SoftBank 301Z

Quick Start Guide

Thank you for purchasing "SoftBank 301Z"

- Before using SoftBank 3012, read "Quick Start Guide (this guide)," and
 "User Guide," then properly handle it.

 Verify User Guide at SoftBank Mobile Website from

- (http://www.softbank.jp/en/mobile/product/prepaid/301z/).

 Handset is a mobile phone that supports SoftBank Mobile's Simple Style 3G phone plan. See, "Simple Style User Guide (Japanese)" for details

 Handset does not support Yahoo! Keitai.
- Subscribers of "Unlimited Mail" can set Fmail related settings to make
- My SoftBank can only be used during "Unlimited Mail" period of validity.
- hanges to Email addresses, etc. via My SoftBank
- SoftBank 301Z supports 3G format

- Reproduction of the contents of this guide in part is prohibited.
- Contents of this guide are subject to change without notice.

 Every effort has been made in preparation of this guide. Should you notice. any unclear points, omissions, etc., feel free to contact us (see "Customer

Package Contents

- Quick Start (Japanese) Quick Start Guide (This guide)
 - Warranty (Handset, AC Charger)
- Keep warranty and accessories in a safe place.
- Handset supports microSD™/microSDHC™ Card (hereafter, SD Card). Purchase a commercial SD Card to use

Handset Manners and Rules

For the Sake of Safety

■ Let's Not Do These Things

- Do not repair whereas you disassemble, modify or solder. May cause fires, injuries.
- and electric shock accidents, or malfunctions. Do not drop, throw or subject to strong impacts. May result in malfunctions, etc. Do not place handset into cooking devices (microwave ovens, etc.), high pressure

containers (pressure cookers, etc.), or place on top of electromagnetic cookers

- (induction heating cookers). May result in malfunctions, etc. • Do not use or leave in places that get hot (near fires, heating apparatuses, places exposed to direct sunlight, inside of cars, etc. under the blazing sun). May cause deformation of handset, or malfunctions. In addition, a portion of the case gets hot
- which may cause burns, etc. ●Be careful since handset gets hot via prolonged usage or charging in places subject to high temperatures (near open flames, heating equipment, places exposed to direct sunlight, or inside of cars on hot days, etc.), in addition, in warm places or places easily stifled with heat (kotatsus, electric blankets and pocket heaters in pockets, etc.). Low temperature burns may result if handset is kept in contact with skin for a long time.

Let's Maintain Etiquette!

Usage Prohibited for the Sake of Safety

- May be detrimental to safety of aircraft. Powering on mobile phones on board
- Do not use in places where handset usage is prohibited such as hospitals
- Do not use near priority seats in trains, or buses, etc. May affect life dependent
- Since lightning might strike when thunder is heard outdoors when on golf

Power off handset on board airplanes.

- airplanes is prohibited by law, and is subject to criminal punishment
- laboratories, etc. May affect medical devices, etc.
- devices such as pacemakers, etc.
- courses, etc., do not use.

Customer Service

Battery Terminals

Internal Communication Antenna

• Do not cover over with stickers, or your hands, since sensitivity may be affected.

Installing USIM Card

IC card that is loaned to you from SoftBank to use handset is called a USIM Card, information such as your phone number, etc. are saved on it. Install a USIM Card to use handset. Refer to USIM Card instruction manual

Open Battery Cover

- Use your finger to lift up Battery Cover with indentation. Gradually remove Cover along the circumference after creating a gap between Battery Cover and handset.
- Be careful to not damage your fingernail.

Insert USIM Card with IC facing down, all the way in Confirm that USIM Card is perfectly installed

3 Close Battery Cover

Completely press and close Battery Cover so that it snaps shut such that there are not any gaps between Battery Cover and handset.

Installing Battery

Open Battery Cover

2 Install Battery

Insert Battery terminals so that they match with handset's terminals as shown 1, then press it in as shown 2.

3 Close Battery Cover

• Since handset will no longer properly function if Battery is removed while in use, absolutely do not remove it while handset is powered on.

Charging Battery

When purchased, Battery is not sufficiently charged. Be sure to charge then use, when initially using.

- Insert Micro USB Cable USB plug into AC Charger 2 Insert Micro USB Cable Micro USB plug into
- **External Device Port**

3 Plug AC Charger into household AC outlet While charging, Battery indicator <u> un</u> appears

- If handset and computer are connected with the supplied Micro USB Cable, handset can be charged via a computer.
- Do not use any other AC Charger or Micro USB Cable other than the ones supplied to charge handset. May cause malfunction

301Z, Battery (ZEBAT1), USIM Card, AC Charger (ZECAP1), Micro USB Cable (ZEDAD1)

<u>_</u> DANGER

Do not charge, use or leave handset in places subject to high temperatures (near open flames or heating equipment, in direct sunlight or inside of cars on hot days). Also, do not charge, use or leave handset in warm places (inside of hermetically-closed bag or pocket, inside of kotatsus, electric blankets, or inside pockets together with pocket heater, etc.) where heat easily builds up since same risks might be incurred.

May cause deformation and malfunction of handset, or cause Battery to leak, overheat,

ingite and rupture. Also, a portion of the case might get how believing year, overhead, in liquities and rupture. Also, a portion of the case might get how which may cause burns, etc. When installing Battery, and connecting AC Charger or Micro USB Cable, if they cannot be smoothly installed or connected, do not force them. Check orientation of Battery and terminals, then install and connect. May cause Battery to leak, overheat, rupture and Ignite. Also that may cause Battery

minals to get damaged or burned. Do not exert excessive force on the exterior of handset and charger by

stepping on them when they are connected.Charging when terminals are damaged may cause malfunction or fire. When charging, be careful of where you use and handle handset and charger. Do not disassemble/modify/solder handset.

May cause fire, injury, electric shock or malfunction. In addition, that may cause Battery to leak, overheat, rupture or ignite. Modifying handset is a violation of Radio Law and subject Keep liquids away from handset.

When liquids such as water or pet urine get in, if it is left wet, and wet Battery is charged, that may cause overheat, electric shock, fire, injury or malfunction. Be careful of where you Use SoftBank specified devices (Battery, AC Charger, or Micro USB Cable) only.
Use of non-specified devices may cause Battery to leak, overheat, rupture or ignite; or may cause AC Charger, Micro USB Cable to overheat, ignite or malfunction.

⚠WARNING

Do not place handset, Battery, AC Charger, or Micro USB Cable in a microwave oven or pressure cooker, or on an induction cooktop.

May cause Battery to leak, overheat, rupture or ignite; or may cause handset, AC Charger, Micro USB Cable to overheat, emit smoke, ignite or malfunction.

301Z

Do not use handset while operating vehicles such as automobiles, motorcycles, and bicycles, etc.

May cause traffic accidents. Usage of mobile phones while operating vehicles is prohibited by law, and is subject to criminal punishment. For drivers who are going to use handset, park in safe places where parking is not prohibited, then use.

Do not cover or wrap with clothing or bedding during charging. Also do not sleep with it covered over by blankets or bedding. Heat may build up resulting in fire, burns, or maffunction.

leat may build up resulting in fire, burns, or malfunction Keep handset power off near high precision electronic devices or devices using weak signals. Handset may cause these devices to malfunction.

evices that may be affected aring aids, implanted cardiac pacemakers, implanted defibrillators ar ctronic medical equipment; fire alarms, automatic doors and other automat

Power off handset on board airplanes. If set (alarm functions, etc.) to automatically power on, deactivate setting then power off.
May be detrimental to aircraft safety. Powering on mobile phones on board airplanes is prohibited by law, and is subject to criminal punishment.
People with weak hearts, be careful when setting vibration (vibrates) or

volume of incoming communications. May cause heart problems.

If thunder is heard while outside, immediately seek shelter.
Failing to do so may attract lightning and cause electric shock.

ACAUTION

Do not use handset in a vehicle if it affects in-vehicle electronic devices. Use of handset in some types of vehicles may, in some rare cases, affect in-vehicle electronic devices and interfere with safe driving.

Keep handset away from magnetic cards.
Failing to do so may cause magnetic data on a cash card, credit card, telephone card or deam of the card o

loppy disk to be lost. If skin abnormality occurs with use of handset, immediately discontinue use

If skin abnormality occurs with use of handset, immediately discontinue use and consult a doctor.

Handset contains metals, etc. Depending on your physical condition, you may experience itchiness, rash, etc. (--Material List)

If handset is used for a long time, do not charge, use or leave handset in places subject to high temperatures (near open flames or heating equipment, in direct sunlight or inside of cars on hot days). In addition, be careful since handset and charger get hot in warm places or places (kotatsus, electric blankets and pocket heaters in pockets, etc.) easily stiffed with heat.

Touching with skin and using for a long time may cause low temperature burns.

General Notes

General Use

• If a USIM Card, or a USIM Card equipped handset is stolen or lost, be sure to contact Customer Service (→Customer Service), after contacting us, perform emergency usage suspension

Handset Use & Electronic Medical Equipment

The contents printed herein were referenced from contents of, "Policies in Regards to Usage of Mobile Telephone Terminals, etc. for Preventing the Effects of Radiowaves on Electronic Medical Equipment," (Electromagnetic Compatibility Conference Japan (April 1997)), and "Policies for Preventing the Radiowaves Used by Various Devices from Exerting Effects upon Implanted Medical Devices," (Ministry of Internal Affairs and Communications [January 2013]).

defibrillators.

When using electronic medical equipment (other than implanted cardiac pacemakers/defibrillators) outside of medical institutions, consult device manufacturer about influence of radio waves.

Radio waves may interfere with operation of electronic medical equipment.

Handset radio waves may affect electronic medical equipment. Observe these guidelines in medical institutions:

• Do not bring handset into an operating room, ICU (Intensive Care Unit) or CCU (Coronary Care Unit).

(Coronary Care Unit). Turn off handset in hospital wards. If set (alarm functions, etc.) to automatically

power on, deactivate the setting then power off.

• Turn off handset even in lobbies or areas where use is permitted if there is electronic medical equipment nearby.

• Observe instructions of individual medical institutions and do not use or bring

handset into prohibited areas.

Since persons who might have implanted cardiac pacemakers or implanted defibrillators may be in the vicinity, if you cannot ensure that a distance of 15 cm or more can be maintained in crowded conditions where you cannot freely move, switch handset in advance to a state (e.g.: Flight Mode) whereas it cannot be used to communicate, or either power off mobile phones. If set (alarm functions, etc.) to automatically power on, deactivate setting then power off.

Radio waves may interfere with operation of implanted activates.

ves may interfere with operation of implanted cardiac pacemakers or implanted defibrillators

Intellectual Property Rights

Portrait Rights

Portrait rights are the right for someone to be able to assert that they do not wish to have their photograph taken without permission by other people, nor to have taken photographs be disclosed, nor to be used without permission. Portrait rights may be personal rights that are acknowledged by everyone, and may be property rights that focus attention on the economic benefits (publicity rights) of celebrities, etc. Consequently, since the unauthorized taking, publicizing, and distribution of the photographs of other people and celebrities may constitute malfeasance, please endeavor to ppropriately use camera functions

Copyrights

The rights of works and the owners of copyrights are protected in accordance with the copyright laws for music, images, computer programs, databases, etc. Replication of these works can only be conducted for the purpose of personal or household usage. Beyond the objectives of the aforementioned, if distribution of these replications (including data format conversions), modifications, and transferral of replicates is conducted over networks without comprehension of the right holders then one might be liable to claims for indemnification for damages and criminal punishment with regard to "copyright infringements," and "infringements of the author's moral rights." When handset is used for making replications, etc., beyond observing copyright laws, we request that you endeavor to engage in appropriate usage. In addition, since handset is equipped with camera functions, we wish to request that you endeavor to engage in usage appropriate in a manner likewise to the aforementioned.

Do not personally engage in replicating or modifying, disjoining from the hardware, reverse assembling, reverse compiling, and reverse engineering of the software in its entirety or in portion which is equipped in handset, nor allow third parties to do so without permission of the separate copyright owners. Also do not engage in such usage.

Software Updates

Use the network to check whether handset software needs updating, update it when required

Checking/updating does not incur communication charges. It takes about 30 minutes to update software. Handset cannot be used until updating is completed.

Check that Battery level is adequate before updating software. Update software in a place where signal is good, do not move around while updating Other functions are unusable while software is being updated. We recommend that you back up needed data before updating software (some downloaded data may not be backed up). Data saved on handset before updating may remain, but depending or

handset conditions (malfunctions, etc.), data may be lost. Note that SoftBank does not take While updating software, absolutely do not remove Battery, USIM Card, or power off. Updating may

If updating of software fails, handset may no longer be usable. In such cases contact Cus

1 Standby → ● → "Settings" → ●
2 "Software update" → ● → "Software update" → ● → \(\rightarrow \) (Yes) Follow the screen instructions

When handset is not restarted after updating software, remove Battery then reinstall, and power on again. When handset does not power on, consult with Customer Assistance (loss or malfunction) (--Customer Service).

Specific Absorption Rate (SAR) for This Product

This mobile phone [301Z] meets the MIC's* technical regulation** and international guidelines for the mobile phone [301Z] meets the MIC's* technical regulation and international guidelines for the mobile phone [301Z] meets the MIC's and the mobile phone [301Z] meets the MIC's are the mobile phone [301Z] meets th Inis mobile prone [3012] meets the MICS* technical regulation** and international guicelines for exposure to radio waves.

The MIC's technical regulation* for exposure to radio frequency energy established permitted levels of radio frequency energy, based on standards developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The regulation employs a unit of measurement known as the Specific Absorption Rate, or SAR.

The SAR limit is 2 watts/kilogram (Wikg) averaged over ten grams of tissue.

The limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The value of the limit is equal to the value given in international guidelines recommended by

The highest SAR value for this mobile phone is 1.07 W/kg when tested for use at the ear, and 0.502

The highest SAR value for this mobile phone is 1.07 Wirkg when tested for use at the ear, and 0.502 Wirkg when wom on the body in the below manner.

While there may be differences between the SAR levels of various phones and at various positions, all phones meet the MIC's technical regulation.

Although the SAR is determined at the highest certified power level, the actual SAR of the phone during operation can be well below the maximum value.

Use at positions other than at the earUse this mobile phone maintaining a 1.0 cm separation with no metal (parts) between the body and the mobile phone. When used in this manner, this mobile phone is confirmed to comply with the

MIC's technical regulation for exposure to radio waves and international guidelines for radio wave

Ministry of Internal Affairs and Communications The technical regulation is provided in Article 14-2 of the Ministry Ordinance Regulating Radio Equipment.

*** International Commission on Non-Ionizing Radiation Protection

e World Health Organization has announced that "A large number of studies have been performed

over the last two decades to assess whether mobile phones pose a potential health risk. To date, no adverse health effects have been established as being caused by mobile phone use." For more information about SAR, see the following websites

Ministry of Internal Affairs and Communications (MIC)

Association of Radio Industries and Businesses (ARIB)
