Save files to memory cards. Still images and videos shot with handset camera can be saved directly to memory card. Data can be copied and moved between handset and memory card. Data on memory card can also be accessed from Data Folder.

● Handset supports microSD™ and microSDHC™ memory cards of up to 8 GB (as of February 2009).
● Be sure handset power is off when inserting/removing memory cards.
● Insert memory cards properly. Otherwise, they cannot be used on handset.
● Do not affix stickers or labels to memory cards. As memory cards are very thin and precise mechanisms, even a thin sticker or label on a memory card may cause contact failure or destruction of data.
● Keep memory cards out of reach of infants who may accidentally swallow them or be injured.
● Use only memory cards recommended by SoftBank. Other memory cards may not work properly and cannot be used on handset.
● Do not remove a memory card or power off handset while writing and reading

data with that memory card. It may cause data loss or malfunction.
● Access to memory cards may be unavailable when the battery level is low.

Inserting & Removing a Memory Card

Insertion

1 **Open Slot cover**

2 **Insert memory card into Memory Card Slot until it locks**
Insert gently with the printed logo facing up.
