# DANGER

## Handset, Battery & Charger

**Use specified battery, Charger and Desktop Holder only (see P.iii).**

Using non-specified equipment may cause malfunctions, electric shock or fire due to battery leakage, overheating or bursting.

**Do not short-circuit Charger terminals.**

Keep metal objects away from Charger terminals. Keep handset away from necklaces, hairpins, etc.  
Battery may leak, overheat, burst or ignite causing injury.  
Use a case to carry handset.

## Battery

**Prevent injury from battery leakage, breakage or fire.**

**Do not:**

- Heat or dispose of battery in fire
- Open/modify/disassemble battery
- Damage or solder battery
- Use a damaged or deformed battery
- Use non-specified charger (see P.ii)
- Force battery into handset
- Charge battery near fire or sources of heat; or expose it to extreme heat
- Use battery for other equipment

**If battery fluid contacts eyes, do not rub them. Rinse with clean water and consult a doctor immediately.**

Eyes may be severely damaged.

# ⚠ WARNING

## Handset, Battery & Charger

### Do not insert foreign objects into the handset, Charger or Desktop Holder.

Do not insert metal or flammable objects into handset, Charger or Desktop Holder; may cause fire or electric shock. Keep out of children's reach.

### Keep handset out of rain or extreme humidity.

Fire or electric shock may result.

### Keep handset away from liquid-filled containers.

Keep the handset, Charger and Desktop Holder away from chemicals or liquids; fire or electric shock may result.

### Keep battery, handset, Charger or Desktop Holder away from microwave ovens.

Battery, handset, Charger or Desktop Holder may leak, burst, overheat or ignite, leading to accidents or injury.

### Do not disassemble or modify handset or related hardware.

- Do not open handset, Charger or Desktop Holder; may cause electric shock or injury. Contact Vodafone Customer Centre, Customer Assistance for repairs.
- Do not modify handset, Charger or Desktop Holder; fire or electric shock may result.

### Do not use Mobile Light near people's faces.

Eyesight may be temporarily affected leading to accidents.

#### CAUTION:

Use of controls, adjustments or performance of procedure other than those specified herein may result in hazardous radiation exposure. As the emission level from Mobile Light LED used in this product is harmful to the eyes, do not attempt to disassemble the cabinet. Servicing is limited to qualified servicing station only.

### If water or foreign matter is inside handset:

Discontinue handset use to prevent fire/electric shock. Turn off handset, remove battery and unplug Charger, then contact Vodafone Customer Centre, Customer Assistance.

# WARNING

## Handset, Battery & Charger

### Avoid sources of fire.

Prevent fire or explosion. Do not use handset in the presence of gas or fine particles (coal, dust, metal, etc.).

### Do not subject handset to strong shocks or impacts.

Strong shocks or impacts to handset, Charger or Desktop Holder may cause malfunction or injury. Should handset be damaged, remove battery then contact Vodafone Customer Centre, Customer Assistance. Discontinue handset use; fire or electric shock may occur.

### If an abnormality occurs:

If a handset emits an unusual sound, smoke or odour, discontinue use; may cause fire or electric shock. Turn off handset, remove battery and unplug Charger; contact Vodafone Customer Centre, Customer Assistance.

## Handset

### Keep Memory Card and Memory Card Adapter out of children's reach.

If swallowed, consult a doctor immediately.

## Handset

### Take measures to prevent accidents.

- For safety, never use handset while driving. Pull over beforehand. Mobile phone use while driving is prohibited by the revised Road Traffic Law (effective 1 November 2004).
- Do not use headphones while driving or riding a bicycle. Accidents may result.
- Moderate volume outside, especially at level/road crossings to avoid accidents.

### Do not swing handset by LCD Remote/Mic with Headphones or handstrap.

May result in injury or breakage.

### Turn handset power off before boarding aircraft.

Using wireless devices aboard aircraft may cause electronic malfunctions or endanger aircraft operation.

### Adjusting vibration and Ringtone settings:

Users with a heart condition/pacemaker/defibrillator should adjust handset settings accordingly.

### During thunderstorms, turn power off; find cover.

There is a risk of lightning strike or electric shock.

# WARNING

## Charger

---

### Use only the specified voltage.

Non-specified voltages may cause fire or electric shock.

- **AC Charger: AC 100V-240V Input**

- Vodafone is not liable for problems caused by charging handset abroad.

- **In-Car Charger: DC 12V-24V Input**

---

### Do not use commercially available transformers.

Use of AC Charger with commercially available transformers may cause fire, electric shock or damage.

---

### Do not use In-Car Charger if vehicle has a positive earth.

Fire may result. Use In-Car Charger only inside vehicles with a negative earth.

---

### Charger care

- Do not touch blades with wet hands. Electric shock may occur.
- Do not use multiple cords in one outlet; may cause excess heat/fire.
- Do not bend, twist, pull or set objects on cord. Exposed wire may cause fire or electric shock.

---

### Do not short-circuit Charger terminals.

May cause overheating, fire or electric shock. Keep metal away from terminals.

---

### Do not use Desktop Holder inside vehicles.

Extreme temperature or vibration may cause fire or damage handset, etc.

---

### Take measures to prevent accidents.

Secure In-Car Charger to avoid injury or accidents.

---

### Damaged AC Charger/In-Car Charger cord:

May cause fire or electric shock; contact Vodafone Customer Centre, Customer Assistance to replace.

---

### During thunderstorms:

Unplug Charger to avoid damage, fire or electric shock.

---

### Charger/Desktop Holder use and children:

May cause electric shock/injury; keep out of reach.

# WARNING

## Battery

- If battery does not charge properly, stop charging. Battery may overheat, burst or ignite.
- If there is leakage or abnormal odour, avoid fire sources. Battery may catch fire or burst.

If there is abnormal odour, excessive heat, discolouration or distortion, remove battery from handset.  
It may leak, overheat or explode.

## Handset Use & Electronic Medical Equipment

This section is based on "Guidelines on the Use of Radio Communications Equipment such as Cellular Telephones and Safeguards for Electronic Medical Equipment" (Electromagnetic Compatibility Conference, April 1997) and "Report of Investigation of the Effects of Radio Waves on Medical Equipment, etc." (Association of Radio Industries and Businesses, March 2001).

### **Persons with implanted pacemaker/defibrillator should keep handset more than 22 cm away.**

Radio waves can interfere with implanted pacemakers or defibrillators causing such devices to malfunction.

### **Turn handset off in crowds or trains where persons with implanted pacemaker/defibrillator may be near.**

Radio waves can interfere with implanted pacemakers or defibrillators causing such devices to malfunction.

### **Observe these rules inside medical facilities:**

- Do not enter an operating room or an Intensive or Coronary Care Unit while carrying a mobile handset.
- Keep handset off in hospitals.
- Keep handset off in hospital lobbies. Electronic equipment may be near.
- Obey rules regarding mobile phone use in medical facilities.

### **Consult manufacturer for radio wave effects on electronic medical equipment.**

# CAUTION

## Handset, Battery & Charger

### Handset care

- Place handset on stable surfaces to avoid malfunction or injury.
- Keep handset away from oily smoke or steam. Fire or accidents may result.
- Cold air from air conditioners may condense, resulting in leakage or burnout.
- Keep handset away from direct sunlight (inside vehicles, etc.) or heat sources. Distortion, discolouration or fire may occur. Battery shape may be affected.
- Keep handset out of extremely cold places to avoid malfunction or accidents.
- Keep handset away from fire sources to avoid malfunction or accidents.

### Usage environment

- Excessive dust may prevent heat release and cause burnout or fire.
- Avoid using handset on the beach. Sand may cause malfunction or accidents.
- Keep handset away from credit cards, telephone cards, etc. to avoid data loss.

## Handset

### Handset temperature

Handset may become hot while in use. Avoid prolonged contact with skin especially at high temperature. May cause burn injuries.

### Avoid leaving handset in extreme heat (inside vehicles, etc.).

Handset may become hot to the touch, leading to burn injuries.

### Volume settings

Moderate handset volume; excessive volume may damage ears or hearing.

### LCD Remote/Mic with Headphones

- Do not force plugs or pull on cord; may damage plugs or cord.
- Keep plugs clean to avoid noise and malfunction.

### Inside vehicles

Handset use may cause electronic equipment to malfunction.

# ⚠ CAUTION

## Handset

**If you experience any skin irritation associated with handset use, discontinue handset use and consult a doctor.**

See handset materials below. Some materials may cause skin irritation, rashes, or itchiness depending on your physical condition.

# CAUTION

## Charger

---

### Charger & In-Car Charger

- Grasp plug (not cord) to disconnect Charger. May cause fire/electric shock.
- Keep cord away from heaters. Exposed wire may cause fire or electric shock.
- Stop use if plug is hot or improperly connected. May cause fire/electric shock.
- Keep In-Car Charger socket clean. May overheat and cause injury.

---

### Do not touch Desktop Holder while in use.

May cause burn injuries.

---

### Use only the specified fuse.

1 A fuse for In-Car Charger.  
Or may cause breakage/fire.

---

### Always charge handset in a well-ventilated area.

Avoid covering/wrapping Charger and Desktop Holder; may cause damage/fire.

---

### Do not use In-Car Charger when engine is off.

To avoid weakening the car battery, always start engine before charging the handset using In-Car Charger.

---

### During periods of disuse

Always unplug AC Charger or In-Car Charger after use.

---

### Handset maintenance

Always disconnect AC Charger or In-Car Charger when cleaning handset, to prevent shock/injury.

---

### Installing In-Car Charger

Properly position the cable for safe driving to avoid injury or accidents.

# CAUTION

## Battery

---

Do not throw or abuse battery. Battery may overheat, burst or ignite.

---

Do not leave battery in direct sunlight or inside a closed vehicle; may reduce battery performance or overheat. An overheated battery may cause fire.

---

Do not expose battery to liquids. Performance may deteriorate.

---

If battery fluid contacts skin or clothes, rinse with clean water immediately.

---

Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take exhausted battery to a Vodafone shop, or follow the local disposal regulations.

---

Keep battery out of children's reach.

- 
- Charge battery in ambient temperatures between of 5°C and 35°C; outside this range, battery may leak/overheat and performance may deteriorate.
  - If your child is using handset, explain all instructions and supervise usage.
  - If there is abnormal odour or excessive heat, stop using battery and call Vodafone Customer Centre, Customer Assistance.
  - Charge battery at least once every six months; an uncharged battery may become unusable.

# General Notes

## General Use

- Vodafone is not liable for any damages resulting from accidental loss/alteration of handset or Memory Card data. Keep a copy of Phone Book entries, etc. in a separate place.
- Handset transmissions may be disrupted inside buildings, tunnels or underground, or when moving into/out of such places.
- Use handset without disturbing others.
- Handsets are radios as stipulated by the Radio Law. Under the Radio Law, handsets must be submitted for inspection upon request.
- Handset use near landlines, TVs or radios may cause interference.
- **Beware of eavesdropping.**  
Because this service is completely digital, the possibility of signal interception is greatly reduced. However, some transmissions may be overheard.

### **Eavesdropping**

Deliberate/accidental interception of communications constitutes eavesdropping.

## Inside Vehicles

- Never use handset while driving.
- Do not park illegally to use handset.
- Handset use may affect a vehicle's electronic equipment.

## Aboard Aircraft

- Never use handset aboard aircraft (keep power off).  
Handset use may impair aircraft operation.

## Electromagnetic Waves

For body worn operation, this phone has been tested and meets RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 15 mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.

## FCC RF Exposure Information

Your handset is a radio transmitter and receiver.

It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The guidelines are based on standards that were developed by independent scientific organisations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model handset when tested for use at the ear is 0.430 W/kg and when worn on the body, as described in this user guide, is 0.442 W/kg.

Body-worn Operation; This device was tested for typical body-worn operations with the back of the handset kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the handset. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorisation for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID APYHRO00044.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) website at <http://www.phonefacts.net>.

## European RF Exposure Information

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.395 W/kg\*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide\*\*. In this case, the highest tested SAR value is 0.697 W/kg. As SAR is measured utilizing the devices highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a hands-free device to keep the mobile phone away from the head and body.

---

\* The tests are carried out in accordance with international guidelines for testing.

\*\*Please see General Notes (Electromagnetic Waves) on **P.xxvi** for important notes regarding body worn operation.

## Handset Care

- If handset is left with no battery or an exhausted one, data may be altered/lost. Vodafone is not liable for any resulting damages.
- Use handset within temperatures of 5°C to 35°C and humidity of 35% to 85%. Avoid extreme temperatures/direct sunlight.
- Exposing lens to direct sunlight may damage colour filter and affect image colour.
- Do not drop or subject handset to shocks.
- Clean handset with dry, soft cloth. Using alcohol, thinner, etc. may damage it.
- Do not expose handset to rain, snow or high humidity.
- Never disassemble or modify handset.
- Avoid scratching handset Display.
- When closing handset, keep straps, etc. outside to avoid damaging the Display.
- When using headphones, moderate volume to avoid sound bleed.
- **Handset is not water-proof. Avoid exposure to liquids and high humidity.**
  - Keep handset away from precipitation.
  - Cold air from air conditioning, etc. may condense causing corrosion.
  - Avoid dropping handset in damp places (toilet, bathroom, etc.).
  - On the beach, keep handset away from water and direct sunlight.
  - Perspiration may seep inside handset causing malfunction.
- **Avoid heavy objects or excessive pressure. May cause malfunction or injury.**
  - Do not sit down with handset in a back pocket.
  - Do not place heavy objects on handset in a bag.
- Connect only the specified products to VIDEO OUT/Headphone Connector. Non-specified devices may malfunction or cause damage.
- Always turn off handset before removing battery. If battery is removed while saving data or sending mail, data may be lost, changed, or destroyed.

## Specific Absorption Rate (SAR)

- **804SH meets the government's requirements for exposure to radio waves.**

These requirements are based on scientific basis to assure that radio waves emitted from mobile phones and other handheld wireless devices do not affect human health. They require that the Specific Absorption Rate (SAR), which is the unit of measurement for the amount of radiofrequency absorbed by the body, shall not exceed 2 W/kg\*. This limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age or health, and meets the international standard set by International Commission on Non-Ionizing Radiation Protection (ICNIRP) in cooperation with World Health Organization (WHO).

- The highest SAR value for 804SH is 0.69 W/kg. Tests for SAR are conducted with handset transmitting at its highest certified power level, and follow the testing methods set by the government. While there may be differences between the SAR levels for various handsets, they all meet the governmental requirements for safe exposure. The actual SAR level of the handset while operating can be well below the highest value. This is because the handset is designed to operate at multiple power levels so as to use only the power required to reach the Network.

- Additional information on SAR can be obtained on the following Websites:

- Ministry of Internal Affairs and Communications (Protection from Radio Wave Environment)  
<http://www.tele.soumu.go.jp/e/e/e/index.htm>
- Association of Radio Industries and Businesses (ARIB)  
<http://www.arib-emf.org/index02.html> (Japanese only)  
\*Requirements are stipulated in Radio Law (Ordinance Regulating Radio Equipment, Article 14-2).

# USIM Card

## General Information & Precautions

Vodafone Global Standard USIM Card is an IC Card containing customer information such as handset number.

USIM Card must be inserted before using a USIM Card-compatible handset. Without USIM Card, some services (calls, messaging, Web, etc.) are not available.

- Save contacts on USIM Card Phone Book (see **P.4-3**).
- Insert into compatible Vodafone handsets to access files.
- Do not apply excessive force to insert/remove USIM Card.
- Do not insert USIM Card into any other IC card device. Vodafone is not liable for resulting damages.
- Keep the USIM Card IC chip clean.
- Use a dry, soft cloth to clean the USIM Card.
- Do not attach labels to USIM Card. Malfunction may result.

### ■ If Handset is Dropped or Subjected to Shocks

804SH may not recognise USIM Card; it may shut down and remain off or automatically restart. This is not a malfunction.

If **Insert USIM Card** appears or 804SH does not restart, clean and properly reinsert USIM Card then restart 804SH.

### Important

- USIM Card is the property of Vodafone.
- USIM Card will be reissued for a fee if lost or damaged.
- Return USIM Card to Vodafone upon subscription termination.
- Returned USIM Cards are recycled.
- USIM Card specifications may change without prior notice.
- Back-up USIM Card files. Vodafone is not liable for lost files.
- If your USIM Card or handset (with USIM Card inserted) is lost or stolen, suspend your service immediately. For details, contact Vodafone Customer Centre, General Information (see **P.18-24**).

## Inserting & Removing USIM Card

Turn handset power off beforehand.

### Inserting

- 1 Remove battery  
(see P.1-15)

- 2 Slide in USIM Card with IC chip facing down

- 3 Insert battery (Steps 3 - 4 "Inserting" on P.1-15)

### Removing

- 1 Remove battery  
(see P.1-15)

- 2 Press Tab then push USIM Card as shown

- 3 Insert battery (Steps 3 - 4 "Inserting" on P.1-15)

**Note** ▶ Do not force USIM Card into or out of handset; damage may result.

- Take care not to lose removed USIM Card.

- Avoid touching USIM Card IC chip. May hinder performance (see P.1-4). Avoid touching USIM Card terminals as well.

- Replacing USIM Card with one containing different customer information, or turning on handset without USIM Card inserted deletes all downloaded Custom Screen Keys (see P.10-5); handset repairs may also delete Custom Screen Keys. If handset number is unchanged, however, previously downloaded Keys may be re-downloaded at no charge (transmission fees apply).

## USIM PINs

There are two Security Codes for USIM Card: **PIN1** and **PIN2**.

### PIN1

A 4-digit to 8-digit Security Code to prevent unauthorised use of Vodafone handset.

- Change PIN1 as needed (see **P.10-16** "Change PIN").
- When PIN Entry (see **P.10-16**) is **On**, PIN1 must be entered each time handset (with USIM Card inserted) is turned on.
- PIN1 is **9999** by default.

### PIN2

Required to clear Call Costs (see **P.2-14**) and to set Max Cost (see **P.2-14**).

- Change PIN2 as needed (see **P.10-16** "Change PIN").
- PIN2 is **9999** by default.

### PIN Lock & PUK Code

**PIN1 Lock** or **PIN2 Lock** is activated if PIN1 or PIN2 is incorrectly entered three times consecutively. Cancel PIN Lock (see **P.10-16**) by entering the Personal Unblocking Key (**PUK Code**). For information on PUK Code, contact Vodafone Customer Centre, General Information (see **P.18-24**).

- Note** ▶
- If PUK Code is incorrectly entered ten times, USIM Card is locked and handset is disabled. Write down PUK Code.
  - For USIM Card unlocking procedures, call Vodafone Customer Centre, General Information (see **P.18-24**).
  - Emergency calls (110, etc.) are not possible when Switch On/Off in PIN Entry is **On**. For more, see **P.2-4** "Emergency Calls".

# Battery & Charger

## Getting Started

Charge battery before first use/after period of disuse.

### Battery Life

- Do not use/store battery at extreme temperatures; this may shorten battery life. Ideally, use/store between 5°C and 35°C.
- Use specified Charger only; others may damage handset/battery or overheat or ignite battery.
- Replace battery if operating time shortens noticeably.

### Charging

- Do not use Charger for other purposes.
- Contact with metal may short, overheat or burst battery.
- Small Light illuminates red while charging. (It may take longer for the light to illuminate when handset is off.)
- Charging takes approximately 140 minutes (with handset off).
  - **Charging time may vary by ambient temperature.**
- 804SH and Charger may warm during charging.
- Separate Charger from TV/radio if interference occurs.

### Precautions

- Clean device charging terminals with a dry cotton swab.
- Avoid:
  - Extreme temperatures
  - Humidity, dust and vibration
  - Direct sunlight
- Charge battery at least once every six months; an uncharged battery may become unusable.
- Use a case when carrying battery separately.

#### Tip ►

- Battery must be inside handset to charge it.
- While charging battery with handset on,  flashes until battery is fully charged.
- Battery will charge regardless of handset position.

## Estimated Hours of Use (fully charged battery)

Continuous Talk Time	2.5 hours in 3G/4 hours in GSM
Continuous Standby Time	370 hours
Continuous Operating Time	5.5 hours
Continuous Playback Time	10 hours
Continuous Video Call Time	90 minutes

Values calculated with Backlight Brightness set to **Level 4**.

- Continuous Talk Time is an average measured with a new, fully charged battery, with stable signals. Continuous Talk Time may be less than half this value if handset is out-of-range or signal is weak.
- Continuous Standby Time is an average measured with a new, fully charged battery, with clamshell closed without calls or operations, in Standby with stable signals. Standby Time may be less than half this value if handset is out-of-range or signal is weak. Standby Time may vary by environment (battery status, temperature, etc.).
- Continuous Operating Time is the length of time handset keys can be pressed continuously without calls.
- Continuous Playback Time is measured while music plays (Tone Control set to **Normal**) using LCD Remote/Mic with Headphones, Offline Mode cancelled, and clamshell closed.
- The above values (Battery Time) are nominal values, measured under stable signal conditions.

## Battery Time

Using handset in poor conditions may shorten Battery Time:

- **Poor Usage Conditions**
  - Extreme temperatures (use within a range of 5°C to 35°C)
  - Impaired handset, battery or Charger terminals
  - Signal is weak/handset is out-of-range
- **Power Consuming Operations**
  - Activating/using V-applications
  - Repeated mobile camera use or barcode scanning
  - Frequent use of Mobile Light
  - Playing video images
  - Frequent use of Pen Light
  - Continuous Keypad use (Keeping backlights on for long periods)
  - Using Music Player/Voice Recorder
  - Frequent Bluetooth transmissions
  - Frequent infrared transfers
- **Power Consuming Settings**
  - Increasing Backlight Time Out/Display Saving time
  - Setting Backlight to illuminate brighter
  - Activating Bluetooth in Standby

## Extend Battery Time

Select shorter Display Saving/Backlight time (see P.10-7) to extend Battery Time.

## When Battery Runs Out

A message appears and short beeps sound.

Press  to stop short beeps.

(Short beeps do not sound in Manner mode.)

### During Voice Call

A double beep sounds every five seconds.

After 20 seconds, the call ends and handset shuts down.

### During Video Call

A message appears and call ends with a double beep, then short beeps sound. Handset shuts down after 20 seconds.

(Short beeps are muted in Manner mode.)

## Battery Disposal

Do not dispose of an exhausted battery with ordinary refuse; always tape over battery terminals before disposal. Take exhausted battery to a Vodafone shop, or follow the local disposal regulations.

## Battery Strength

When battery runs out, **Recharge Battery** appears and short beeps sound. Handset shuts down after 20 seconds.

## Indicator

Battery Strength indicator varies as shown.

Charge or replace when level is low.

## Battery Strength & Environment

At low temperatures, battery is consumed faster.

At high temperatures, battery lasts longer.

- Note** ▶
- Battery Strength indicator is for reference only.
  - At Level 1, some functions including Video Camera, Music Player and Voice Recorder do not operate (see P.6-7, P.7-8, P.11-15).

## Small Light & Battery Strength Indicator

### Handset Power On

Small Light	Indicator (▣▣▣▣/▣)	Conditions
Off	Flashes	Ambient temperature is outside the range of 5°C to 35°C, or battery has run out
Flashes red	Flashes	Battery life has ended, or battery defect
Illuminates red	Flashes	Charging
Off	Illuminates	Charging completed/Standby

### Handset Power Off

Small Light	Indicator (▣▣▣▣/▣)	Conditions
Flashes red	Off	Battery life has ended, or battery defect
Illuminates red	Off	Charging
Off	Off	Charging completed

## Installing & Removing Battery

### Inserting

- 1 Press down and slide cover as shown**

- 2 Lift and remove cover as shown**

- 3 Insert battery**

- With printed side up, fit tabs into battery cavity slots.

- 4 Close cover**

- Position and slide the cover as shown until it stops.

### Removing

- Turn handset power off before removing battery.
- Do not remove battery immediately after saving files, sending messages, etc.

- 1 Press down and slide cover as shown**

- 2 Lift and remove cover as shown**

- 3 Remove battery**

- Take hold of Battery Tab here and lift as shown.

**Tip** ▶ This product requires a lithium-ion battery. Lithium-ion batteries are a recyclable resource.

- To recycle a used lithium-ion battery, take it to any shop displaying the symbol shown to the right.
- To avoid fire or electric shock, do not:
  - Short-circuit battery
  - Disassemble battery

## AC Charger

**Use specified Charger only.**
**1 Open Terminal Cover to connect Charger**

- Squeeze release tabs and insert connector fully.
- Use slot to gently pull Terminal Cover down and out as shown.

**2 Plug Charger into AC outlet**

- Charging starts and Small Light illuminates red (see P.1-14).
- Extend Charger blades.  
(Fold back when not in use.)

**3 Charging is complete when light goes out**

- Charging takes approximately 140 minutes.

**4 After Charging**
**Unplug Charger from AC outlet, then 804SH**

- Squeeze release tabs to remove connector.
- Replace Terminal Cover to protect External Device Connector.

**Note**

- Do not pull, bend or twist AC Charger cord.
- AC Charger is compatible with household currents between AC 100V and 240V.
- Vodafone is not liable for problems resulting from charging 804SH abroad.

## Desktop Holder

Desktop Holder may be purchased separately.

**Use specified Charger only.**

### 1 Insert Charger connector into Desktop Holder until it clicks

- Connection Terminal is on the back of Desktop Holder.

### 2 Plug Charger into AC outlet

- Extend Charger blades.  
(Fold back when not in use.)

### 3 Gently insert handset into Desktop Holder

- Fit tabs into slots as shown in **1** and push handset as indicated in **2** until it clicks into place (resting flat).
- Charging starts and Small Light illuminates red (see P.1-14).

### 4 Charging is complete when light goes out

- Charging takes approximately 140 minutes.

### 5 After Charging

**Unplug Charger from outlet and remove handset**

## In-Car Charger

In-Car Charger may be purchased separately.

**1 Open Terminal Cover and insert Charger connector until it clicks (see P.1-16)**

**2 Plug Charger into cigarette lighter socket**

**3 Start car engine**

- Charging starts and Small Light illuminates red (see P.1-14).

**4 Charging is complete when light goes out**

- Charging takes approximately 140 minutes.

**Tip ►**

- For more information, see In-Car Charger manual.
- Use optional In-Car Holder to secure handset.

**5 After Charging**

**Unplug Charger from cigarette lighter socket, then 804SH**

- Squeeze release tabs to remove connector.
- Replace Terminal Cover to protect External Device Connector.

**Note ►**

- Use In-Car Charger only when vehicle has a negative earth.
- Disconnect Charger before leaving vehicle to prevent charging with engine off.
- Do not use In-Car Charger with Desktop Holder.
- Avoid charging battery inside extremely hot vehicles.

# Handset Power On/Off

# Conversion Methods (Japanese Only)

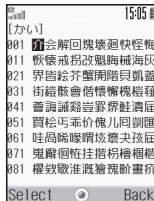

## Phonetic Conversion

Enter alternate readings to search for kanji.

1 Enter reading in hiragana

2 Press  Kanji

3 Select a kanji and press 

## One-Hiragana Conversion

Enter the first hiragana to access previously selected words.

Example: To enter 鈴木

- One-Hiragana Conversion and User Dictionary (see P.10-15) share memory. Selected words may not be saved if User Dictionary is full.
- Up to 20 word selections are saved per hiragana. When memory is full, the oldest entry is deleted to make room for a new entry. However, User Dictionary remains unchanged.

## Hiragana to Katakana/Alphanumerics Conversion

Enter katakana and alphanumerics in kanji (hiragana) entry mode.

1 Enter hiragana and press  kana

- To enter AM, press   then  kana.

2 Use  to select a word and press 

- Hiragana to Roman Letter Conversion (hiragana with ' or ' is converted to the same characters/Symbols):

## Quick Conversion (for Hiragana)

Quick Conversion helps reduce keystrokes needed to enter frequently used words.

A list of word suggestions appears based on the key pressed.

**Example: To enter 微妙**

Normal Conversion	6.あ 6.い *6.う (び) 7.あ 7.い (み)
	8.あ 8.い 8.う 8.あ 8.い 8.う (よ)
	1.あ 1.い 1.う (う) (convert)
Quick Conversion	6.あ *6.あ (ば) 7.あ (ま) 8.あ (や) 1.あ (あ) (convert)

### 1 Enter hiragana and press (convert)

Cursor turns green.

- While cursor is green, use (convert) to segment entered hiragana and then convert one segment at a time.

To cancel Quick Conversion, press (cancel) ➔ Press (convert) for normal conversion

### 2 Use (select) to select a word and press (confirm)

**Note** ▶ Use Quick Conversion in kanji (hiragana) mode only.

**Tip** ▶ The most recent selection (mostly nouns) appears first.

## One Hiragana Predictive Entry

Enter hiragana and initiate Quick Conversion. Words starting with a hiragana in the same row (あ, い, う, え, お for あ) appear. Word suggestions vary by time of day.

**Example: When あ is entered**

5:00 - 10:59	11:00 - 16:59	17:00 - 22:59	23:00 - 4:59
朝一番 朝帰り 行ってきます いってらっしゃい :	あちい～ 後でね いただきま～す♪ 移動中 :	遊ぼう 明日 急いで行くよ 今どこ? :	アウチ!! ありがとう いえーい!!! 行こうね :

- Words in the list are preset by time blocks.
- If Clock is unset, only words for 11:00 - 16:59 are available.

## One Hiragana Word Call

Enter the first hiragana of entries you used Quick Conversion for. The most recent selection appears first.

**Example: You entered あたあざわ and selected お父さん last time.**

## Conversion Settings

## *Camera*

# Getting Started

804SH features a 2.0 megapixel CCD camera. Capture still images (see **P.6-5**) or record video (see **P.6-7**).

**Tip** ► Use Internal Camera (see **P.1-7 8**) or External Camera (see **P.1-7 29**); unless otherwise noted, mobile camera operations are described for External Camera.

## Mobile Camera Basics

- Clean dust/smudges from lens cover (see **P.1-7 29**) with a soft cloth before use.
- Handset movement may blur images; hold 804SH firmly or place it on a stable surface and use Self-timer (see **P.6-10**).
- Mobile camera is a precision instrument, however, some pixels may appear brighter or darker.
- Shooting/saving images while handset is hot may affect the image quality.
- Subjecting the lens to direct sunlight will damage the camera's colour filter.

### Shutter Click

- Shutter click volume is fixed, and sounds even in Manner mode.
- To change shutter click sound for still images, see **P.6-14**.

### Incoming Calls/Alarm while Using Camera

- Mobile camera shuts down for incoming calls and Alarm.
- When recording video, Alarm Times are announced after mobile camera operations are concluded.
- Captured image/recorded video is temporarily saved. End the call or close Alarm Time notice to return.

### Precautions for Video Recording

- When battery is low ( or ) , Video Camera is not available. If battery runs low while recording video, recording stops. (Recorded video is saved.)

### Auto Shut-off

- Before image capture, mobile camera shuts down after five minutes of inactivity and handset returns to Standby.

### Exporting Images

- View images and video on PCs, TVs or other display devices via Video Cable (see **P.10-8** "Viewing Images on External Devices").

## ***Media Player***

# Media Player Basics

Use Media Player to record and listen to music (Music Player) or play video (Video Player). Save video/music files to handset or Memory Card (including SD VIDEO and SD AUDIO). To open files, specify the location first.

- For Playlist details, see **P.7-19**.
- Playback stops when battery is low. Charge battery and resume from where it stopped (see Step 1 on **P.7-11** or **P.7-13**).
- Consume media as it downloads (Streaming: see **P.15-10**).

## When Manner Mode is Active

- When Media Player is opened, sound output confirmation appears.
  - Press **[Yes]** to cancel Manner mode temporarily. Handset speaker outputs sound at the volume set for Media Player.
  - Press **[No]** to stay in Manner mode. Use LCD Remote/Mic with Headphones to listen to music without bothering others.

## Incoming Calls/Mail during Playback

- Playback stops for incoming calls or Alarm.
  - When playback stops while streaming, the URL is saved to Access History.
- An icon appears for incoming mail without interrupting playback.

## Downloading Music/Video

Open music/video-related links in Vodafone Web Menu directly from Media Player to download music (Chaku-Uta) and video.

- Read information (price, expiry date, etc.) on the source site.
- Use Music Search (see **P.7-3**) to search by title, artist, etc.

**Main Menu** ▶ *Media Player*

- 1 Select Music or Videos and press [OK]**
- 2 Select Download Music or Download Videos and press [OK]**

Handset connects to the Network and the corresponding Vodafone Web Menu opens.

- Follow the links to download music/video.

### Music Search

■ Follow these steps to access the Vodafone Music Search site.

In Step 1 on P.7-2, select **Music** → Press **⏏** →

Select **Music Search** → Press **⏏**

- Fill in fields or follow links to search for/download music.

### Saving Music Files from PCs

Save music files onto Memory Cards from CDs, etc. using PCs or other devices to play them on handset Music Player.

#### Precautions for Handling Music Files on PCs

##### ■ Respect copyrights.

- Comply with copyright and other intellectual property laws when using music saved on Memory Cards.
- Under copyright law, music saved on Memory Cards is limited to private use.

##### ■ Use music files compliant with the SD-Audio standard.

804SH supports Secure MP3, Secure AAC and AAC files compliant with the SD-Audio standard.

- For AAC files, see "Precautions for Handling AAC Files" on the right.

##### ■ Save music to the specified directory.

Save music to the following folder on Memory Card using a miniSD™ reader/writer or other compatible device.

PRIVATE/VODAFONE/My Items/Sounds & Ringtones

**Tip** ▶ For more about saving music files from PCs, see "Utility Software Starter Guide" on Utility Software CD-ROM.

### Precautions for Handling AAC Files

#### ■ Use software supporting AAC conversion.

- Use software such as iTunes to convert music to AAC format.
- iTunes is an example only. Vodafone does not guarantee compatibility with any software.
- For software usage and specifications, see the provider's website, etc.

iTunes is a registered trademark of Apple Computer, Inc registered in the United States and other countries.

#### ■ Supported bit rate and sampling frequency are as follows.

Bit Rate (kbps)	20* <sup>1</sup> , 24* <sup>1</sup> , 28, 32, 40, 48, 56, 64, 80, 96* <sup>2</sup> , 112* <sup>2</sup> , 128* <sup>2</sup>
Sampling Frequency (Hz)	16000, 22050, 24000, 32000, 44100, 48000

\*<sup>1</sup>Supports stereo playback only when the sampling frequency is 16000 Hz.

\*<sup>2</sup>Monaural playback is not supported.

**Note** ▶ Artist names for AAC files do not appear on 804SH.

## Recording Music

Connect 804SH to audio sources supporting optical output to record music onto Memory Cards.

- 804SH encryption technology complies with Secure Digital Music Initiative (SDMI) for copyright protection. This technology prevents unauthorised copying or playback through data encryption and authentication.
- Analogue recording is not supported.

### Required Cables for Recording Music

- Optical Conversion Cable (optional accessory)
- Optical digital connecting cable (sold separately)

### Recording Time

Estimated Recording Time for Memory Card with no Files or Recordings:

Card Capacity	Bit Rate/Recording Time	
	96 kbps	128 kbps
64 MB	80 minutes	60 minutes

Bit rate measures audio compression rate or the quality of audio data recorded per second. Sound quality improves at higher rates.

### Precautions before Recording

#### Charge handset while recording.

- Recording stops when battery level falls too low. Always use AC Charger when recording to ensure a stable power supply.
- When battery is low (  or  ), Music Player will not record. If battery runs low while recording, recording stops.

#### Music is recorded onto Memory Card.

To start Music Player, insert a Memory Card formatted for 804SH (see **P.8-3**, **P.8-4**).

#### Activate Offline Mode to prevent disruptions (see Steps 1 - 2 on P.7-7).

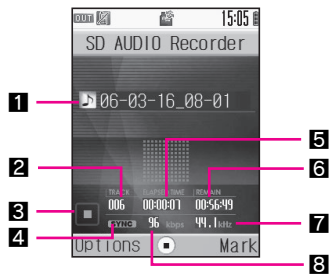

Incoming communications may disrupt recording or damage outputs of audio sources. (To place calls or send mail, stop recording and cancel Offline Mode.)

#### Do not remove Memory Card while recording.

Doing so may damage the card or result in lost files.

- Note** ▶
- Under copyright law, duplicated material is limited to private use. Unauthorised reproduction or use is prohibited.
  - Vodafone is not liable for any damages resulting from accidental loss or alteration of recordings.
  - Music recorded onto Memory Card cannot be copied to other media digitally.

## Track Bookmarks

Add Bookmarks to music in Playlist to divide it into tracks for Repeat or Random Play. Track Bookmarks are created when a period of silence is detected between music files.

- When recording from CD/MD players, etc., track numbers remain the same as the original.
- If Music Player does not detect a period of silence, recorded music files are all combined and saved as a single track.
- When Synch Recording is **On**, recording pauses after a period of silence. Recording resumes when sound (next music) is detected.
  - When Synch Recording is **On**, recording stops after 15 seconds of pause.
- Brief sound dropouts occur when Track Bookmarks are created.
- Track Bookmarks may not be created automatically depending on the connected audio source. In this case, divide music into tracks manually (see Step 4 on P.7-7).

**Note** ▶ Recording may result in silence or a single music file with a low volume level if the music consists of long periods of silence or sustained low volume level.

## Sampling Frequency

Sampling frequency is the number of times an audio signal is measured (sampled) per second, expressed in kilohertz (kHz). Similar to bit rate, higher rates translate into better sound quality. Sampling frequency is automatically set to 32 kHz, 44.1 kHz or 48kHz according to the recording method or audio source.

When recording from DVD players, cancel DTS.

**Note** ▶ Recording results may not be satisfactory depending on the signal format.

## Connecting to Audio Sources

### Connection Precautions

**Connect Optical Conversion Cable with an optical digital connecting cable, then to 804SH gently. Disconnect Optical Conversion Cable gently by holding the plug and handset.**

Do not use excessive force when connecting/disconnecting cables; doing so may damage cable, Mini Plug or Headphone/Optical Digital Line In Connector.

**Use specified Optical Conversion Cable only.**

Non-specified cables may not function properly and damage may result.

## Cable Connections

Use Optical Digital Audio Toslink-Mini or Mini-Mini Cables (sold separately) with Optical Conversion Cable to connect audio sources to 804SH.

- Use Optical Conversion Cable only for recording music.
- Optical Conversion Cable is designed exclusively for 804SH and other specified Vodafone handsets. Do not use for other devices to prevent damage or malfunction.

## Recording

- Most operations are described with Synch Recording active.
- Read the precautions on **P.7-4** before recording.
- To listen to music while recording, adjust Monitor Level before recording (see **P.7-8**).
- Prepare an audio source and pause playback at the beginning of music.

Main Menu ▶ Media Player ▶ Music

### 1 Select **SD AUDIO Recorder** and press **⊙**

**Receive calls during recording?** appears.

- To prevent disruption by calls, choose **⊙ No** in Step 2 to activate Offline Mode (see **P.2-19**).
- If Offline Mode is already active, skip ahead to Step 3.
- **SD AUDIO Recorder** can only be selected when a Memory Card is inserted.

### 2 Press **⊙ No**

Recording window opens.

- Customise settings before recording (see **P.7-8** "Recording Settings").
- To accept incoming calls, mail, etc. while recording, press **⊙ Yes**.

### 3 Press **⊙**

Handset is ready for Synch Recording (see **P.7-8**).

- When Synch Recording is **Off**, press **⊙** again ▶ Start playback

### 4 Start playback

Recording starts automatically when handset detects sound.

- To create Track Bookmarks (see **P.7-5**) manually, press **⊙ Mark** while recording.

### 5 To stop recording, stop playback on the audio source

Recording pauses, then stops after 15 seconds.

- If **⊙ No** was pressed in Step 2, Offline Mode is cancelled after recording ends.
- When Synch Recording is **Off**, press **⊙** to stop recording.

#### Note ▶

- Do not remove Memory Card or battery while recording. Doing so may damage the card or result in lost information.
- Do not touch cables or plugs while recording. May cause noise or skipping.
- When recording from PCs or BS/CS digital tuners, recording level may decrease.
- Unchecked files recorded with J-SH51/J-SH52 will be deleted when the Memory Card is used for 804SH Music Player.

- Tip** ▶
- Alarm is disabled while recording, and starts after Music Player stops/closes.
  - Recorded music is saved by date and time by default.

## Recording Settings

Follow these steps after Step 2 on P.7-7.

### Monitor Level

Set volume level to listen to music while recording

- Press **Options** → Select **Monitor Level** → Press **Level 3**  
 → Use **+** to adjust level → Press **OK**

### Synch Recording

Start recording automatically when playback starts on audio sources

- Press **Options** → Select **Synch Recording** → Press **On**  
 → Choose **On or Off** → Press **OK**

### Bit Rate

Select a bit rate (see P.7-4 "Recording Time")

- Press **Options** → Select **Bit Rate** → Press **Normal (96 kbps)**  
 → Select **Normal (96 kbps)** or **High-quality (128 kbps)**  
 → Press **OK**

- Sound quality is better at 128 kbps. However, recording time shortens as more space is required in memory.

### Auto Mark Level

Default: -41dB

- Press **Options** → Select **Auto Mark Level** → Press **-41dB**  
 → Select **-41dB** or **-59dB** → Press **OK**

- Select **-59dB** for soft music to prevent unintended Track Bookmark creation.

## Playing Music

Play music on Memory Card.

- Use LCD Remote/Mic with Headphones (see P.7-10) to listen to music without bothering others.
- Alternatively, use handset speaker.

## Precautions before Playing Music

- Music Player is not compatible with some recording/playback formats. Music may not play depending on the Memory Card status.
- Grasp the plug when connecting or disconnecting LCD Remote/Mic with Headphones. Do not bend the plug to avoid damaging the cord or Headphone Connector.
- Use only the specified accessories (LCD Remote/Mic with Headphones, etc.). Other devices may not function properly and cause damage to Headphone Connector.
- When battery is low (  or  ), Music Player will not play. If battery runs low during playback, Music Player shuts off.

- Tip** ▶
- To answer calls during playback with LCD Remote/Mic with Headphones, press Call Button (  /  ) for 1+ seconds.
  - Turn down the volume if distortion is noticeable in speaker sound.
  - Large files may take longer to open. My Music and Playlists may take longer to open if large files are saved.

## *Memory Card*

## Before Use

804SH is compatible with miniSD™ Memory Card;

- miniSD™ Memory Card is not included in this package. Purchase miniSD™ Memory Card to use Memory Card-related handset functions.
- Format a new miniSD™ Memory Card for use with 804SH (see P.8-4).
- To learn how to save a particular file to Memory Card, refer to that section of the manual.

### Memory Card Memory Status

■ Press  ➔ Select *Data Folder* ➔ Press  ➔ Select *Memory Status* ➔ Press  ➔ Select *Memory Card* ➔ Press 

- A portion of Memory Card is reserved for storing copyright information, etc.

### Precautions

- To reduce risk of malfunction, use only recommended miniSD™ Memory Card sizes.
- Turn handset power off before inserting or removing a Memory Card.

- Do not place labels or stickers on Memory Card. These items may affect card performance or result in lost information.
- Use an oil-based felt pen to write on Memory Card. Using a pencil or ballpoint pen may damage the card or result in lost information.
- Never disassemble or modify a Memory Card.
- Do not expose Memory Card to strong impacts, pressure or liquids.
- Do not touch Memory Card terminals or expose them to metal objects.
- Do not expose Memory Card to direct sunlight or excessive heat (e.g. inside vehicles, etc.).
- Keep a Memory Card away from dust or high humidity.
- Do not use in the presence of corrosive gases.
- Avoid heat sources and do not dispose of in fire.
- A Memory Card is a consumable item. Card performance deteriorates with usage.

**Note** ▶

- Vodafone is not liable for any damages resulting from accidental loss/alteration of information. Keep a copy of Phone Book entries, etc. in a separate place.
- miniSD™ Memory Cards do not have Write Protection Switch. There is a risk of accidental erasure or overwriting of files.

**Tip** ▶ The manufacturer recommends the use of 32, 64, 128, 256 or 512 MB cards.

## Inserting & Removing Memory Card

### Inserting

Turn handset power off.

#### 1 Open cover

#### 2 With logo side down, insert card until it clicks

#### 3 Close cover

**Note** ▶ Do not insert other objects into Memory Card Slot; may damage handset/card.

**Tip** ▶ Insert a Memory Card and turn handset power on. Standby appears. Memory Card load times vary depending on card size and the amount of information saved.

### Removing

Turn handset power off.

#### 1 Open cover and gently push down on card

- With a light push, the card pops out.

#### 2 Remove card

- Using the notch on its edge, pull the card straight out

#### 3 Close cover

### Closing Cover

#### 1 Slide cover as shown

#### 2 Push in cover until it clicks

**Note** ▶ Never remove Memory Card or battery while files are being accessed. Damage to handset/card may result and files/data may be damaged/lost.

## Format Card

When using a new miniSD™ Memory Card, format it on 804SH for use with 804SH before trying to save files, etc.

Main Menu ▶ Settings ▶ Connectivity (☺) ▶ Memory Card ▶ Format Card

### 1 Press Yes

Offline Mode is set.

When handset is connected to the Network, press .

### 2 Enter Handset Code

### 3 Press

### 4 Press Yes

To cancel, press  No.

- Note** ▶
- Before formatting a Memory Card, make sure there is no important information saved on the card. Format Card deletes all files from Memory Card.
  - Never remove Memory Card or battery while formatting.
  - An improperly formatted Memory Card may not function as it should with 804SH.

## Backup & Restore

Back-up entries to Memory Card by function, and restore to handset whenever necessary. All entries of the following functions can be transferred at once:

- Phone Book
- Calendar
- Tasks
- Text Templates
- Bookmarks

All contents are copied to Memory Card as a single file. (File name is the date of transfer.)

### Precautions

- Backup or Restore is not available when battery is low.
- When a V-application is paused, **Application suspended. End application?** appears. Press  Yes to start Backup or Restore.
- When handset or Memory Card memory is low, entries may not transfer correctly.
- Some items may not be transferable. Some backup files may not be usable on other Vodafone handsets, PCs or other devices.
- Handset stores up to 300 entries between Calendar and Tasks. If the limit is reached during a transfer, the remaining entries will not be received.
- Backup file contents can only be accessed when restored to handset.
- Copy handset entries as backups, share information between miniSD™ Memory Card-compatible handsets, or transfer entries to a newly purchased handset.

## Handset to Memory Card

## Bluetooth

### Getting Started

Bluetooth is a wireless technology that allows 804SH to communicate with other 804SH within 10 m or with other compatible devices (PCs, mobile phones, handsfree devices, etc.).

### Precautions

Handset Bluetooth Specifications:

<b>Communication System</b>	Bluetooth specification Ver. 1.2
<b>Bluetooth Profiles Supported</b>	Headset Profile Hands-Free Profile Dial-up Networking Profile Object Push Profile File Transfer Profile Basic Imaging Profile
<b>Output</b>	Bluetooth Power Class 2

- Bluetooth connections are available with compatible devices supporting the same profile.
- Bring handsets to within 10 m. Bluetooth connection/transfer rate is affected by distance between handsets, obstructions, signal conditions, handset status, etc.
- Bluetooth operates in the 2.4 GHz unlicensed frequency band. Depending on the status of other devices used in the spectrum, Bluetooth connection may slow down/terminate, or the range may decrease.
- Connect 804SH to one device at a time via Bluetooth.

**Note** ► Bluetooth connection may not be possible with some Bluetooth devices.

- Handset shall be connected to certified Bluetooth devices that meet the specification standards developed by Bluetooth SIG.
- Depending on characteristics or specifications of the certified Bluetooth devices, connection or data transfers may fail, or operational procedures, display content and actual operations may differ from those described in this manual.
- Noise may interfere with wireless or handsfree conversations depending on the status of connected devices or signal conditions.
- For details about headset/handsfree devices, see the device manuals.

## Activating Bluetooth

Activate Bluetooth before receiving files/entries or connecting handset to handsfree devices.

Bluetooth is **Off** by default.

**Main Menu** ► Settings ► **Connectivity** (📶) ► Bluetooth ► Switch On/Off

### 1 Choose **On** and press **⏻**

Handset returns to Standby and **📶** appears.

■ To cancel, choose **Off** ► Press **⏻**

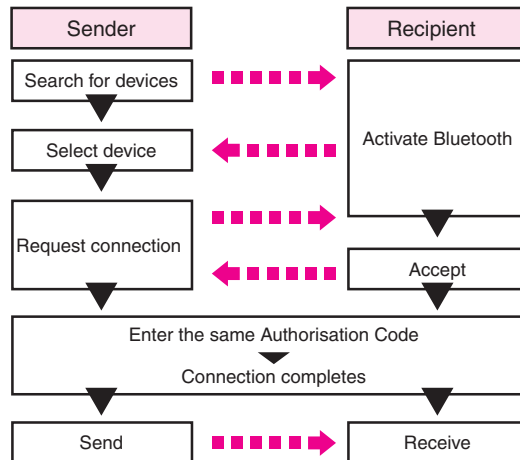

- When transmission is in progress, press **⏻** **Yes**.

**Note** ► Connection requests from other devices can only be accepted when handset is in Standby or while Main Menu is opened. Files/entries/folders can only be received when handset is in Standby.

## Bluetooth Connection

Activate Bluetooth (see left) on recipient device. Connection starts when a request is received from the other device. (Authorisation Code may be required.)

### Example

### Authorisation Code

- Authorisation Codes (4 to 16 digits) are specific for Bluetooth connection. Pairing is possible when Authorisation Codes of both devices match.
  - Authorisation Codes are not necessary for paired devices.

## Device Search & Pairing

Search for Bluetooth devices for pairing. Paired devices are automatically registered to handset.

- Authorisation Codes are not necessary for paired devices.
- Search for up to 16 devices at a time.
- Device search is disabled if 32 devices are already registered.
- Activate Bluetooth on devices to be paired with.

Main Menu ▶ Settings ▶ Connectivity (📶) ▶ Bluetooth

### 1 Select Search for Devices and press

Found devices are listed after search. (The previous search result appears, if any.)

- Device Indicators:

 PC       Wireless headset       PDA  
 Handfree device       Mobile phone       Printer  
 Others

- ▶ Press  **Cancel** to cancel.

### 2 Select a device and press

- ▶ When transmission is in progress, press  **Yes**.

### 3 Enter the same Authorisation Code (4 to 16 digits) for handset and the other device and press

When pairing is complete, **Pairing is successful.** appears and Standby returns.

- For handsfree devices, enter specified Authorisation Code.
- Complete code entry within 30 seconds.

## Pairing with Handsfree Devices

- ▶ Start device search with handsfree devices for pairing.

**Handset receives a connection request** ▶

Press  **Yes** ▶ **Enter Authorisation Code** ▶

Press 

- Activate Bluetooth (see P.10-21) on handset and set Visibility (see below) to **Show My Phone**.

## Opening Paired Device List

Main Menu ▶ Settings ▶ Connectivity (📶) ▶ Bluetooth

### 1 Select Paired Devices and press

List of all paired devices appears.

- ▶ To open list of handsfree devices only, press .
- ▶ To rename paired devices, select one ▶ Press  ▶ Enter name (up to 16 characters) ▶ Press .
- ▶ To delete paired devices, select one ▶ Press  **Options** ▶ Select **Delete** ▶ Press  ▶ Press  **Yes**

## Visibility

Allow other Bluetooth devices to find 804SH during device search.

- Set Visibility to **Hide My Phone** to hide 804SH from other Bluetooth devices.
- Visibility is set to **Show My Phone** by default.

Main Menu ▶ Settings ▶ Connectivity (📶) ▶ Bluetooth ▶ Visibility

### 1 Select Show My Phone or Hide My Phone and press

## Transferring Files via Bluetooth

### Transfer Options

<b>One File Transfer</b>	Transfer files/entries one by one. Received files/entries are saved to corresponding functions.
<b>All File Transfer</b>	Transfer all files/entries by function
<b>Receive Folder</b>	Receive a folder and its contents. Folders are saved to Data Folder. (804SH does not support sending folders.)

- Note** ▶
- During infrared transfers or Bluetooth transmissions, handset automatically enters Offline Mode. Thus transfers are disabled while receiving calls/messages, during calls, while using Web or Media Player, while editing mail or data, etc. Offline Mode is cancelled after transfers.
  - Some entries in Phone Book, Calendar, Tasks, Text Templates and Bookmarks may not be saved correctly.

### Transferable Files

# Infrared

## Getting Started

Infrared is a wireless technology that allows 804SH to communicate with other compatible devices (PCs, mobile phones, etc.).

## Precautions

- Align Infrared Ports within 20 centimetres with no obstructions between handsets.

- Keep Infrared Ports aligned during transfer.
- Transfers in direct sunlight, under fluorescent lighting or near infrared equipment may fail.
- Dust/oil may impair file transfers; clean Infrared Ports with a soft cloth beforehand.
- Infrared transfers are disabled while sending/receiving mail or using Web.

- 804SH complies with IrMC 1.1, but some files may not be exchanged.

**Tip** ▶ When transfer fails, **Device not found. Reconnect?** appears. Take the precautions on the left and press  **Yes** to try again.

## Authorisation Code

- Authorisation Codes (four digits) are specific for infrared transfers. All File transfers are possible when Authorisation Codes of both devices match.

## Transferring Files via Infrared

# Voice Recorder

Use handset microphone to record short voice memos and save files on handset or Memory card; record and save longer recordings on Memory Card.

- Modes:

	Recording Time	Storage Media
<b>For Message</b>	Up to three minutes (attachable to MMS)	Handset or Memory Card <sup>1</sup>
<b>Extended Voice</b>	Up to approximately 10 hours	Memory Card <sup>2</sup>

<sup>1</sup>Specify storage media before recording, or set 804SH to ask each time; when set to ask, always record with Memory Card inserted.

<sup>2</sup>Insert Memory Card to record in Extended Voice mode.

- **For Message** is set by Default.

## Preparation

- When battery is low (☐ or ☐), Voice Recorder will not record. If battery runs low while recording in Extended Voice mode, **Low Battery** appears and Voice Recorder shuts off.
- Conversations during calls cannot be recorded.
- If incompatible microphone is connected, recording may fail.

# Barcode

Scan printed barcodes with mobile camera or download QR Codes via Web or MMS.

- Scan UPC (JAN) or QR Codes. Handset automatically detects code type and reads data.
- In Continuous mode, scan up to 50 UPC (JAN) or 16 QR Codes at one time. In some cases, continuous scans may be disrupted depending on barcode data or data size.
- Zoom is not available.

- Note** ▶
- Scan may fail if the barcode is dirty or unclear.
  - Use Mobile Light when scanning barcodes indoors.
  - Capture one barcode at a time; otherwise scan may fail.

- Tip** ▶
- A UPC (Universal Product Code) or JAN (Japanese Article Number) is a series of varying width vertical lines (bars) and spaces. Bars and spaces together are elements, combinations of which represent different numbers. 804SH cannot read other one-dimensional barcodes (ITF Code, Code39, Codabar/NW-7, etc.).
  - A QR (Quick Response) Code is a matrix symbology consisting of an array of nominally square cells, which allows omni-directional reading of up to 7,366 alphanumeric characters and byte data, as well as kanji and kana.

## 1 Frame barcode in the centre of Display

- Hold handset approximately 10 cm away from barcode.
- Slide Portrait/Macro Selector (see P.6-4) to Macro (👉).
- Use **☺** to adjust brightness.
- Press **☺** to use Mobile Light.
- To activate or cancel Continuous mode, press **☺** **Options** ▶ Select **Continuous Scan** ▶ Press **☺** ▶ Choose **On** or **Off** ▶ Press **☺**

## 2 Press **☺**

- Mobile camera scans the barcode.
- If recognition takes time, move handset slowly and adjust the distance from barcode.

# Compass

Find magnetic north and calculate other directions from your current position. Adjust Motion Control sensor (see P.11-29) before using Compass for the first time.

**Main Menu** ▶ *Tools***1 Select *Compass* and press **

- Compass indicator points towards magnetic north.

**Note** ▶

- Built-in sensors detect handset orientation and Earth's magnetic field. Compass calculates the direction of magnetic north based on the readings of these sensors and does not support the Global Positioning System (GPS). Actual direction may differ from that shown on Compass. Use Compass only as a rough guide.
- Actual direction of magnetic north may differ when:
  - Aboard trains or in vehicles
  - Near metal objects such as desks and shelves
  - In steel-framed buildings
  - Near or inside lifts
  - Near sources of magnetic fields
- Keep handset Display as level as possible.

**Tip** ▶

When directions do not appear correctly, adjust Motion Control sensor (see P.11-29). In Compass window, press  **Adjust** and follow onscreen instructions.

<b>Call Forwarding</b>	When you know you won't be able to receive calls made to 804SH, automatically divert incoming calls to another phone number (see right)
<b>Voice Mail</b>	Set 804SH to forward all or all unanswered calls to Voice Mail Centre. Access caller messages from 804SH in service area or from a touch-tone phone anywhere (see P.12-3).
<b>Call Waiting*</b>	Call Waiting alerts you to incoming calls when the line is already engaged. After the tone, place the current call on hold and answer the second, or alternate between calls (see P.12-5).
<b>Conference Call*</b>	Open a second line while the first is engaged. Switch back and forth between two lines or talk on both simultaneously. Add other parties to an existing conversation and talk on up to five lines simultaneously (see P.12-5).
<b>Call Barring</b>	Restrict incoming/outgoing calls depending on conditions (see P.12-6)
<b>Caller ID</b>	Show or hide your own number when placing calls (see P.12-9)

\*An additional contract is required.

# Vodafone live! Services

Use Vodafone live! services to exchange text/multimedia messages with compatible handsets, PCs and other devices; download text, sounds, images and V-applications; browse the Mobile Internet via Web.

- For more information concerning Vodafone live! services, contact Vodafone Customer Centre, General Information (see P.18-24).
- To use Vodafone live! services, first perform Re-Provisioning to update Network information (see P.1-19).

## ■ Messaging

Use Short Message Service (SMS) and Multimedia Messaging Service (MMS) for messaging (see P.14-2). These messaging services are also available outside Japan.

### SMS

Use this basic Vodafone live! messaging service to exchange short text messages of up to 160 alphanumeric characters with Vodafone handsets. This service is the ideal solution for fast and short text messaging!

### MMS

Exchange text messages of up to 30,000 alphanumeric characters with MMS-compatible Vodafone handsets, email-compatible mobiles, PCs and other like devices. Attach images/sounds for multimedia messages.

An additional contract is required to use MMS and receive e-mail from PCs, etc.

## ■ Web (Vodafone Web)

Access the Mobile Internet. Browse for image or sound files as well as information (see P.15-2).

### Vodafone Web Main Menu

Access Vodafone live!-compatible Mobile Internet sites via Vodafone Web Main Menu; download news/info as well as files for use on handset.

### (Mobile) Internet

Enter Mobile Internet site URL to view a specific site/page directly; use Access History to access previously viewed sites/pages while online.

An additional contract is required to use Web service.

## ■ V-applications

Download V-applications, including games and graphics (see P.16-2).

### Web Downloads

Search for and download a wide variety of useful and entertaining V-applications via Vodafone Web.

### Network V-applications

A number of V-applications let you enjoy network gaming or even access real-time news/info.

### Screensaver

Use this entertaining function to set a V-application that activates when handset enters Standby.

- Download and use 804SH-compatible V-applications.
- Separate subscriptions are required for V-applications downloaded via Web.

## ***Messaging***

# Basics

If the V-application is set as Screensaver, V-appli Library returns. To proceed, cancel Screensaver and retry.

- 3 Press  **Yes**
  - Preloaded V-applications can be deleted.
  - Handset Code may be required.

## Screensaver

### Activating/Cancelling Screensaver

Set a V-application to activate when handset enters Standby. Screensaver is **Off** by default.

Main Menu ► V-appli ► Settings ► Screensaver ► Switch On/Off

- 1 Choose **On** and press 
  - To cancel, choose **Off** ► Press 

### Setting Screensaver

- Only one compatible V-application can be set for Screensaver.
- Screensaver cannot be set when another V-application is paused (↓ appears in grey).
- IC-appli and V-applications on Memory Card cannot be set.

Main Menu ► V-appli ► V-appli

- 1 Select a V-application and press  **Options**
- 2 Select **Set as Screensaver** and press 
  - Set as Screensaver** appears for compatible V-applications.

### Activation Time

■ Enter time delay before Screensaver activates in Standby.

Press **⊙** → Select **V-appli** → Press **⊙** → Select **Settings** → Press **⊙** → Select **Screensaver** → Press **⊙** → Select **Activation Time** → Press **⊙** → Enter time (01-10 seconds) → Press **⊙**

- Activation Time is **03** seconds by default.

### Suspend Time

■ Set run time after which Screensaver pauses.

Press **⊙** → Select **V-appli** → Press **⊙** → Select **Settings** → Press **⊙** → Select **Screensaver** → Press **⊙** → Select **Suspend Time** → Press **⊙** → Select time → Press **⊙**

- Suspend time is **Off** by default.

- Note** ▶
- Screensaver does not start when LCD Remote/Mic with Headphones is connected. Connecting Headphones (with Memory Card inserted) cancels an active Screensaver.
  - Screensaver may not start when an external device (hands free kit, etc.) is connected to handset.
  - Screensaver which responds to incoming transmissions may cancel out selected Mode Settings profile.

***Vodafone live! FeliCa***

# Basics

**Vodafone live! FeliCa** encompasses a range of IC Card-based services available via FeliCa-compatible Vodafone handsets.

804SH supports Vodafone live! FeliCa. To use services such as e-money, e-ticketing and reward point systems, simply hold handset over a compatible reader/writer at a shop or restaurant, etc.

## FeliCa

- A contactless IC card technology enabling wireless data transmissions with compatible reader/writer terminals

## IC Card

- The FeliCa chip embedded in FeliCa-compatible handsets
- Holds information required to use Vodafone live! FeliCa

## IC-appli

- V-Applications required to use Vodafone live! FeliCa
  - Edy e-money IC-appli is preloaded on 804SH.
    - Edy is a prepaid e-money service run by bitWallet Inc.

**Note** ▶ IC Card data content varies by service and usage history. Procedures to delete IC Card data vary by IC-appli; contact the service provider for details.

## Service Usage Outline

### Download IC-appli

**Download IC-appli via Mobile Internet site.**

- IC-appli is saved to IC-appli folder.

### Complete Registration/Set Up

**Activate IC-appli, complete registration/customise settings.**

- Charge accounts, check balance or payment records, etc.

### Use Service

**To use Vodafone live! FeliCa at shops, restaurants, and locations, centre  logo side over reader/writer.**

- Use e-money/e-tickets to shop/travel and earn reward points.

- Note** ▶
- IC-appli registration and usage vary; contact the service provider for details.
  - Vodafone is not liable for damages resulting from accidental loss/alteration of IC Card data/settings.
  - Keep service passwords/customer service contact information, etc. in a separate place.

## Starting IC-appli

To use Vodafone live! FeliCa, activate a service IC-appli and complete service registration, setup, charge, balance check, etc.

Main Menu ▶ IC-appli

### 1 Select IC-appli and press

To download an IC-appli, select **More IC-appli** ▶ Press 

### 2 Select an application and press

IC-appli starts.

To end the IC-appli, press .

**Note** ▶ IC-appli cannot be started during calls or when another V-application is active.

**Tip** ▶ IC-appli settings and usage patterns resemble those of other V-applications (see P.16-5 - 16-9). However, IC-appli cannot be set as Screensaver.

## Using Vodafone live! FeliCa

Follow these steps to conduct a transaction.

Example: making an electronic payment:

- Complete registration, setup and charge in advance.
- Complete transactions without activating an IC-appli.

### 1 Centre logo side over reader/writer

- Reader/writer will scan FeliCa IC Card even during calls or Vodafone live! transmissions.
- Confirm scan results on reader/writer display.
- If recognition is slow, move handset around slightly.
- When placed over sensor, 804SH may display a message, vibrate or activate a V-application for some services. To disable response, see P.17-7 "Interface Settings".

**When Handset Power is Off**

- Transactions possible; IC-appli do not start automatically.
  - After installing/reinstalling battery, always turn on handset power to use Vodafone live! FeliCa.

**When Battery is Low**

- Vodafone live! FeliCa is not available. Charge it beforehand.

- Tip** ▶
- Align handset parallel to reader/writer.
  - Foreign articles can block/hamper recognition.

## Messaging Mishaps

### ■ When MMS is not delivered as sent

Causes include the following. For details, contact Vodafone Customer Centre, General Information (see **P.18-24**).

- **Recipient is not subscribed to MMS, Super Mail or Long Mail.**
- **Recipient handset is not MMS-compatible.**
  - The maximum size of messages/attachments recipient handsets can receive varies by make and model.
- **Recipient handset is not JPEG-compatible.**
  - Some Long Mail-compatible handsets may only be able to process PNG images; convert JPEG files to PNG, then attach and send (see **P.9-11**).

### ■ When handset memory is insufficient

New messages cannot be delivered (,  or  appears in red). Undeliverable mail is saved at the Centre.

- Delete messages to free memory for new ones (see **P.14-19**). When memory is available, new messages are delivered automatically.
- Delete unprotected messages automatically to receive new ones (see **P.14-23**).
- Even if memory is not full, handset cannot receive new messages larger than remaining memory.

- Values left were calculated with battery installed.
- Continuous Talk Time is an average measured with a new, fully charged battery, with stable signals. Continuous Talk Time may be less than half this value if signal is weak.
- Continuous Standby Time is an average measured with a new, fully charged battery, with clamshell closed without calls or operations, in Standby with stable signals. Standby Time may be less than half this value if 804SH is out-of-range/signal is weak. Standby Time may vary by environment (battery status, ambient temperature, etc.).
- Talk Time/Standby Time decrease with frequent use of Display/Keypad backlights.
- Talk Time/Standby Time may decrease when a V-application is active.
- Talk Time/Standby Time decrease with handset use in poor signal conditions (see P.1-12 "Battery Time").
- Display employs precision technology, however, some pixels may appear brighter/darker.
