	CAUTION	Risk of injury or damage to property from improper use

■ Symbols

Prohibited Actions	Compulsory Actions	Attention Required

DANGER

Handset, Battery & Charger

Use specified battery and Charger only (see P.iii).

Using non-specified equipment may cause malfunctions, electric shock or fire due to battery leakage, overheating or bursting.

Do not short-circuit Charger terminals.

Keep metal objects away from Charger terminals. Keep handset away from necklaces, hairpins, etc. Battery may leak, overheat, burst or ignite causing injury. Use a case to carry battery.

Battery

Prevent injury from battery leakage, breakage or fire.

Do not:

- Heat or dispose of battery in fire
- Open/modify/disassemble battery
- Damage or solder battery
- Use a damaged or deformed battery
- Use non-specified charger (see P.iii)
- Force battery into handset
- Charge battery near fire or sources of heat; or expose it to extreme heat
- Use battery for other equipment

If battery fluid contacts eyes, do not rub them. Rinse with clean water and consult a doctor immediately.

Eyes may be severely damaged.

WARNING

Handset, Battery & Charger

Do not insert foreign objects into the handset or Charger.

Do not insert metal or flammable objects into handset or Charger; may cause fire or electric shock. Keep out of children's reach.

Keep handset out of rain or extreme humidity.

Fire or electric shock may result.

Keep handset away from liquid-filled containers.

Keep the handset and Charger away from chemicals or liquids; fire or electric shock may result.

Avoid sources of fire.

Prevent fire or explosion. Do not use handset in the presence of gas or fine particles (coal, dust, metal, etc.).

Keep battery, handset or Charger away from microwave ovens.

Battery, handset or Charger may leak, burst, overheat or ignite, leading to accidents or injury.

Do not disassemble or modify handset or related hardware.

- Do not open handset or Charger; may cause electric shock or injury. Contact Vodafone Customer Center, Customer Assistance for repairs.
- Do not modify handset or Charger; fire or electric shock may result.

If water or foreign matter is inside handset:

Discontinue handset use to prevent fire/electric shock. Turn off handset, remove battery and unplug Charger, then contact Vodafone Customer Center, Customer Assistance.

Do not subject handset to strong shocks or impacts.

Strong shocks or impacts to handset or Charger may cause malfunction or injury.

Should handset be damaged, remove battery then contact Vodafone Customer Center, Customer Assistance. Discontinue handset use; fire or electric shock may occur.

If an abnormality occurs:

If a handset emits an unusual sound, smoke or odor, discontinue use; may cause fire or electric shock. Turn off handset, remove battery and unplug Charger; contact Vodafone Customer Center, Customer Assistance.

WARNING

Handset

Take measures to prevent accidents.

- For safety, never use handset while driving. Pull over beforehand. Cellphone use while driving is prohibited by the revised Road Traffic Law (effective November 1, 2004).
- Do not use Headphones while driving or riding a bicycle. Accidents may result.
- Moderate volume outside, especially at road/rail crossings to avoid accidents.

Do not swing handset by handstrap.

May result in injury or breakage.

Turn handset power off before boarding aircraft.

Using wireless devices aboard aircraft may cause electronic malfunctions or endanger aircraft operation.

Adjust vibration and Ring Tone settings:

Users with a heart condition/pacemaker/defibrillator should adjust handset settings accordingly.

During thunderstorms, turn power off; find cover.

There is a risk of lightning strike or electric shock.

Charger

Use only the specified voltage.

Non-specified voltages may cause fire or electric shock.

- Rapid Charger
AC 100V Input
- In-Car Charger
DC 12V-24V Input

Do not use In-Car Charger if vehicle has a positive earth.

Fire may result. Use In-Car Charger only inside vehicles with a negative earth.

Charger care

- Do not touch blades with wet hands. Electric shock may occur.
- Do not use multiple cords in one outlet; may cause excess heat/fire.
- Do not bend, twist, pull or set objects on cord. Exposed wire may cause fire or electric shock.

Do not short-circuit Charger terminals.

May cause overheating, fire or electric shock. Keep metal away from terminals.

WARNING

Charger

Take measures to prevent accidents.

Secure In-Car Charger to avoid injury or accidents.

During thunderstorms:

Unplug Charger to avoid damage, fire or electric shock.

Damaged Rapid Charger/In-Car Charger cord:

May cause fire or electric shock; discontinue use and purchase a new Charger.

Charger use and children:

May cause electric shock/injury; keep out of reach.

Handset Use & Electronic Medical Equipment

This section is based on "Guidelines on the Use of Radio Communications Equipment such as Cellular Telephones and Safeguards for Electronic Medical Equipment" (Electromagnetic Compatibility Conference, April 1997) and "Report of Investigation of the Effects of Radio Waves on Medical Equipment, etc." (Association of Radio Industries and Businesses, March 2001).

People with implanted pacemakers/defibrillators should keep handset more than 22 cm away.

Radio waves can interfere with implanted pacemakers or defibrillators causing such devices to malfunction.

Observe these rules inside medical facilities:

- Do not enter an operating room or an Intensive or Coronary Care Unit while carrying a mobile handset.
- Keep handset off in hospitals.
- Keep handset off in hospital lobbies. Electronic equipment may be near.
- Obey rules regarding cellphone use in medical facilities.

Turn handset off in crowds or trains where persons with implanted pacemaker/defibrillator may be near.

Radio waves can interfere with implanted pacemakers or defibrillators causing such devices to malfunction.

Consult manufacturer for radio wave effects on electronic medical equipment.

WARNING

Battery

- If battery does not charge properly, stop charging. Battery may overheat, burst or ignite.
- If there is leakage or abnormal odor, avoid fire sources. Battery may catch fire or burst.

If there is abnormal odor, excessive heat, discoloration or distortion, remove battery from handset. It may leak, overheat or explode.

CAUTION

Handset, Battery & Charger

Handset care

- Place handset on stable surfaces to avoid malfunction or injury.
- Keep handset away from oily smoke or steam. Fire or accidents may result.
- Cold air from air conditioners may condense, resulting in leakage or burnout.
- Keep handset away from direct sunlight (inside vehicles, etc.) or heat sources. Distortion, discoloration or fire may occur. Battery shape may be affected.
- Keep handset out of extremely cold places to avoid malfunction or accidents.
- Keep handset away from fire sources to avoid malfunction or accidents.

Usage environment

- Excessive dust may prevent heat release and cause burnout or fire.
- Avoid using handset on the beach. Sand may cause malfunction or accidents.
- Keep handset away from credit cards, telephone cards, etc. to avoid data loss.

⚠ CAUTION

Handset

Avoid leaving handset in extreme heat (inside vehicles, etc.).

Handset may become hot to the touch, leading to burn injuries.

Volume settings

Moderate handset volume; excessive volume may damage ears or hearing.

If you experience any skin irritation associated with handset use, discontinue handset use and consult a doctor.

See handset materials below. Some materials may cause skin irritation, rashes, or itchiness depending on your physical condition.

Inside vehicles

Handset use may cause electronic equipment to malfunction.

⚠ CAUTION

Charger

Charger & In-Car Charger

- Grasp plug (not cord) to disconnect Charger. May cause fire/electric shock.
- Keep cord away from heaters. Exposed wire may cause fire or electric shock.
- Stop use if plug is hot or improperly connected. May cause fire/electric shock.
- Keep In-Car Charger socket clean. May overheat and cause injury.

Use only the specified fuse.

1 A fuse for In-Car Charger. Or may cause breakage/fire.

Always charge handset in a well-ventilated area.

Avoid covering/wrapping Charger; may cause damage/fire.

Do not use In-Car Charger when engine is off.

To avoid weakening the car battery, always start engine before charging the handset using In-Car Charger.

During periods of disuse

Always unplug Rapid Charger or In-Car Charger after use.

Handset maintenance

Always disconnect Rapid Charger or In-Car Charger when cleaning handset, to prevent shock/injury.

Installing In-Car Charger

Properly position the cable for safe driving to avoid injury or accidents.

CAUTION

Battery

Do not throw or abuse battery. Battery may overheat, burst or ignite. 

Do not leave battery in direct sunlight or inside a closed vehicle; may reduce battery performance or overheat. An overheated battery may cause fire. 

Do not expose battery to liquids. Performance may deteriorate. 

If battery fluid contacts skin or clothes, rinse with clean water immediately. 

Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take exhausted battery to a Vodafone shop, or follow the local disposal regulations. 

Keep battery out of children's reach. 

- Charge battery in ambient temperatures between 5°C and 35°C; outside this range, battery may leak/overheat and performance may deteriorate. 
- If your child is using handset, explain all instructions and supervise usage.
- If there is abnormal odor or excessive heat, stop using battery and call Vodafone Customer Center, Customer Assistance.
- Charge battery at least once every six months; an uncharged battery may become unusable.

General Notes

General Use

- Vodafone is not liable for any damages resulting from accidental loss/alteration of handset data. Keep a copy of Phone Book entries, etc. in a separate place.
- Handset transmissions may be disrupted inside buildings, tunnels or underground, or when moving into/out of such places.
- Use handset without disturbing others.
- Handsets are radios as stipulated by the Radio Law. Under the Radio Law, handsets must be submitted for inspection upon request.
- Handset use near landlines, TVs or radios may cause interference.
- **Beware of eavesdropping.** Because this service is completely digital, the possibility of signal interception is greatly reduced. However, some transmissions may be overheard.

Eavesdropping

Deliberate/accidental interception of communications constitutes eavesdropping.

Inside Vehicles

- Never use handset while driving.
- Do not park illegally to use handset.
- Handset use may affect a vehicle's electronic equipment.

Aboard Aircraft

Never use handset aboard aircraft (keep power off). Handset use may impair aircraft operation.

Handset Care

- If handset is left with no battery or an exhausted one, data may be altered/lost. Vodafone is not liable for any resulting damages.
- Use handset within temperatures of 5 °C to 35 °C and humidity of 35% to 85%. Avoid extreme temperatures/direct sunlight.
- Do not drop or subject handset to shocks.
- Clean handset with dry, soft cloth. Using alcohol, thinner, etc. may damage it.
- Do not expose handset to rain, snow or high humidity.
- Never disassemble or modify handset.
- Avoid scratching handset Display.
- **Handset is not water-proof. Avoid exposure to liquids and high humidity.**
 - Keep handset away from precipitation.
 - Cold air from air conditioning, etc. may condense causing corrosion.
 - Avoid dropping handset in damp places (restroom, bath/shower room, etc.).
 - On the beach, keep handset away from water and direct sunlight.
 - Perspiration may seep inside handset causing malfunction.
- **Avoid heavy objects or excessive pressure. May cause malfunction or injury.**
 - Do not sit down with handset in a back pocket.
 - Do not place heavy objects on handset in a bag.
- Connect only the specified products to Headphone Connector. Non-specified devices may malfunction or cause damage.

Specific Absorption Rate (SAR)

V201SH meets the government's requirements for exposure to radio waves.

These requirements are based on scientific basis to assure that radio waves emitted from cellphones and other handheld wireless devices do not affect human health. They require that the Specific Absorption Rate (SAR), which is the unit of measurement for the amount of radiofrequency absorbed by the body, shall not exceed 2 W/kg^* . This limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age or health, and meets the international standard set by International Commission on Non-Ionizing Radiation Protection (ICNIRP) in cooperation with World Health Organization (WHO).

The highest SAR value for V201SH is 0.77 W/kg. Tests for SAR are conducted with handset transmitting at its highest certified power level, and follow the testing methods set by the government. While there may be differences between the SAR levels for various handsets, they all meet the governmental requirements for safe exposure. The actual SAR level of the handset while operating can be well below the highest value. This is because the handset is designed to operate at multiple power levels so as to use only the power required to reach the Network.

Additional information on SAR can be obtained on the following Websites:
Ministry of Internal Affairs and Communications (Protection from Radio Wave Environment)

<http://www.tele.soumu.go.jp/e/ele/index.htm>

Association of Radio Industries and Businesses (ARIB)

*Requirements are stipulated in Radio Law (Ordinance Regulating Radio Equipment, Article 14-2).

Battery & Charger

1

Getting Started

Getting Started

Charge battery before first use/after a period of disuse.

Battery Life

- **Use specified Charger only. Other chargers may damage handset, or cause battery to deteriorate, overheat or ignite.**
- Do not use or store battery at extreme temperatures. May shorten battery life. Ideal working temperature is between 5°C and 35°C.
- Replace battery if operating time is noticeably shorter than normal.

Charging

- Do not use Charger for other purposes.
- Battery may short-circuit, overheat or burst from contact with metal objects.
- Small Light illuminates red while charging. (It may take a while for the light to illuminate when handset power is off.)

- Charging takes approximately 115 minutes (with handset power off).
 - Charging time may vary by ambient temperature.
- Charger and battery may become warm during charging.
- Move Charger away from home TVs or radios if interference occurs.

Precautions

- Use a dry cotton swab to clean handset, battery and Charger terminals.
- Avoid:
 - Extreme temperatures
 - Humidity, dust and vibration
 - Direct sunlight
- Charge battery at least once every six months; an uncharged battery may become unusable.
- Use a case when carrying battery separately.

Tip

- Battery must be inserted to charge handset.
- Handset will charge with power on.  flashes and stays on when complete.

Estimated Hours of Use (fully charged battery)

Continuous Talk Time	140 minutes
Continuous Standby Time	450 hours
Continuous Operating Time	290 minutes

Above values were calculated with Backlight Brightness set to **Level 4** (default).

- Continuous Talk Time is an average measured with a new, fully charged battery, at maximum output with both Power Saving and Panel Saving off, with stable signals.
- Continuous Standby Time is an average measured with a new, fully charged battery without calls or operations, in Standby with stable signals. Standby Time may be less than half this value if handset is out-of-range or signal is weak. Standby Time may vary by environment (battery status, temperature, etc.).
- Continuous Operating Time is the length of time handset keys can be pressed continuously without calls.
- The above values (Battery Time) are nominal values, measured under stable signal conditions.

Battery Time

Battery Time may shorten when handset is used in poor conditions:

• Poor Usage Conditions

- Extreme temperatures (use in ambient temperatures between 5°C and 35°C)
- Dirty handset, battery or Charger terminals (charging may be hampered)
- Signal is weak/handset is out-of-range

• Power Consuming Operations

- Using Station service
- Continuous Keypad use (Backlight stays on for long periods)
- Frequent infrared transfers

• Power Consuming Settings

- Increasing Backlight/Keypad Light time
- Using animated Wallpaper
- Using Screen Animation
- Canceling Panel Saving
- Setting Backlight to illuminate brighter

1

Getting Started

Extend Battery Time

Adjust the following settings:

- Backlight (see P.6-7)
- Panel Saving (see P.11-29)

When Battery Runs Out

A message appears and short beeps sound. Handset shuts down after 20 seconds unless charged.

Press  to stop short beeps. (Short beeps do not sound in Manner Mode.)

- If battery runs out during a call, a double beep sounds every five seconds. After 20 seconds, the call ends and handset shuts down.

Battery Disposal

Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take exhausted battery to a Vodafone shop, or follow the local disposal regulations.

Battery Strength

Signal Strength (see P.1-11)

When battery runs out, **Recharge Battery** appears and short beeps sound. Handset shuts down after 20 seconds.

Indicator

Battery Strength indicator varies as shown. Charge or replace when level is low. Battery Strength indicator is for reference only.

Battery Strength & Environment

At low temperatures, battery is consumed faster.
At high temperatures, battery lasts longer.

Small Light & Battery Strength Indicator

Instrument Effects

Basics

Create original tones for Original Ring Tones and other melodies. Save up to eight tones per chord type (8/16 Chords, 32 Chords and WT Original Tone).

Procedure

This system, based on FM synthesis, allows you to select **Algorithm** and **Effect Level** and adjust parameters of **Operator** to create Instrument Effects.

- Select and arrange preset tones or Instrument Effects you have already created.
- Play sounds as you arrange tones to check effects of changes.
- Use WT synthesis by selecting WT Original Tone.

- 1 Select chord
 - Type: *8/16 Chords*, *32 Chords* and *WT Original Tone*
- 2 Select a save location
- 3 Enter name
 - Effect names appear in tone list under Original (FM) or Original (WT).
 - Enter up to 12 single-byte characters.
- 4 Select source tone
 - Select from preset tones if this is your first time.

5 Select Algorithm

- Choose from six types for 8/16 Chords, and two types for 32 Chords.
- Algorithm setting is not available for WT Original Tone.

6 Adjust parameters of each Operator (OP)

- There are four types of Operators for 8/16 Chords and two types for 32 Chords.
- Default parameters are the same as those of the source tone.
- Use to select a parameter and to adjust.
- Press to check effects of parameter changes.

7 Set Effect Level, Basic Octave, etc.

8 Save tone (Instrument Effects)

- Select Instrument Effects from tones to use for Original Ring Tone, etc.

WT Synthesis

- WT synthesis is based on recorded waveform data from musical instruments, etc. which are close to original sounds.

FM Synthesis

This system synthesizes various tones by generating a sine wave called **Operator**.

Algorithm is a combination of Operators.

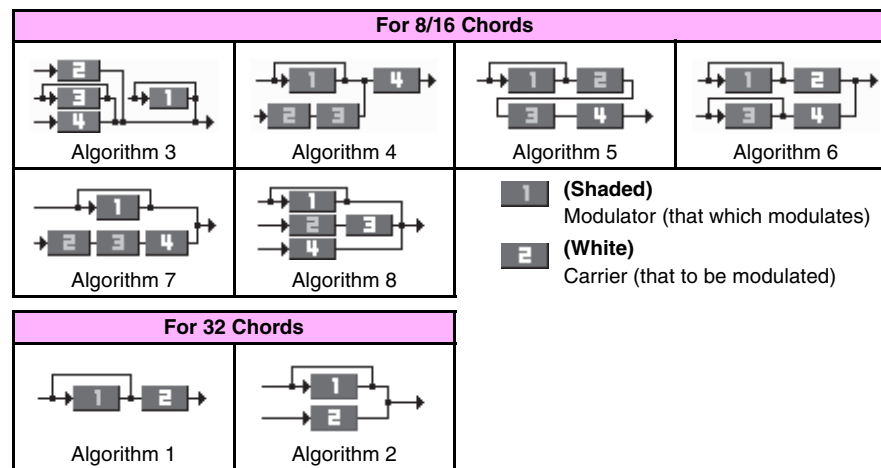

Depending on the Algorithm, Operators work either as **Modulator** (that which modulates) or **Carrier** (that to be modulated).

- Adjust a variety of parameters including Multiple and Sustain.
- Some Operators have a parameter called Feed Back for more effects.

Algorithm

Select a combination of Operators from six types (8/16 Chords) or two types (32 Chords).

- Available Operators vary depending on the combination.
- Algorithm setting is not available for WT Original Tone.

Operator (OP)

See the table for details. Available parameters may vary by the number of chords.

Parameter	Description
Multiple (13 levels)	Multiple affects tones most. The higher the Carrier level, the higher the pitch. Adjust the Modulator level for a variety of tones.
Sustain (On/Off)	When Sustain is set, sound continues after produced. Choose On to provide sustaining effects to tones in Piano, Glockenspiel, etc.
Key Scale Rate (two levels)	Set Key Scale Rate high to shorten the rise and fall time. Select 2 to emphasize this effect.
Key Scale Level (four levels)	The higher the Key Scale Level, the lower the volume level. Select 0 to disable this effect.
Total Level (64 levels)	<p>(1) Carrier The higher the Carrier value, the higher the volume level. Normally set 64 (maximum value), and select smaller values to use tones effectively at low volume for accompaniments, etc.</p> <p>(2) Modulator Increasing Modulator value brightens tones. Select smaller values for softer tones. Normally set between 40 and 64 to enjoy effects of tone changes.</p>

Parameter	Description
Attack Rate (15 levels)	The higher the Attack Rate, the longer sounds take to reach the maximum volume. When using tones with Attack Rate high, use longer notes or select slower tempo.
Decay Rate (16 levels)	Lower Decay Rate to shorten the time sounds reach down to Sustain Level
Sustain Level (16 levels)	The Sustain Level for a Normal Tone equals the sustained volume. For Step-Down Tones, Sustain Level measures the volume at which Ring Tone begins to decrease. The higher the Sustain Level, the higher the volume.
Sustain Rate (16 levels)	The lower the Sustain Rate, the longer the Sustain Level volume is sustained. 16 is Normal Tone, and other levels are Step-Down Tones.
Release Rate (16 levels)	The Release Rate for a Normal Tone equals the time from beginning to end of a sound. For Step-Down Tones, Release Rate measures the time from when a sound begins to decrease until it ends completely. The lower the Release Rate, the sooner the sound ends. For sustaining effects, increase Release Rate.
KEYOFF Nullify (On/Off)	Choose On to avoid sound skipping of Step-Down Tones including those in DRUM
Wave Select (29 types)	Select from 29 waveforms
Vibrato (four levels/Off)	Vibrato is a periodic variation in pitch
AM Modulation (four levels/Off)	The higher the AM Modulation level, the stronger the tremolo (periodic changes in loudness)

Managing Files (Data Folder)

Infrared

Getting Started

Exchange files/entries with infrared-compatible Vodafone handsets and other devices.

- V201SH complies with IrMC 1.1, but some files/entries may not be exchanged.
- Infrared transfers are disabled while handset is connected to the Network (receiving/sending mail or information).
- During infrared transfers, handset automatically enters Off-Line Mode (see **P.3-6**). Thus transfers are disabled while receiving calls/messages, during calls, while editing mail or data, etc. Off-Line Mode is canceled after transfers.

Transferable Files

Function	One File	All Files	Notes
Phone Book	Available	Available	The following settings are lost: Photo, Personal Ring Tone, Incoming Notice and Mail Folder. In One File transfers, Group and Secret settings are also lost. All File transfer includes Owner Profile (except handset phone number).
Data Folder	Available	N/A	Transfer JPEG and PNG files in Images folder as well as E-Animation (NEVA files) in Animation folder. Copy protected files cannot be transferred.
Camera Mode Images	Available	N/A	Transfer a DCF format file of up to 40 KB

Note

- Files over 40 KB cannot be transferred.
- Images may not appear on recipient handsets.

Precautions

- Align Infrared Ports within 20 centimeters with no obstructions between handsets.

- Keep Infrared Ports aligned during transfer.
- Transfers in direct sunlight, under fluorescent lighting or near infrared equipment may fail.
- Dust/oil may impair file transfers; clean Infrared Ports with a soft cloth beforehand.

Tip

When transfer fails, **Remote Device Not Found Reconnect?** appears. Implement the above precautions and try again. (Choose **Yes** and press)

IR Password

When Long Mail is not Delivered as Sent

Causes include the following scenarios. For details, contact Vodafone Customer Center, General Information (see P.15-25).

- Recipient is not subscribed to Super Mail or Long Mail.
- Recipient handset is not JPEG-compatible.
 - Some Long Mail-compatible handsets may only be able to process PNG images; convert JPEG files to PNG, then attach and send (see P.8-21).

When Handset Memory is Insufficient

New messages cannot be delivered to handset. Undeliverable mail is saved at the Center for up to 30 days.

- Delete messages to free memory for new ones (see P.13-28). When memory is available, new messages are delivered automatically.
- Delete unprotected messages automatically to receive new ones (see P.13-29 "Auto Delete").
- Even if memory is not full, handset cannot receive new messages larger than remaining memory.

Specifications

V201SH

Weight	Approximately 79 g (with battery)
Continuous Talk Time	Approximately 140 minutes
Continuous Standby Time	Approximately 450 hours
Charging Time (power off)	Rapid Charger: Approximately 115 minutes In-Car Charger: Approximately 115 minutes
Dimensions (W x H x D)	Approximately 46 x 115 x 16 mm
Maximum Output	0.8 W

- Values above were calculated with battery installed.
- Continuous Talk Time is an average measured with a new, fully charged battery, at maximum output with both Power Saving and Panel Saving off, with stable signals.
- Continuous Standby Time is an average measured with a new, fully charged battery without calls or operations, in Standby with stable signals. Standby Time may be less than half this value if handset is out-of-range or signal is weak. Standby Time may vary by environment (battery status, temperature, etc.).
- Talk Time/Standby Time decrease with frequent use of Display/Keypad Backlights.
- Station service may consume more power through automatic updates.
- Talk Time/Standby Time decrease with handset use in poor signal conditions (see P.1-9 "Battery Time").
- Display employs precision technology, however, some pixels may appear brighter/darker.
