*The acquisition of a wholesale telecom network provider to Sprint, by Sprint's affiliate company in May 2016. An affiliate company refers to a local wireless operator that sells and provides Sprint-branded services and products with its own self-operated telecom network while paying Sprint for brand and spectrum usage. This resulted in an increase of 270 in the cumulative number of subscribers on the Sprint platform. Furthermore, certain existing subscribers were reclassified.

*Each of Sprint's prepaid brands had an active period for the line of between 60 and 150 days from the date of initial activation or replenishment. On December 31, 2016, Sprint unified the active period for the line as 60 days for all prepaid brands.

As a result, 1,234,000 prepaid subscriptions and 21,000 affiliate subscriptions were cancelled. The number of these cancellations are excluded from calculation of churn rate.

*Net additions exclude the impact of the above two factors.

Definitions and Calculation Methods of Principal Operational Data

*Cumulative subscribers and net additions include the number of communication module service subscribers.

*Phone: smartphones and feature phones.

*Clearwire: subscribers acquired through the acquisition of assets from Clearwire Corporation.

*ABPU: Average Billings Per User per month

$ABPU = (\text{telecom revenue} + \text{equipment billings}) / \text{number of active subscribers (rounded to the nearest USD .01)}$

Equipment billings: the sum of lease fees under the leasing program and installment billings under the installment billing program.

*ARPU: Average Revenue Per User per month

$ARPU = \text{telecom revenue} / \text{number of active subscribers (rounded to the nearest USD .01)}$

*ABPU/ARPU for postpaid phones are calculated by dividing the relevant telecom revenue and equipment billings by its number of active subscribers.

*Churn rate: average monthly churn rate

$\text{Churn rate} = \text{number of deactivations} / \text{number of active subscribers (rounded to the nearest 0.01\%)}$

Deactivations: the total number of subscribers that churned during the relevant period. The number of deactivations excludes the number of subscribers who switch between prepaid and postpaid.

*Number of active subscribers: the total of the monthly numbers of active subscribers for the relevant period
(subscribers at the beginning of the month + subscribers at the end of the month) / 2

(1) Mainly reclassification of depreciation and amortization to "cost of services and products" and "SGA."

Interest from asset retirement obligations (USD 34 million) is recorded as operating cost under US-GAAP and finance cost under IFRSs.

(2) Under US-GAAP, provision for network infrastructure restructuring (iDEN, Clearwire, etc.) is recognized when the payment obligation is probable.

Under IFRSs, the provision is recorded when detailed formal plan is publicly announced (provision was booked at the timing of acquisition).

(3) Under US-GAAP, the discount rate used to measure the asset retirement obligation (ARO) is only updated if the forecast cash outflows increases. Under IFRSs, the discount rate is updated as of the balance sheet date.

(4) Agent and upfront fees are expensed when incurred under US-GAAP, deferred as an asset or deducted from liability and amortized over the life of the agreement (2 years) under IFRSs.

(5) Sprint (US-GAAP) does not recognize depreciation on wireline property, plant, and equipment which impairment loss was recognized during the fiscal year ended March 2015. Under US-GAAP, wireless segment and wireline segment are treated as separate reporting units and impairment test was performed at the individual asset level or asset groups. SBG (IFRSs) continuously recognized depreciation since impairment loss was not recognized, as Sprint is treated as a single cash-generating unit and all assets were tested together for impairment.

(2) Sprint (US-GAAP) recognized impairment loss on Sprint trade name in the wireless segment and wireline property, plant, and equipment during the fiscal year ended March 2015. Under US-GAAP, wireless segment and wireline segment are treated as separate cash-generating units and impairment test was performed at the individual asset level or asset groups. SBG (IFRSs) recognized no impairment loss as Sprint is treated as a single cash-generating unit and all assets were tested together for impairment.

(6) Goodwill adjustments are as follows.

i. In relation to the acquisition of Sprint, SBG entered into foreign currency forward contract, out of which USD 17.0 billion was accounted for under hedge accounting.

The fair value on the acquisition date of this hedging instrument (USD 3,081 million) is deducted from goodwill (basis adjustment).
