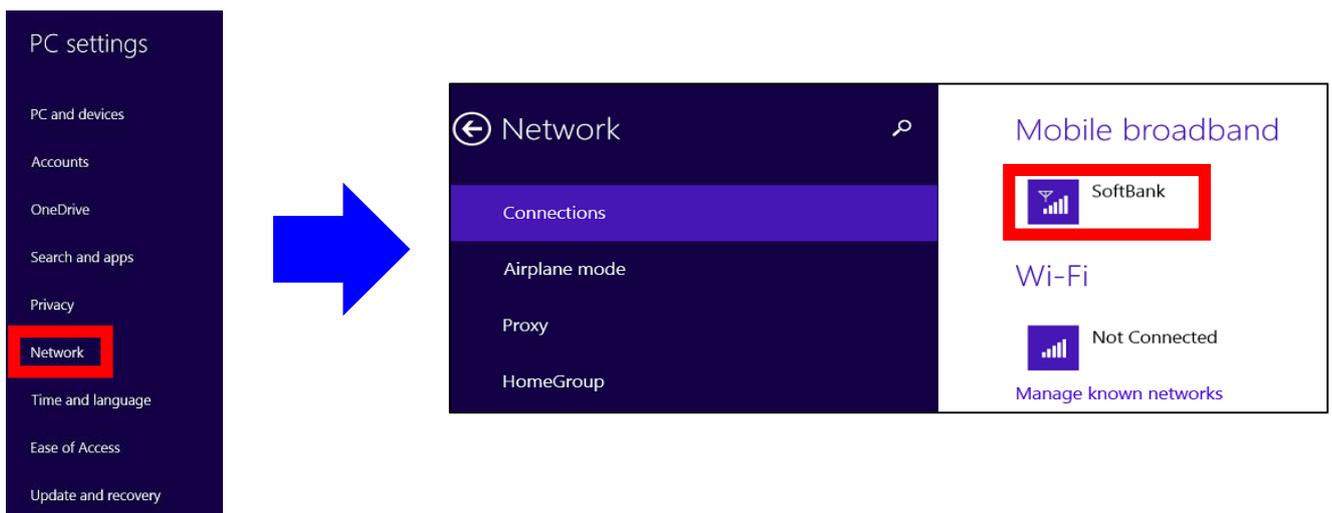

1

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

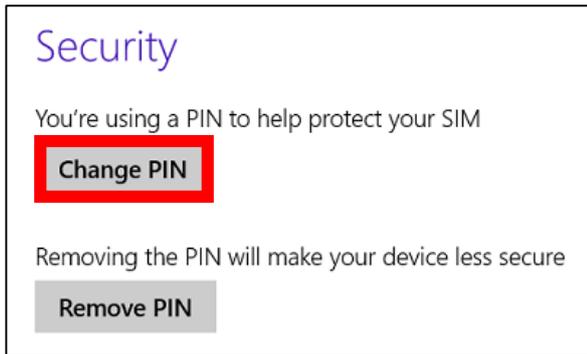

2

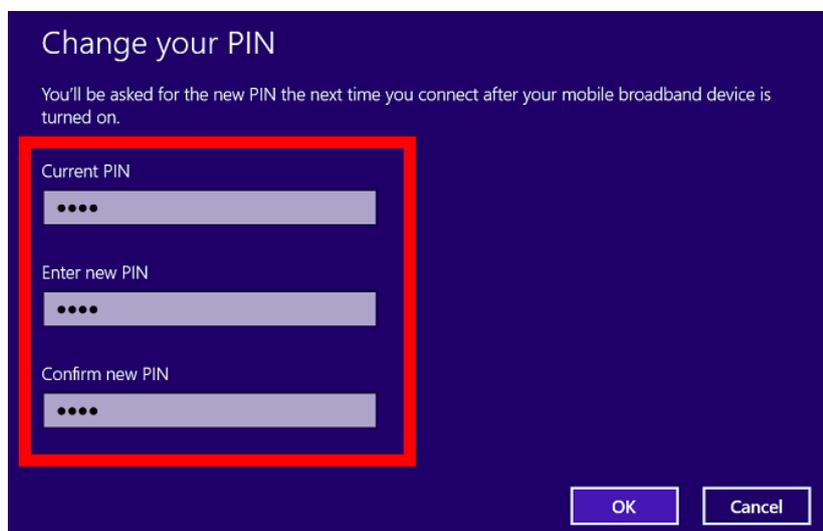

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

Tap **[Security]** -> **[Change PIN]**.

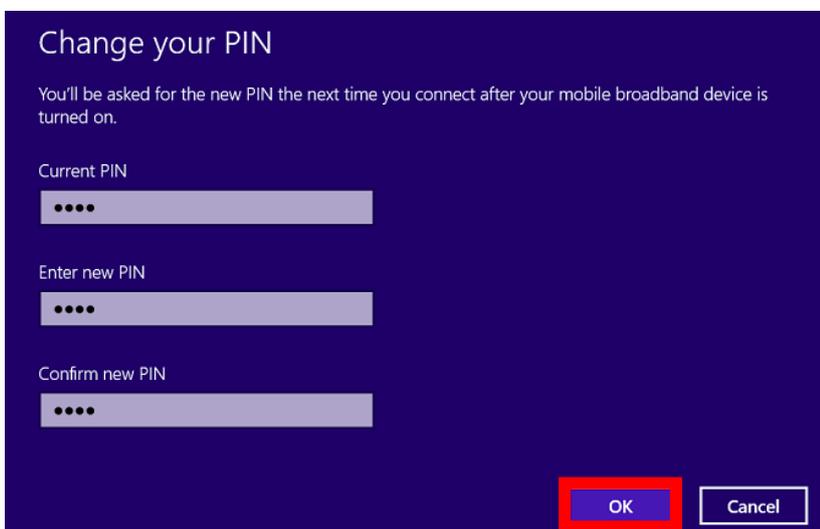

In the boxes, enter the current PIN and a new PIN.

After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

Tap **[OK]**.

 The PIN was changed.

Disabling a PIN

Disabling a PIN using the application

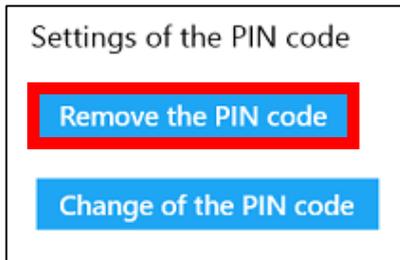

1

Tap **[Network Settings]** on this application home screen.

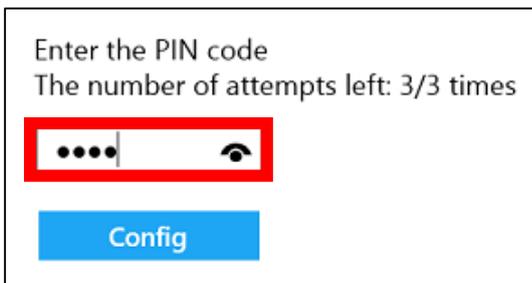

2

Tap **[Network Settings]** -> **[Terminal]** -> **[Settings of the PIN code]** -> **[Remove the PIN code]**.

3

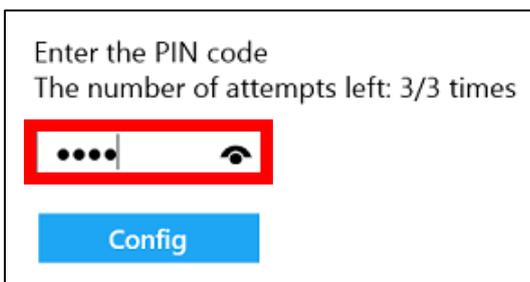

In the box, enter a PIN.

! After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

4

Tap **[Config]**.

 The PIN was disabled.

Disabling a PIN using PC Settings

! When the application is connected to the SoftBank network, the following steps can't be used. Before you start, disconnect it from the network. Then, from the charm, get connected with the network.

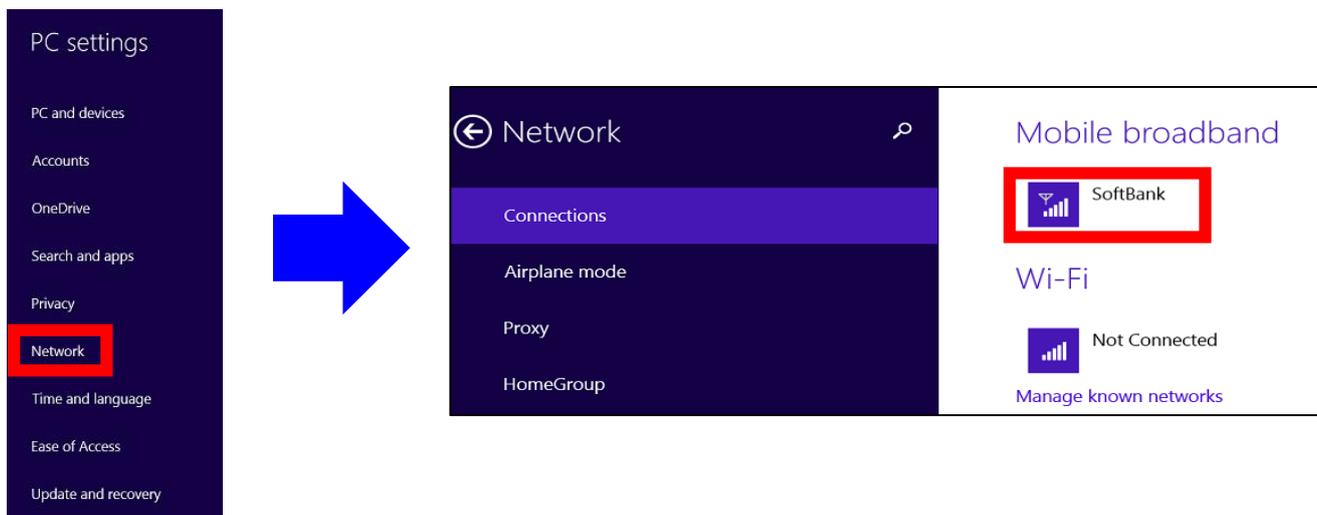

1

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

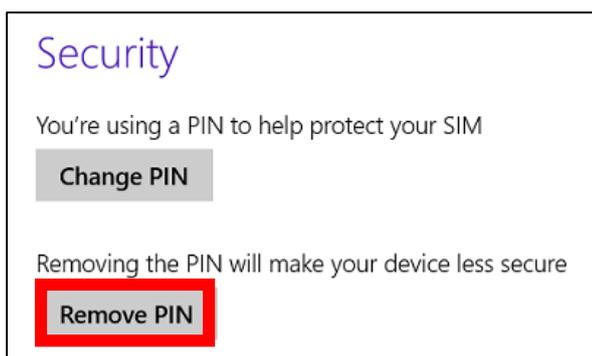

2

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

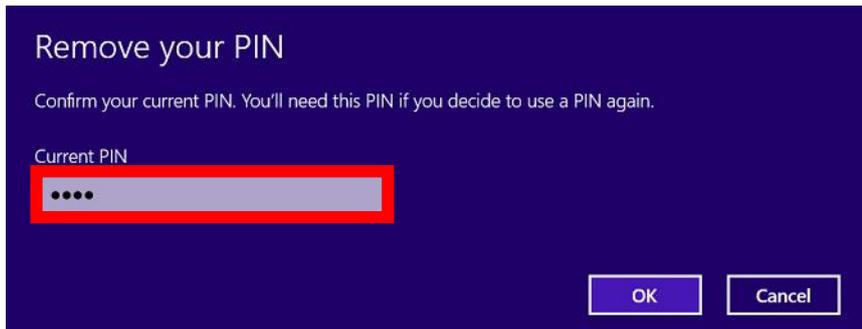

3

Tap **[Security]** -> **[Remove PIN]**.

In the box, enter a PIN.

Remove your PIN

Confirm your current PIN. You'll need this PIN if you decide to use a PIN again.

Current PIN

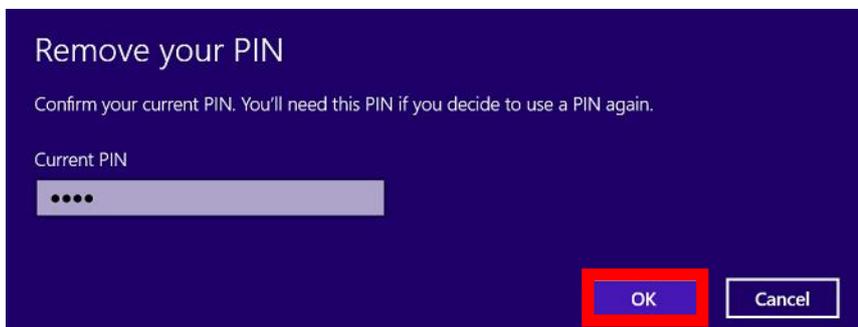

••••

OK Cancel

After three consecutive incorrect PIN code entries, the code is blocked. To unblock it, you need to use the PUK code. Contact SoftBank Business Call Center for this code. (For contact information of SoftBank Business Call Center, see Support Center List.)

Tap [OK].

Remove your PIN

Confirm your current PIN. You'll need this PIN if you decide to use a PIN again.

Choosing a Network

When the application is connected to the SoftBank network, the following steps can't be used.
Before you start, disconnect it from the network.

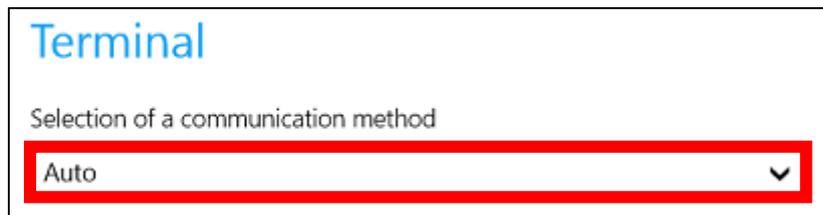

1

Tap **[Network Settings]** on this application home screen.

2

To choose a network, select **[Network Settings]** -> **[Terminal]** -> **[Selection of a communication method]**.

 The network was set.

Viewing the Online Manual

An Internet connection is required to view the online manual.
Perform this procedure while connection to the SoftBank network or Wi-Fi is established.

Tap [**Online Manual**] on this application home screen.

The online manual will be displayed in the browser.

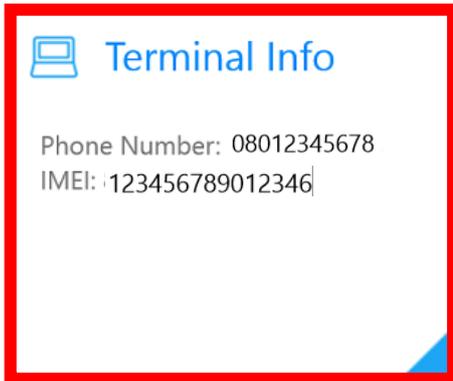

If the browser doesn't start, set Internet Explorer as a default browser of the OS.

Confirming the Terminal Information

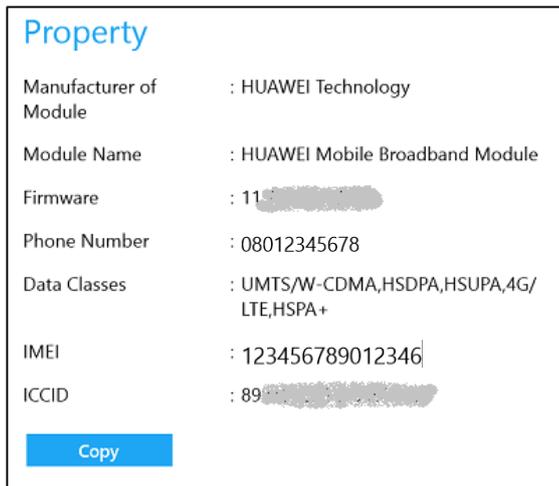

Confirming the terminal information from this application

1

Tap [**Terminal Info**] on this application home screen.

 The terminal information will be displayed.

 You can copy the terminal information by tapping [Copy]. You can paste the copied information to text, etc.

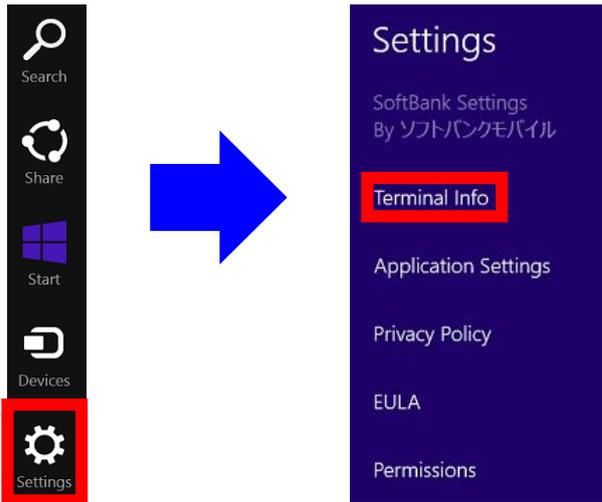

Confirming the terminal information from the charm

1

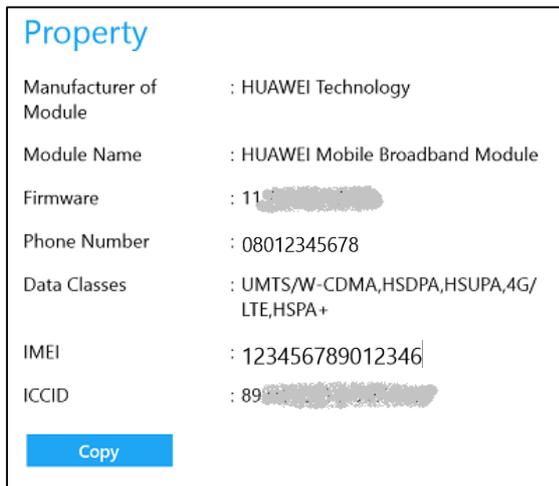

Start this application.

 For how to start this application, see “Starting this application.”

Open the charm and tap **[Settings]** -> **[Terminal Info]**.

The terminal information will be displayed.

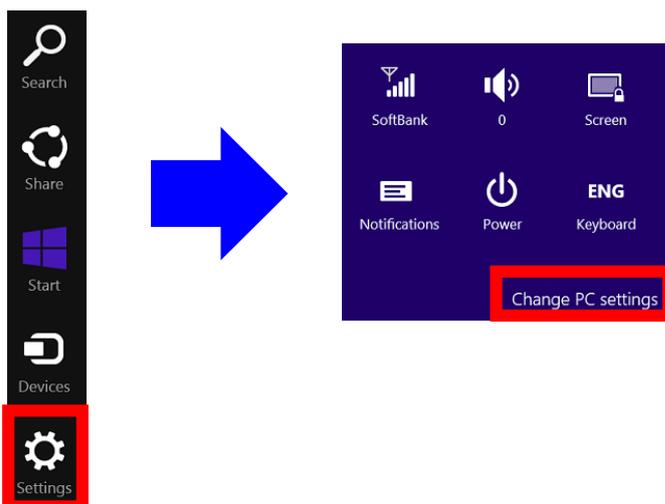

You can copy the terminal information by tapping **[Copy]**. You can paste the copied information to text, etc.

Confirming the terminal information from the PC settings

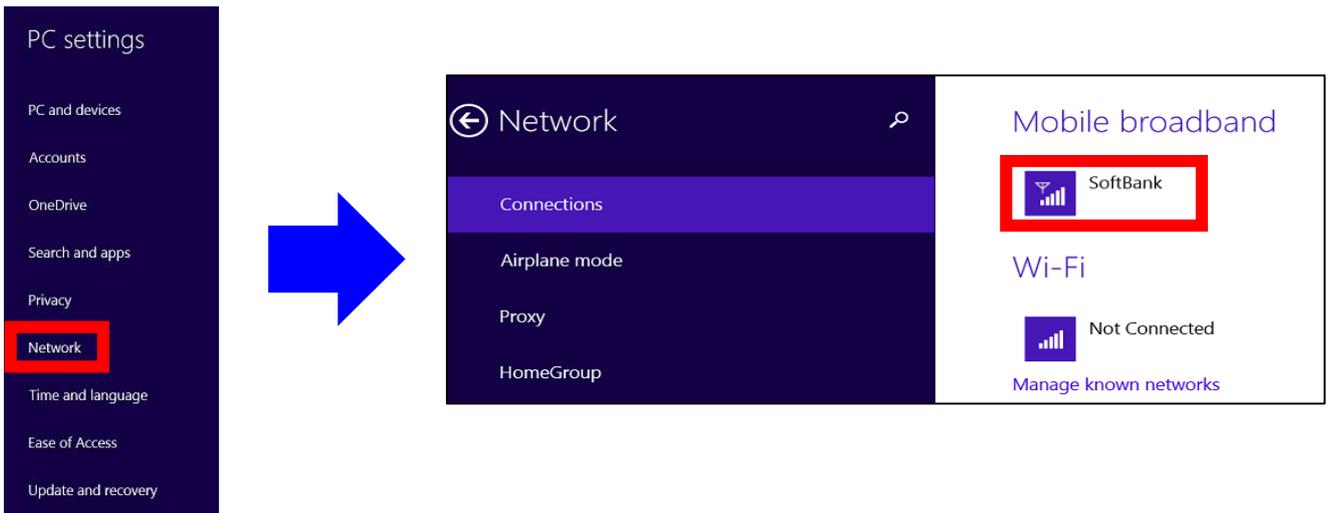

If you connect to the SoftBank network from this application, you cannot perform this procedure. Disconnect from the SoftBank network connection and connect from the charm, and then perform this procedure.

Open the charm and tap **[Settings]** -> **[Change PC settings]**.

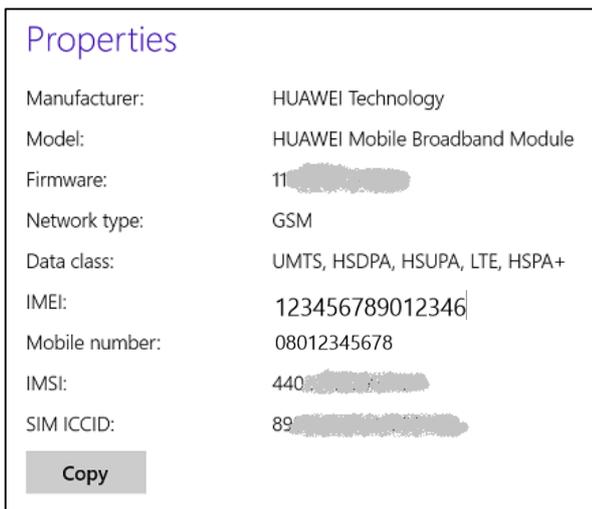

2

Tap **[Network]** -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]**.

3

Confirm **[Properties]**.

! You can copy the terminal information by tapping **[Copy]**. You can paste the copied information to text, etc.

! An information more detailed than the terminal information displayed in this application will be displayed. The contents may be partially different from those displayed in this application.

Viewing the Site of SoftBank for Corporate Customers

Internet connection is required to view the SoftBank site.

Perform this procedure while connection to the SoftBank network or Wi-Fi is established.

1

Tap [**SoftBank Website**] on this application home screen.

The SoftBank site will be displayed in the browser.

If the browser doesn't start, set Internet Explorer as a default browser of the OS.

Initializing the Settings of This Application

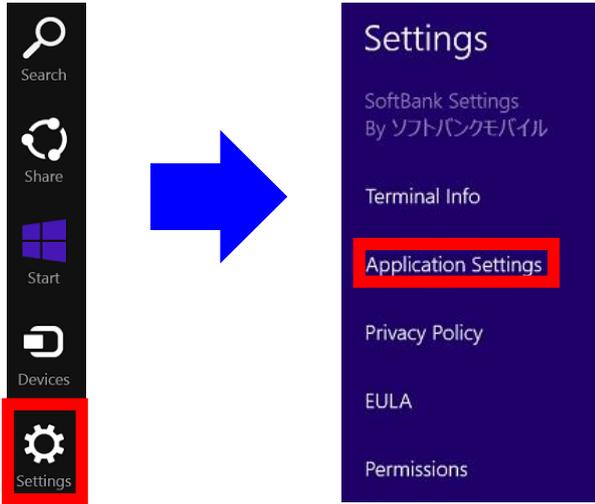

1

Start this application.

! For how to start this application, see “Starting this application.”

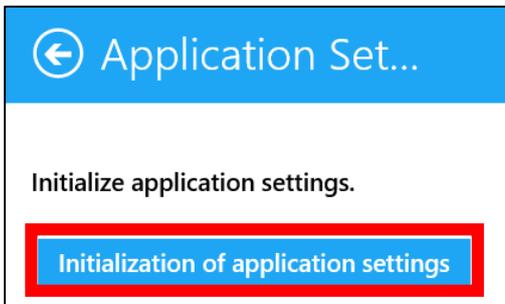

2

Open the charm and tap **[Settings]** -> **[Application Settings]**.

3

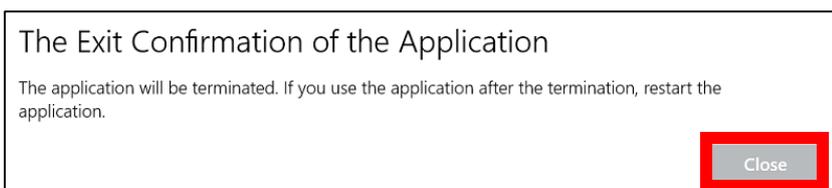

Tap **[Initialization of application settings]**.

! The settings of this application will be initialized.

4

Tap **[Close]** on the application termination confirmation screen.

! All of the contents set in this application will return to the default if initialized. Note that the set information is not saved.

If a configuration file is distributed by the administrator to set/remove the custom APN settings, the ones that are unmodifiable, use the following steps to apply them.

1

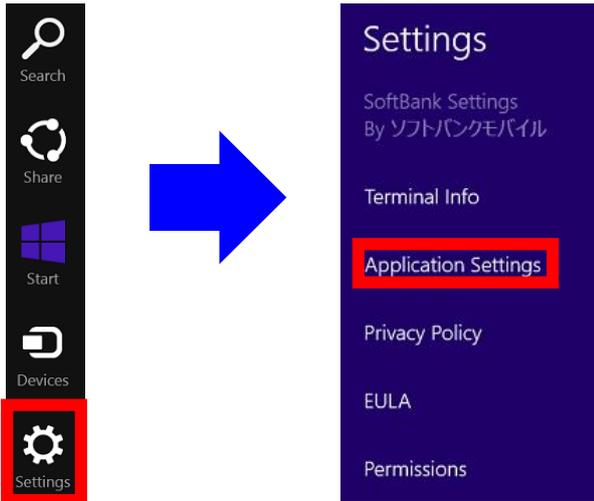

Start this application.

For how to start this application, see “Starting this application.”

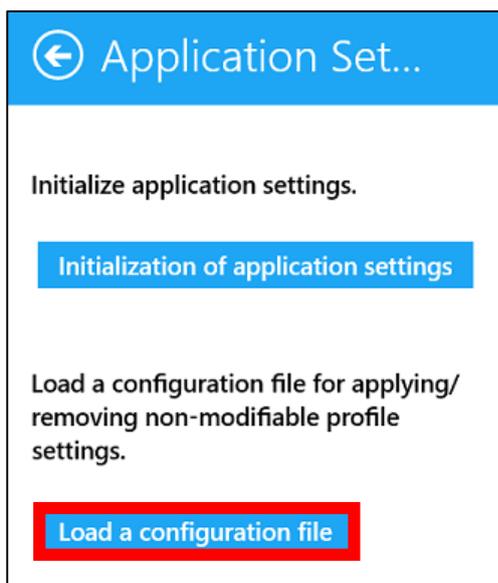

2

Open the charm and tap **[Settings]** -> **[Application Settings]**.

3

To load the custom APN settings included in the file that you saved, tap **[Load a configuration file]**.

 To apply them, restart the application.

Confirming the Privacy Policy

- ! An Internet connection is required to confirm the privacy policy.
Perform this procedure while a connection to the SoftBank network or Wi-Fi is established.

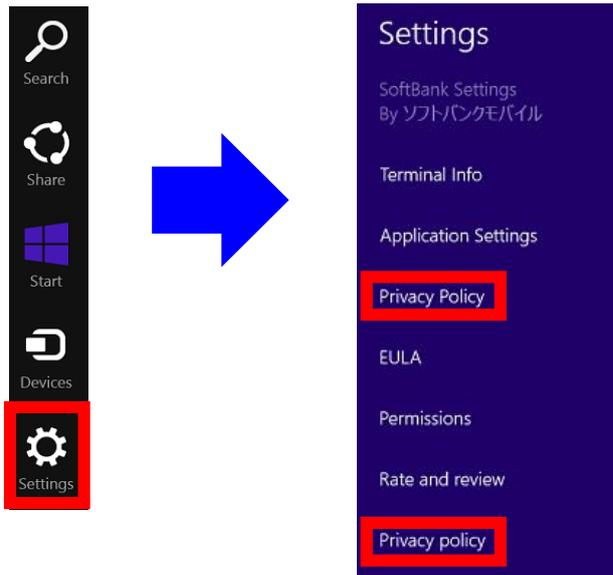

1

Start this application.

- ! For how to start this application, see "Starting this application."

2

Open the charm and tap **[Settings]** -> **[Privacy Policy]**.

- 🚩 The privacy policy will be displayed in the browser.
(Tapping **[Privacy Policy]** at the bottom leads you to Windows® Store, where you can view the Privacy Policy.)
- ! If the browser doesn't start, set Internet Explorer as a default browser of the OS.

Confirming the Software License

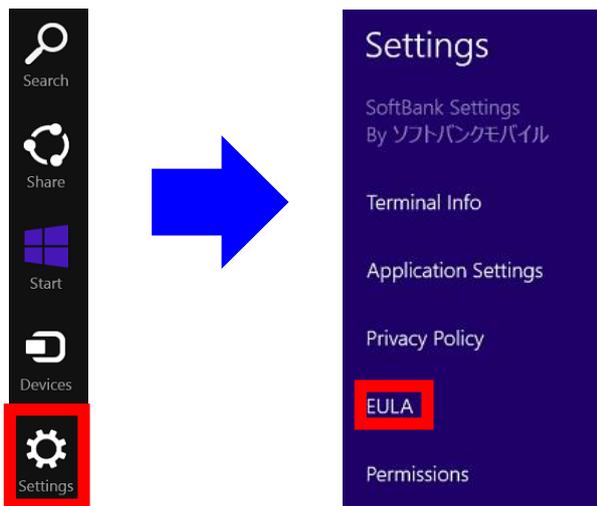

1

Start this application.

! For how to start this application, see "Starting this application."

2

Open the charm and tap **[Settings]** -> **[EULA]**.

🚩 The software license will be displayed.

Enabling to Display Application Notifications

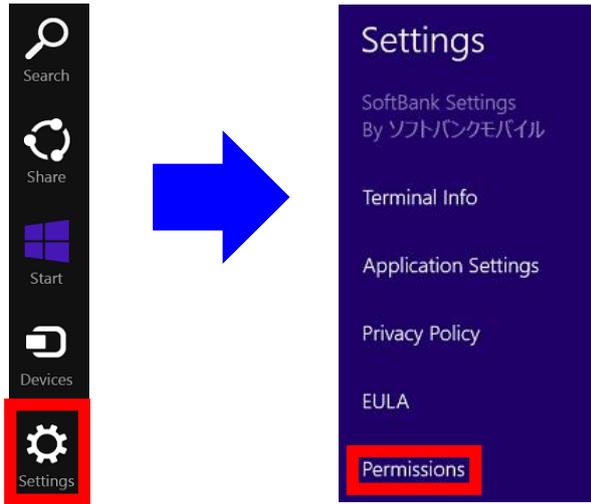

1

Start this application.

 For how to start this application, see “Starting this application.”

2

Open the charm and tap **[Settings]** -> **[Permissions]**.

**3**

Turn on **[Notifications]**.

 The application will be able to display notifications.

Rating and Reviewing This Application

- ! To submit Rate and Review, the device must be connected to the Internet.
When you rate and review the application, make sure that the device is connected to the SoftBank network or a Wi-Fi network.

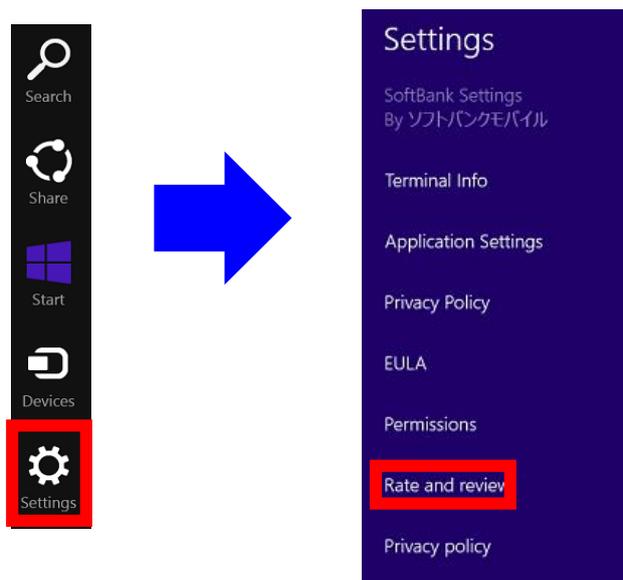

1

Start this application.

- ! For how to start this application, see "Starting this application."

2

Open the charm and tap **[Settings]** -> **[Rate and review]**.

🇺🇸 In Windows® Store, you can submit review for the application.

Confirming the Version of This Application

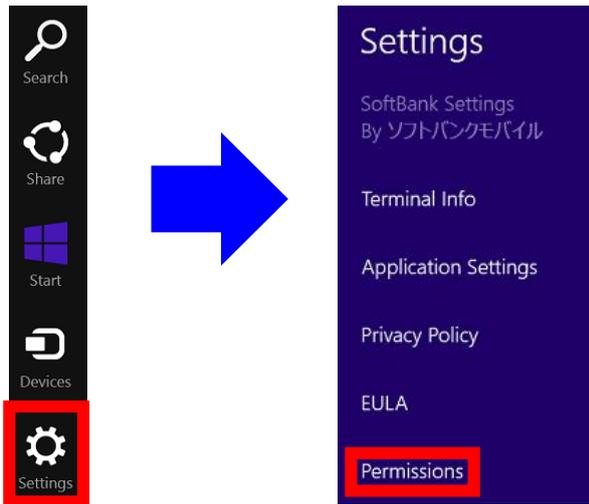

1

Start this application.

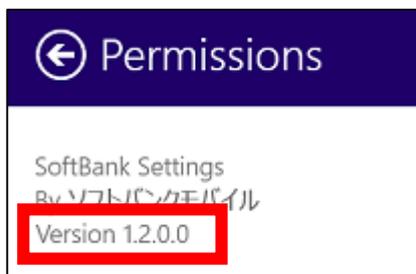

! For how to start this application, see "Starting the SoftBank settings."

2

Open the charm and tap **[Settings]** -> **[Permissions]**.

**3**

Confirm the version on the following screen.

Coping with Trouble

Troubleshooting.....	68
Support Center List.....	71

Before considering your device is out of order

If any problems are not solved even after confirming the details of the problems, contact our customer support.

? Q&A

Q. **[SoftBank]** is not displayed in mobile broadband.

A. See "Mobile network display contents and coping measures" to perform the coping measure corresponding to the display content.

Q. An error screen is displayed in this application.

A. See "Error messages and coping measures" and perform the coping measure corresponding to the error message.

Q. **[Connect]** cannot be selected in this application.

A. Open the charm and confirm the status of the following setting.

- Mobile broadband

=> If this is off, change it to on.

=> If "No service" is displayed, confirm troubleshooting.

- Airplane mode

=> If this is on, change it to off.

Q. If **[Connect]** is tapped in the application, an error message appears.

A. Go to **[Profile Settings]** in the application. Check whether the information set with the default APN is correct.

Q. Cannot connect to the slave unit by tethering.

A. Confirm whether the SSID and password for tethering of the main unit are set correctly for the slave unit.

For the procedure to confirm the SSID and password for tethering of the main unit, see "Connecting to slave units by tethering."

A. Confirm that the number of the Wi-Fi units connected to the target model simultaneously is less than 10.

If 10 units are connected simultaneously, reduce the number of the units connected simultaneously to 9 or less.

The number of the units connected simultaneously can be confirmed by the following procedure.

[Procedure]

Open the charm and confirm the number of units displayed in **[Settings]** -> **[Change PC settings]** ->

[Network] -> **[Connections]** -> **[Mobile broadband]** -> **[SoftBank]** -> **[Share this connection]** ->

[Devices connected].

Q. The settings of **[SoftBank]** in **[PC Settings]** cannot be displayed.

A. The settings of **[SoftBank]** cannot be displayed while this application connects to the SoftBank network.

Confirm it after disconnecting the SoftBank network connection or connecting to the SoftBank network from the charm.

Q. **[Profile Settings]** is unavailable in the application.

A. Update the device's firmware to the latest version.

For how to update the firmware, visit the SoftBank for Corporate Customers website

(<http://mb.softbank.jp/biz/>).

Q. The application does not provide **[Profile Settings]** and **[Settings of the PIN code]**.

A. Make sure that the version of the application is 1.2.0.0 or later.

If not, update the application to the latest version.

For how to update the application, visit the SoftBank for Corporate Customers website

(<http://mb.softbank.jp/biz/>).

? Mobile network display contents and coping measures

Displayed contents	Coping measures
Insert a SIM [Screen example] 	<ul style="list-style-type: none"> - Insert the prescribed USIM card to which the price plan specified by SoftBank is registered to each target model. - If the USIM card has already been inserted, turn off the power of the target model and insert the USIM card again in the correct orientation. - If the USIM card is not inserted, turn off the power of the target model and insert the USIM card again in the correct orientation.
Unnamed Locked [Screen example] 	<ul style="list-style-type: none"> - Release PIN by the following procedure because PIN lock is set. [PIN release procedure] <ol style="list-style-type: none"> 1. Tap [Unnamed] -> [Connect] and display the PIN entry screen. 2. Enter the correct PIN in the PIN entry screen. 3. Tap [next]
No service [Screen example] 	<ul style="list-style-type: none"> - Insert the prescribed USIM card to which the price plan specified by SoftBank is registered to each target model. - Turn off the power of the target model and insert the USIM card again in the correct orientation. - Use it in the SoftBank network area because you may be outside the SoftBank network area.
SoftBank logo() is not displayed. [Screen example] 	<ul style="list-style-type: none"> - Turn off the power of the target model and insert the USIM card again in the correct orientation. - Connect to wireless LAN if possible. The settings file is downloaded via the Internet (automatically) and the logo will be displayed if the download is completed. *In some situations, it is necessary to remove the USIM card and insert it again. - All-reset the target model. [All-reset procedure] <ol style="list-style-type: none"> 1. Open the charm and tap [Settings] -> [Change PC settings] -> [Update and recovery]. 2. Tap [Get started] in [Recovery] -> [Remove everything and reinstall Windows].
Mobile broadband is not displayed.	<ul style="list-style-type: none"> - If the airplane mode is on, turn it off. - Turn the power off and on. - Wait for a few moments because it may take time until mobile broadband is displayed.

? Main error messages and coping measures

Error message	Coping measures
<p>Communication Module Error Unable to find the available communication module or USIM card. Make sure the service is available for the communication module. If the USIM card is not inserted, insert it.</p>	<ul style="list-style-type: none"> - Confirm whether the unit you are using is the target model. => For the target model, confirm the "Read Me." - Insert the prescribed USIM card to which the price plan specified by SoftBank is registered to each target model. - If the USIM card has already been inserted, turn off the power of the target model and insert the USIM card again in the correct orientation. - If the USIM card is not inserted, turn off the power of the target model and insert the USIM card again in the correct orientation.
<p>Connection / Disconnection Error Unable to disconnect the current connection from the application. Display charms of the connection list.</p>	<ul style="list-style-type: none"> - Disconnect from the mobile broadband [SoftBank] in the charm. => For the procedure, see "Connecting/Disconnecting the SoftBank network."
<p>Connection / Disconnection Error Specified APN is incorrect. Check the setting contents of the connection profile.</p>	<ul style="list-style-type: none"> - Check [Profile Settings] in the application to see if the information set for the default APN is correct. It must be set correctly. => For how to set, see "Using Profile Settings."
<p>Tethering Authentication Error Authentication failed. The password being entered is not correct. Set up the correct tethering password.</p>	<ul style="list-style-type: none"> - Confirm and set the correct tethering password. => For the procedure, see "Setting the Tethering Password."
<p>Tethering Authentication Error Authentication failures exceeded a fixed number of times allowed for a day. After checking the tethering password is correct, set up again from the following day.</p>	<ul style="list-style-type: none"> - Set the tethering password again in the following day and days afterwards. => For the procedure, see "Setting the Tethering Password."
<p>Tethering Authentication Error Authentication server name could not be resolved. After checking the network connection state, set up again.</p>	<ul style="list-style-type: none"> - Set the tethering password again with connection to the SoftBank network or established Wi-Fi. => For the procedure, see "Setting the Tethering Password."
<p>Tethering Authentication Error A time out occurred when communicating with authentication server. After checking the network connection state, set up again later.</p>	<ul style="list-style-type: none"> - Wait for a few moments and set the tethering password again with connection to the SoftBank network or established Wi-Fi. => For the procedure, see "Setting the Tethering Password."
<p>Tethering Authentication Error Unavailable because you have not joined the tethering service.</p>	<ul style="list-style-type: none"> - Application is required to use tethering. => For the subscription status, contact "SoftBank Business Call Center."
<p>Tethering Authentication Error This is a tethering password error. Set up the correct tethering password.</p>	<ul style="list-style-type: none"> - Confirm and set the correct tethering password. => For the procedure, see "Setting the Tethering Password."
<p>Tethering Authentication Error A connection with authentication server could not be established. After checking the network connection state, set up again.</p>	<ul style="list-style-type: none"> - Wait for a few moments and set the tethering password again with connection to the SoftBank network or established Wi-Fi.
<p>On/Off Error of Tethering A time out occurred when communicating with authentication server. After checking the network connection state, set up again later.</p>	<ul style="list-style-type: none"> - Wait for a few moments and set tethering again with connection to the SoftBank network or established Wi-Fi.
<p>On/Off Error of Tethering The tethering service is not available. Check the service is available for the terminal, or the contents of the contract.</p>	<ul style="list-style-type: none"> - Confirm whether the unit you are using is the target model. - Confirm the subscription status. An application is required to use tethering. => For the subscription status, contact "SoftBank Business Call Center."
<p>On/Off Error of Tethering The tethering password is not set up. Set up the tethering password.</p>	<ul style="list-style-type: none"> - Set the tethering password. => For the procedure, see "Setting the Tethering Password."
<p>On/Off Error of Tethering Wi-Fi is not available. If Wi-Fi is turned off, turn it on.</p>	<ul style="list-style-type: none"> - Turn on the Wi-Fi setting of the target model from the charm.
<p>On/Off Error of Tethering A connection with authentication server could not be established. After checking the network connection state, set up again.</p>	<ul style="list-style-type: none"> - Wait for a few moments and set tethering again with connection to the SoftBank network or established Wi-Fi.

Support Center List

If you have any trouble or questions, feel free to contact either of the following support centers. Be careful not to dial the numbers incorrectly.

 For support for the main unit of the target model and inquiries on the service such as the upgrade of the OS, read the manual of each target model, etc. and follow the procedure prescribed by each manufacturer.

Lenovo Smart Center

■ Inquiries on the ThinkPad 10 for SoftBank (operating instructions, troubleshooting, etc.)

Toll-free number: 0120-000-817

Operating hours: 9:00 to 18:00

(excluding the monthly specified non-business days of Lenovo/December 30th to January 3rd)

Softbank Business Call Center

■ Inquiries on the communication service/communication charge

Toll-free number: 0800-919-3909

Operating hours: 9:00 to 18:00

(excluding Saturday, Sunday, and holidays)
