TV

8

Handset supports One Seg Digital TV for cellular phones and other information terminals.

● One Seg is available only in Japan. Because other countries use different broadcast systems and frequencies, watching One Seg Digital TV is not possible outside of Japan.

One Seg

One Seg is a digital TV broadcasting service for mobile devices. It uses one segment of the terrestrial digital band for TV and data broadcasts that you enjoy at home, on your handset.

Watch TV in Widescreen

Data Broadcasts
Enjoy data broadcasts while watching TV. Access program-related information and even participate in the program (P. 8-8).

Record Programs
Record a program on memory card while viewing it and enjoy it again at a later time (P. 8-10).

View and Record Timer
Book programs you want to view/record. Program Guide can be used for booking programs (P. 8-13).

New Message Notification
Sender and subject information appears for new message while TV is active (P. 14-6).

Precautions

● Never watch TV while riding a bicycle, motorcycle, or driving a car. You may not hear the sounds around you clearly, or TV image/sound may distract you creating the risk of accident. Even while walking, pay attention to the traffic around you. Be especially careful at railway crossings and pedestrian crosswalks.

● TV image/sound may be affected if a call or message is received while watching TV.

● TV information (TV links or data you entered in Data Broadcast Mode) saved on handset cannot be transferred to another handset when you change your handset to another model or when it is repaired. Keep a memo of necessary information.

● TV is available when USIM Card is inserted and with a valid SoftBank contract.

● If TV is activated over a set number of times while out-of-range, TV becomes unavailable. Activate TV again after moving to a location with signal reception.

8

TV

8-2

About TV

- Sufficiently extend TV Antenna to improve signal reception. An inadequate picture may be improved by changing antenna direction, moving handset away from/closer to you, or changing locations.
- TV image/sound may deteriorate or signal reception may become impossible in the following areas:
  ・ Areas far from signal towers
  ・ Mountain areas or places beside tall buildings
  ・ In tunnels, underground malls or buildings with a lot of signal obstructions
- For more information on One Seg services, visit the following website: The Association for Promotion of Digital Broadcasting
  From PC: http://www.dpa.or.jp/
  From handset: http://www.dpa.or.jp/1seg/k/ (Japanese)

When You First Activate TV

The first time you activate TV, following information appears.
・ How to switch between Portrait and Landscape view
・ Functions unavailable in Landscape view
Read information then press ■, select *YES*, and press ■. If *NO* is selected, information no longer appears when activating TV.

When a Call Arrives While Using TV

When a call arrives or when Alarm or Schedule Alarm is activated while using TV, TV is interrupted to receive the call, etc. TV resumes after the interrupting function ends.
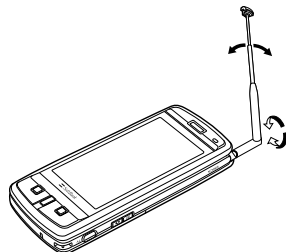

TV Antenna

- Do not use force when changing antenna direction.
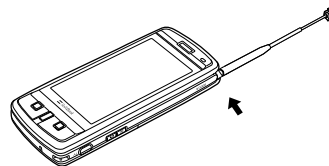

Extend

1 Extend until Antenna stops

**2 Change direction of Antenna**

Retract

1 Hold lower part of Antenna and push in all the way

Recording Programs

TV programs can be recorded on memory card while you are watching them.

● Data broadcasts are not saved with recording.

1 **[TV] window ▶ Press and hold** ✉

Recording starts.

■ **To Capture a Still Image**
▶ ✉

Captured still images are saved to TV folder in Data Folder.

2 ✉

Recording ends.

■ **When Memory Becomes Full**
Recording ends and the recorded portion is saved.

Note

• The channel remains fixed during recording.
• Recording certain programs is restricted. If a restriction is activated while recording a program, recording automatically ends, and the part that has been recorded so far is saved.
• When 📡 appears to indicate handset is out of the broadcasting area, recording is paused. When the signal strength recovers to weak or better, recording automatically resumes.
• Recordings that you make are for personal use only. Other uses require the permission of the copyright holder.
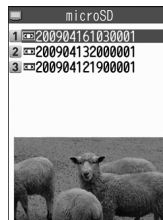

Tip

• Recordings and still images can also be saved when handset is closed (P. 8-8).
